All your files have been encrypted!

All your files have been encrypted due to a security problem with your PC. If you want to restore them, write us to the e-mail volantem_diem@aol.com
Write this ID in the title of your message [redacted]
In case of no answer in 24 hours write us to theese e-mails: volantem_diem@[illegible]
You have to pay for decryption in Bitcoins. The price depends on how fast you write to us. After payment we will send you the decryption tool that will decrypt all your files.

Free decryption as guarantee
Before paying you can send us up to 5 files for free decryption. The total size of files must be less than 10Mb (non archived), and files should not contain valuable information. (databases,backups, large excel sheets, etc.)

How to obtain Bitcoins
The easiest way to buy bitcoins is LocalBitcoins site. You have to register, click 'Buy bitcoins', and select the seller by payment method and price.
https://localbitcoins.com/buy_bitcoins
Also you can find other places to buy Bitcoins and beginners guide here:
http://www.coindesk.com/information/how-can-i-buy-bitcoins/

Attention!
- Do not rename encrypted files.
- Do not try to decrypt your data using third party software, it may cause permanent data loss.
- Decryption of your files with the help of third parties may cause increased price (they add their fee to our) or you can become a victim of a scam.

Profiling a Currently Active High-Profile Cybercriminals Portfolio of Ransomware-

Themed Extortion Email Addresses - Part Two (2021-02-16 03:49)

[1]

7011

Continuing the "[2]Profiling a Currently Active High-Profile Cybercriminals Portfolio of

Ransomware-Themed Extortion Email Addresses" series including the original "[3]Exposing Pro-

tonmail and Tutanota’s Illicit Abuse by Ransomware Gangs - A Compilation of Currently Active

Ransomware-Themed Email Addresses" post I’ve decided to issue a second update to the origi-

nal data set of currently active and circulating ransomware-themed emails currently circulating in the wild with the idea to assist U.S Law Enforcement and the security industry on its way to

track down and prosecute the cybercriminals behind these campaigns.

Currently active portfolio of currently active ransomware-themed email addresses currently

in use:

Exposing Anonymous International's Hacking Collective Online Infrastructure - An

OSINT Analysis (2021-02-18 03:25)

Dear blog readers,

It's been a while since I've last posted a quality update and I've decided to elaborate more and

offer an in-depth analysis of Anonymous International's Hacking Collective online infrastructure

with the idea to assist U.S Law Enforcement and the security industry on its way to properly

track down and attempt to shut down the infrastructure behind their fraudulent and rogue

online infrastructure.

In this post I'll provide actionable intelligence on Anonymous International's Hacking Collective online infrastructure and discuss in-depth the tactics techniques and procedures of the cybercriminals behind it and offer an in-depth peek inside Anonymous Indonesia a.k.a SoraCyberTeam.

Sample personally identifiable information for members of Anonymous International's Collective Indonesia:

A Compilation of Currently Active Cyber Jihad Themed Online Communities - An OSINT Analysis (2021-02-19 21:46)

Dear blog readers,

I’ve decided to share a recently collected list of currently active cyber jihad themed online communities obtained using Technical Collection with the idea to assist U.S Law Enforcement and the U.S Intelligence Community on its way to track down and prosecute the individuals behind these communities.

Currently active cyber jihad themed online forum communities:

Exposing a Currently Active List of Cyber Jihad Themed Twitter Accounts - An OSINT Analysis (2021-02-19 21:47)

Dear blog readers,

This is the second list of cyber jihad themed Twitter accounts that I wanted to share with everyone which I obtained using a recent Technical Collection campaign where I intend to assist U.S

Law Enforcement and the U.S Intelligence Community on its way to track down and prosecute

the cybercriminals behind these campaigns.

Currently active cyber jihad themed Twitter accounts:

VR

CYBERTRONICS - VR FOR HACKERS

Got BitCoin? (2021-02-22 09:41)

Dear blog readers,

I’ve decided to share with you the details of my most recently launched and permanent Dark

Web crowd-funding project where I aim to raise the necessary amount in BitCoin for the purpose

of working with and hiring VR application developers who can assist in building and developing

the World’s first VR social network platform for hackers and security experts.

Check

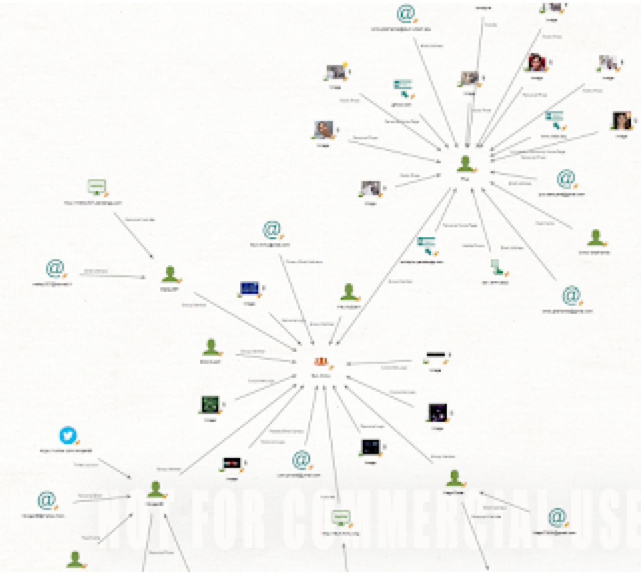
Exposing FBI’s Most Wanted Cybercriminals - Omid Ghaffarinia a.k.a "Plus" - An OSINT Analysis (2021-02-22 09:41)

Dear blog readers,

7181



I’ve decided to post a second update to my original [1]FBI’s Most Wanted Iran-based

Cybercriminals post including the original research on Iran’s Hacking Ecosystem and the

second edition of the report with the idea to assist U.S Law Enforcement and the U.S

Intelligence Community on its way to track down and prosecute the cybercriminals behind

these campaigns.

Sample personally identifiable information for Omid Ghaffarinia a.k.a Plus:

Name: Omid Ghaffarinia

Handle: Plus

[redacted]

[redacted] от 2010 г. [redacted]

ЕПИКРИЗА

На Данчо [redacted] Данчев, на 27 години

[redacted]

[redacted]

Повод за настоящата хоспитализация: Постъпва за пръв път
психиатричен стационар и до настоящия момент не е ползва
специализирана психиатрична помощ. Доведен с Преписка на РУ
МВР – Троян.
По данни от родителите промяната в поведението датира о
началото на месец юли, когато заминал да живее сам на квартира
София. През първия месец поддържал ежедневна връзка с тях п
телефона, но след това спрял да се обажда. На позвънявания от тяхн
страна не отговарял или изключвал телефоните си. Това ги притеснило
те започнали да го издирват активно. Получили писмо от хазаина, че д
15.09.10г. трябва да освободят квартирата, а така също и няколк
обаждания за неплатени лизингови вноски за закупен от сина им лаптоп
На посочената дата те отишли в София, където намерили сина си да сп
в квартирата. Отказвал да говори с тях, бил груб и хладен. Събрали м
багажа за да се върнат в Троян, той ги оставил пред квартирата по
предлог, че е зает и заминал някъде с такси. След завръщането в Троя
отказвал да контактува с родителите и с други познати. Затварял се п
цял в стаята си, отказвал да се храни заедно с тях. Напускал дома си бе
да дава обяснения къде ходи и кога ще се върне. Промяната
поведението му била констатирана и от съседи и приятели н
семейството, които Данчо подминавал като напълно непознати. Пр
отправени забележки от страна на Майката „започвал да ягледа лошо"
Навсякъде ходел с преносимия компютър. Гледал телевизия от окол
метър разстояние, заключвал и по няколко пъти проверявал входнат
врата дали е заключена. Непосредствено преди намесата на полицият
започнал да говори несвързано, смесвал спомени от детството с наскор
случили се неща, употребявал много компютърни термини до степен н
неразбираемост.

Dancho Danchev's Disappearance - 2010 - Official Complaint Against Republic of Bulgaria - Part Two (2021-02-27 22:02)

Dear blog readers,

This is a quick note on my current situation in my home town in Troyan Bulgaria where I was originally kidnapped and home molested by three police offers from the local police department

who stole my ID from my place and with no witnesses escorted my and locked me in a room in

another town for a period of several months and injected me on a daily basis without anyone’s

knowledge and with no legal action and legal consequences from anyone including anyone

from Republic of Bulgaria.

Bulgarian name of people involved in my kidnapping and illegal arrest including robbery 5

years later that used to act as local police inspectors in Troyan Police, Bulgaria circa 2010:

Dancho Danchev’s Law Enforcement and OSINT Operation "Uncle George" - An Update

(2021-02-28 08:34)

[1]

Dear blog readers,

I wanted to take the time and effort and elaborate more on some of the current activities

behind my currently ongoing [2]Law Enforcement and OSINT Operation "Uncle George" where

I’ve managed to process and actively crawl approximately 1M of publicly accessible cybercrime

forum community web sites for the purpose of enriching and actually distributing the Data Set

to interested parties with the idea to assist U.S Law Enforcement and the U.S Intelligence

Community on its way to properly respond to track down and prosecute the cybercriminals

behind these campaigns.

The current state of Law Enforcement and OSINT Operation "Uncle George" is that I’ve been

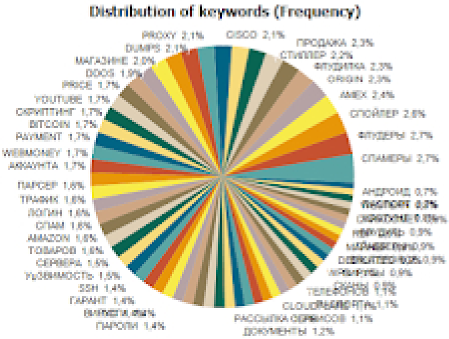
approached by several vendors including independent researchers who expressed interest in

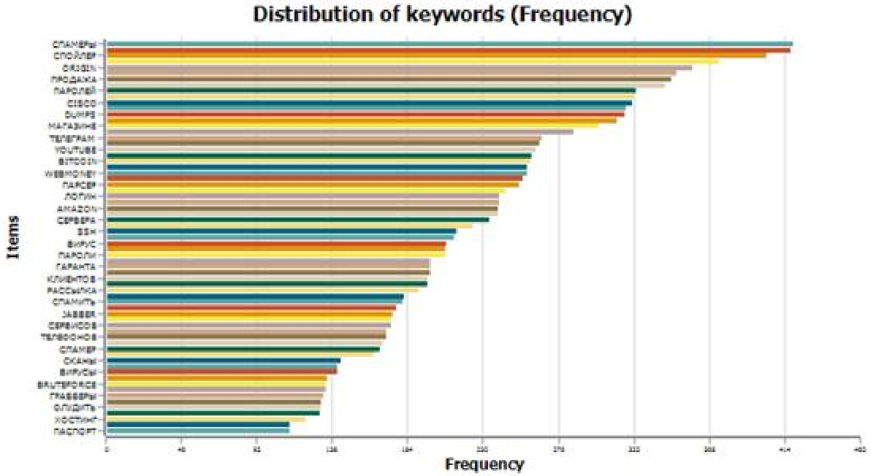
obtaining access to the Data Set for the purpose of data mining and enriching it.

I’ve also decided to share some recently produced graphs which basically represent a decent

portion of popular keywords and topics that cybercriminals are busy discussing on the communities found in the original Law Enforcement and OSINT operation "Uncle George" cybercrime

forum Data Set.





Users organizations and vendors interested in obtaining access to the Cybercrime Forum Data

Set for 2019 can approach me at dancho.danchev@hush.com and I'd be happy to share a copy

for research purposes and the actual enrichment process.

Sample screenshots of active cybercrime research intelligence and clustered words

produced by me while working on my Law Enforcement and OSINT Operation "Uncle

George":

Exposing FBI’s Most Wanted Cybercriminals - Iran’s Mabna Hackers - An OSINT Analysis (2021-03-02 18:37)

[1]

Dear blog readers,

I’ve decided to share some of the actionable intelligence that I have at my disposal regarding the FBI’s Most Wanted Iran-based [2]Mabna Hackers which I originally outlined in my second release of the "[3]A Qualitative and Technical Collection OSINT-Enriched Analysis of the Iranian Hacking Scene Through the Prism of the Infamous Ashiyane Digital Security Team" where you can also obtain a copy of the first release entitled "[4]Assessing The Computer Network Operation (CNO) Capabilities of the Islamic Republic of Iran" in terms of catching up in terms of what Iran-based hackers and hacking groups are up to up to present day with the research report basically representing one of the most comprehensive and in-depth publicly accessible report on Iran’s hacking scene.

Sample screenshots of Mabna Institute including the associated Web sites where the information is offered:

Latest leaks

Dear blog readers,

I wanted to take the time and effort and elaborate more on the so called Guccifer 2.0 enterprise which basically represent a single lone hacker who basically made a high-profile Web site compromise and actually launched a social media account behind it for the purpose of communicating the purpose of attacking and actually making the information publicly accessible online for free.

In this post I'll provide actionable intelligence on the Guccifer 2.0 enterprise which basically represent a single lone hacker that actually distributed a high-profile data leak and build a social media account behind it.

Sample Personal URLs: https://guccifer2.wordpress.com; https://twitter.com/GUCCIFER _2

Sample personal email: Guccifer20@aol.fr

Sample IPs known to have been involved in the campaign: 95.13.15.34; 95.130.9.198;

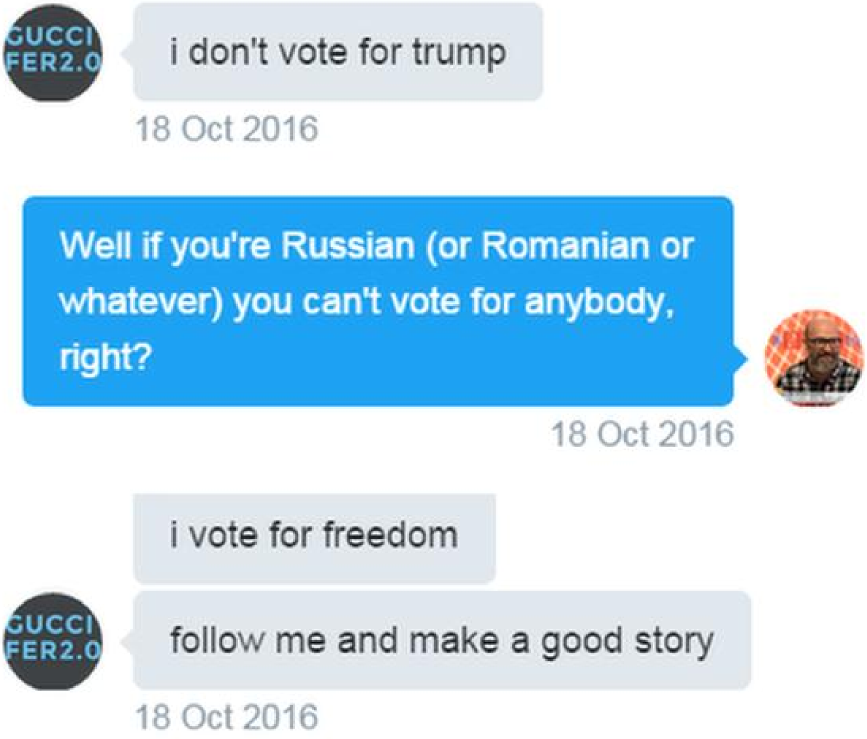
212.117.164.35; 95.211.168.139

Sample VPN service provider which was used by the Guccifer 2.0 enterprise:

hxxp://ns1.vpn-service.us - 176.9.89.229 - Email: sec.service@mail.ru

hxxp://ns2.vpn-service.us - 85.17.139.9

7217



i don't vote for trump

18 Oct 2016

Well if you're Russian (or Romanian or whatever) you can't vote for anybody, right?

18 Oct 2016

i vote for freedom

follow me and make a good story

18 Oct 2016

hxxp://ns3.vpn-service.us - 212.117.164.35

hxxp://ns1.vpn-service.us - 212.32.234.134

hxxp://ns2.vpn-service.us - 37.48.92.139

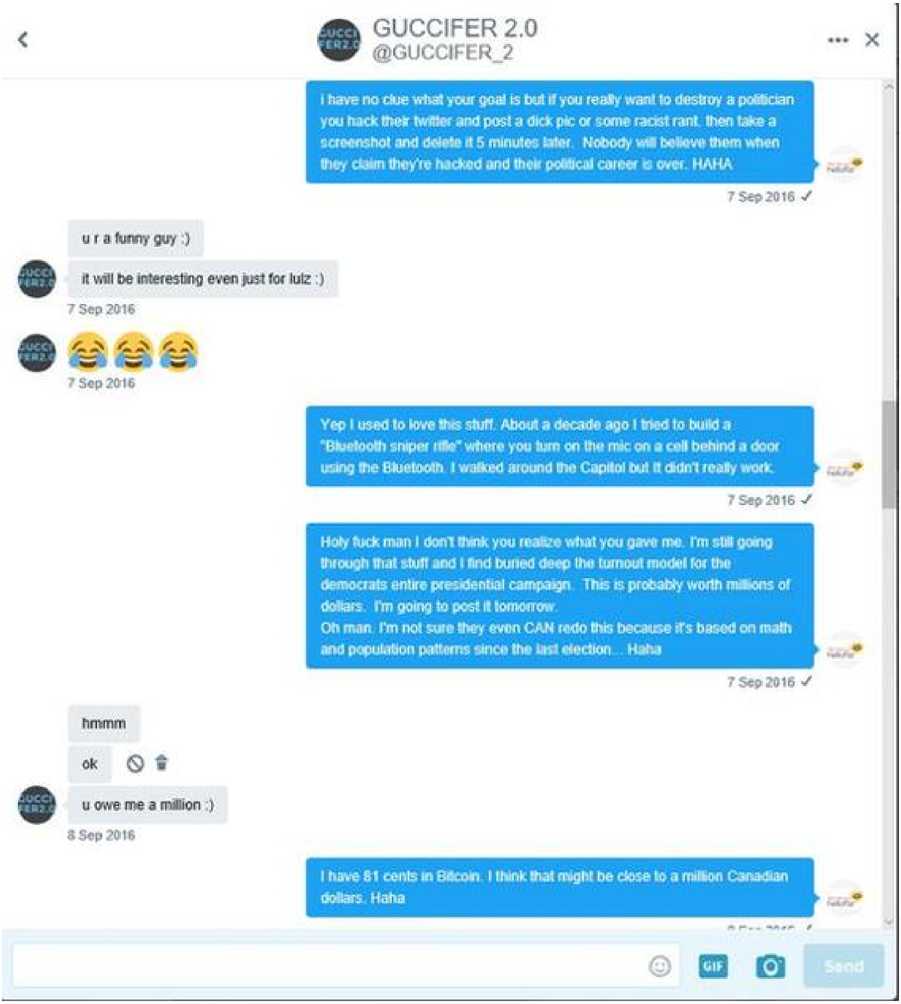
hxxp://ns3.vpn-service.us - 193.161.87.105

Sample screenshots of conversation with the Guccifer 2.0 enterprise:

[2]

[3]

7218



I have no clue what your goal is but if you really want to destroy a politician you hack their twitter and post a dick pic or some racist rant. then take a screenshot and delete it 5 minutes later. Nobody will believe them when they claim they're hacked and their political career is over. HAHA

7 Sep 2016 ✓

u r a funny guy :)

it will be interesting even just for lulz :)

7 Sep 2016

😂😂😂

7 Sep 2016

Yep I used to love this stuff. About a decade ago I tried to build a "Bluetooth sniper rifle" where you turn on the mic on a cell behind a door using the Bluetooth. I walked around the Capitol but it didn't really work.

7 Sep 2016 ✓

Holy fuck man I don't think you realize what you gave me. I'm still going through that stuff and I find buried deep the turnout model for the democrats entire presidential campaign. This is probably worth millions of dollars. I'm going to post it tomorrow.
Oh man. I'm not sure they even CAN redo this because it's based on math and population patterns since the last election... Haha

7 Sep 2016 ✓

hmmm

ok

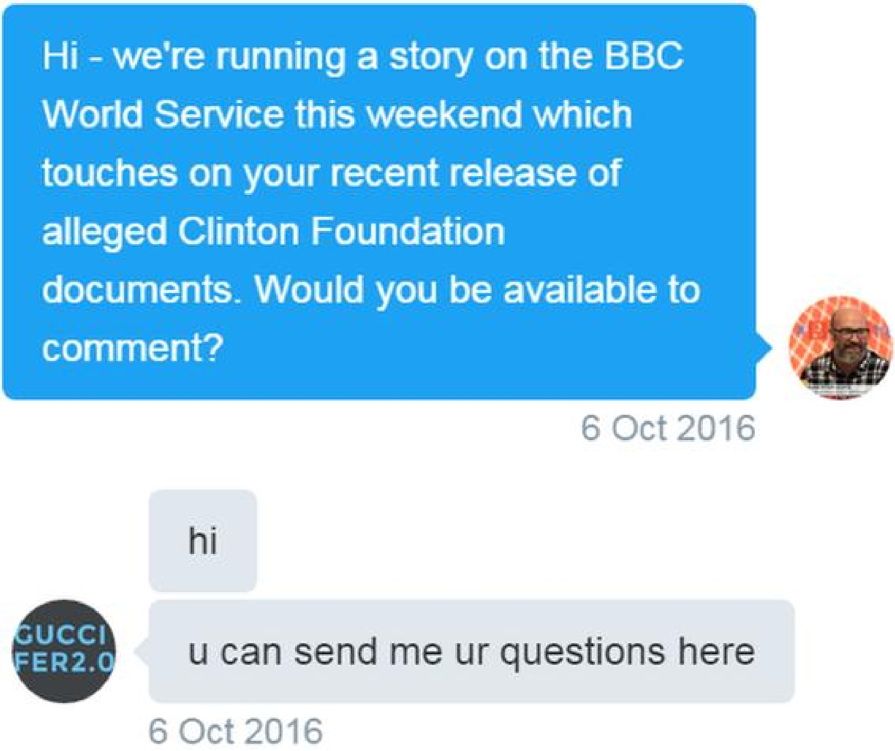
u owe me a million :)

8 Sep 2016

I have 81 cents in Bitcoin. I think that might be close to a million Canadian dollars. Haha

[4]

7219



Hi - we're running a story on the BBC World Service this weekend which touches on your recent release of alleged Clinton Foundation documents. Would you be available to comment?

6 Oct 2016

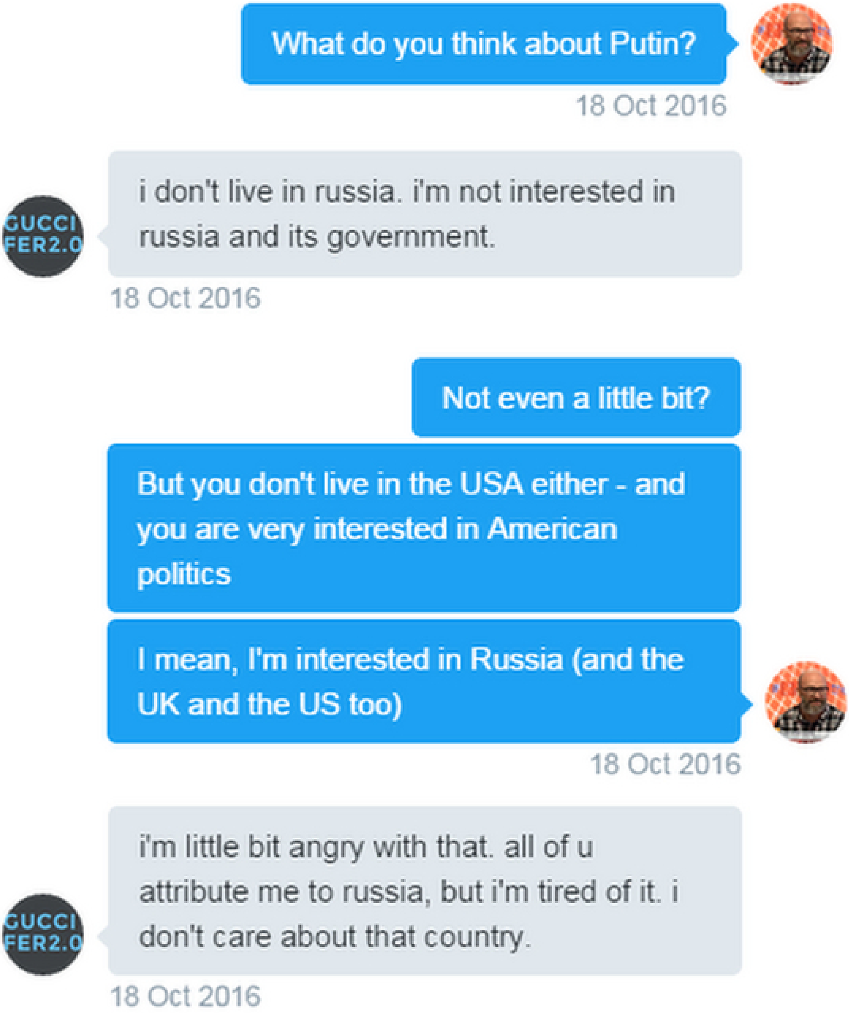
hi

u can send me ur questions here

6 Oct 2016

[5]

7220



What do you think about Putin?

18 Oct 2016

i don't live in russia. i'm not interested in russia and its government.

18 Oct 2016

Not even a little bit?

But you don't live in the USA either - and you are very interested in American politics

I mean, I'm interested in Russia (and the UK and the US too)

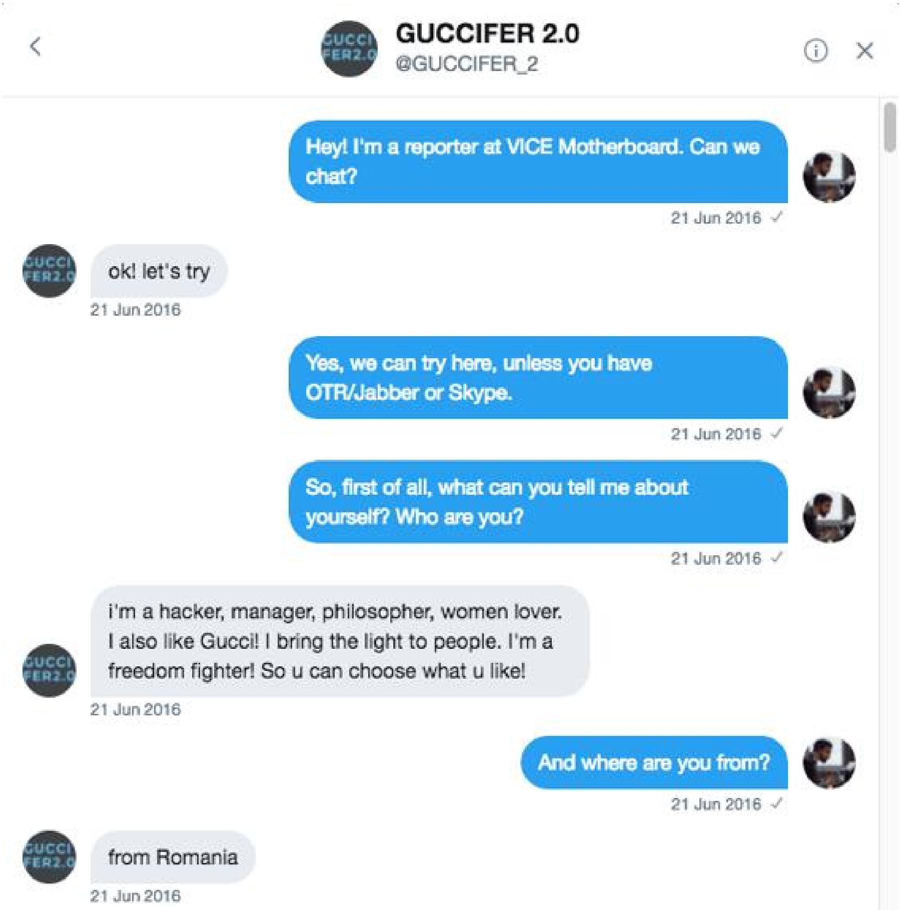
18 Oct 2016

i'm little bit angry with that. all of u attribute me to russia, but i'm tired of it. i don't care about that country.

18 Oct 2016

[6]

7221



Hey! I'm a reporter at VICE Motherboard. Can we chat?

21 Jun 2016 ✓

ok! let's try

21 Jun 2016

Yes, we can try here, unless you have OTR/Jabber or Skype.

21 Jun 2016 ✓

So, first of all, what can you tell me about yourself? Who are you?

21 Jun 2016 ✓

i'm a hacker, manager, philosopher, women lover. I also like Gucci! I bring the light to people. I'm a freedom fighter! So u can choose what u like!

21 Jun 2016

And where are you from?

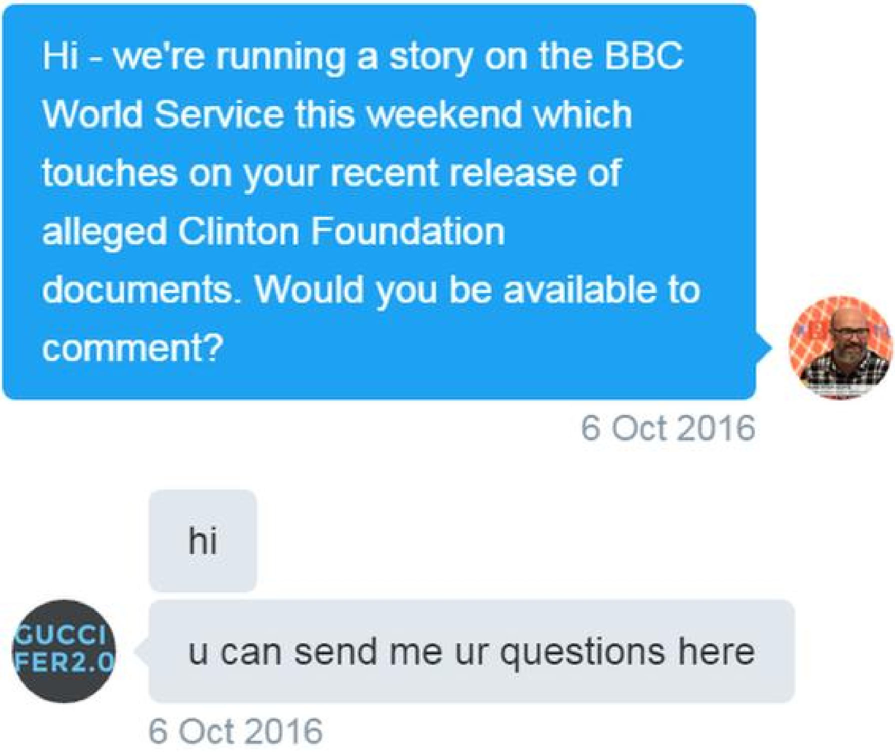
21 Jun 2016 ✓

from Romania

21 Jun 2016

[7]

7222



Hi - we're running a story on the BBC World Service this weekend which touches on your recent release of alleged Clinton Foundation documents. Would you be available to comment?

6 Oct 2016

Exposing FBI’s Most Wanted Cybercriminals - "JabberZeuS" Crew - An OSINT Analysis

(2021-03-03 06:07)

[1]

Dear blog readers,

Continuing the "[2]Exposing FBI’s Most Wanted Cybercriminals" series

I’ve decided to share

some actionable intelligence on the JabberZeuS crew that used to maintain several large bot-

nets in the context of utilizing the popular DIY and leaked ubiquitous botnet generating and C

&C server control malicious software known as ZeuS.

In this post I’ll provide actionable intelligence on the JabberZeuS gang and actually offer an

in-depth peek inside their infrastructure with the idea to assist U.S Law Enforcement and the

U.S Intelligence Community on its way to track down and prosecute the cybercriminals behind

these campaigns.

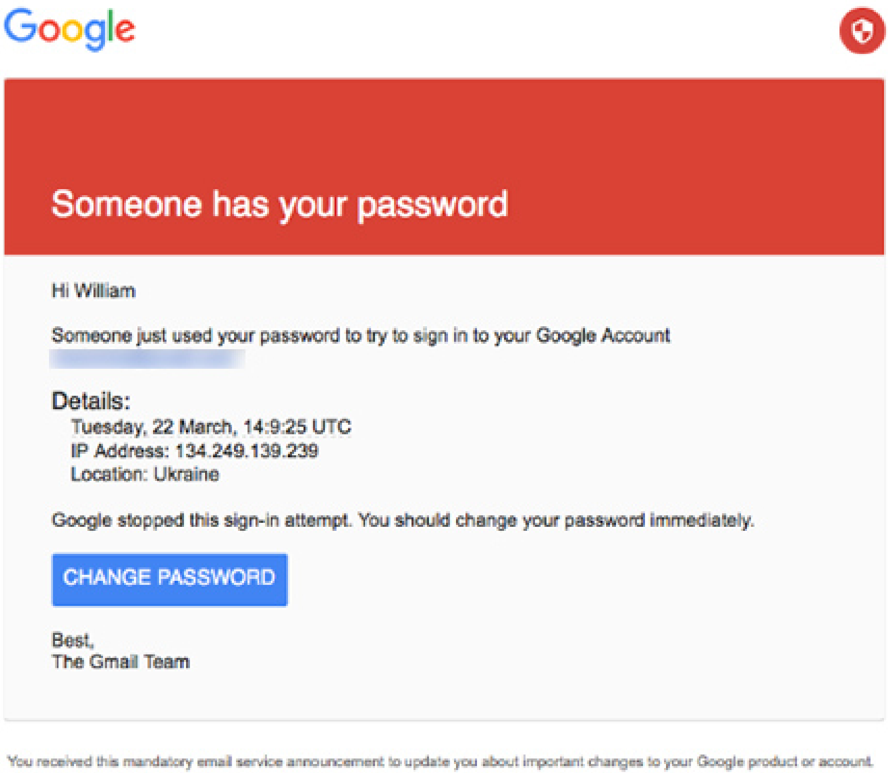
Exposing GRU’s Involvement in U.S Election Interference - 2016 - An OSINT Analysis

(2021-03-05 20:59)

[1]

7293



Someone has your password

Hi William

Someone just used your password to try to sign in to your Google Account
[redacted]

Details:
Tuesday, 22 March, 14:9:25 UTC
IP Address: 134.249.139.239
Location: Ukraine

Google stopped this sign-in attempt. You should change your password immediately.

Best,
The Gmail Team

You received this mandatory email service announcement to update you about important changes to your Google product or account.

Dear blog readers,

Continuing the "[2]FBI’s Most Wanted Cybercriminals" series I’ve decided to share some of the

actionable intelligence that I have on GRU’s involvement in the 2016 U.S Election interference

with the idea to assist U.S Law Enforcement and the U.S Intelligence Community on its way to

track down and prosecute the cybercriminals behind these campaigns.

In this post I’ll share actionable intelligence including an in-depth discussion on the tactics

techniques and procedures of the cybercriminals behind these campaigns.

Sample personal emails involved in the campaign:

Exposing a Currently Active Portfolio of High-Profile Cybercriminal Email Addresses -

Part Four (2021-03-05 20:59)

Dear blog readers,

I've decided to share a recently profiled portfolio of high-profile cybercriminal themed email

addresses with the idea to assist U.S Law Enforcement and the U.S Intelligence Community on

its way to track down and prosecute the cybercriminals behind these campaigns.

Sample emails known to have been involved in the campaign:

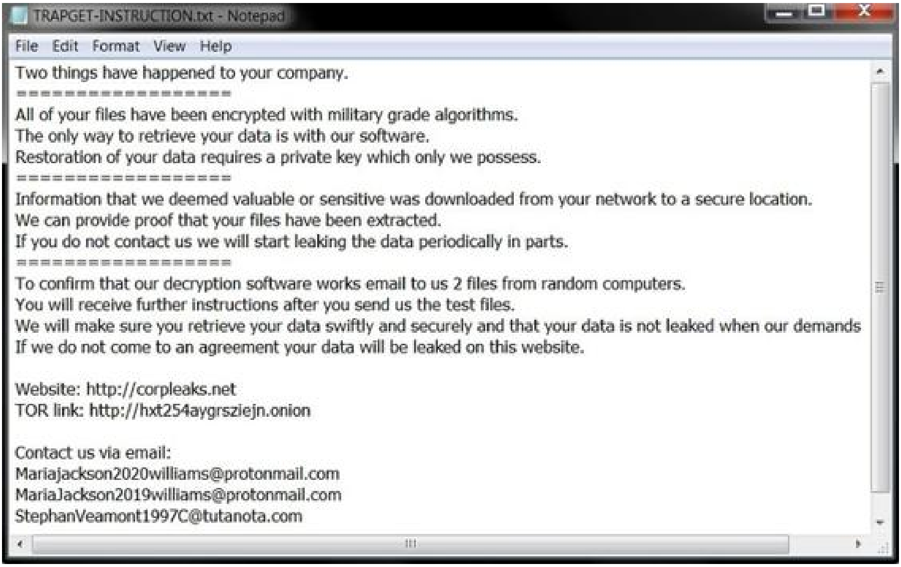
Exposing a Currently Active Portfolio of High-Profile Cybercriminal Email Addresses -

Part Six (2021-03-08 09:52)

[1]

7319



```
Two things have happened to your company.
===================
All of your files have been encrypted with military grade algorithms.
The only way to retrieve your data is with our software.
Restoration of your data requires a private key which only we possess.
===================
Information that we deemed valuable or sensitive was downloaded from your network to a secure location.
We can provide proof that your files have been extracted.
If you do not contact us we will start leaking the data periodically in parts.
===================
To confirm that our decryption software works email to us 2 files from random computers.
You will receive further instructions after you send us the test files.
We will make sure you retrieve your data swiftly and securely and that your data is not leaked when our demands
If we do not come to an agreement your data will be leaked on this website.

Website: http://corpleaks.net
TOR link: http://hxt254aygrsziejn.onion

Contact us via email:
Mariajackson2020williams@protonmail.com
MariaJackson2019williams@protonmail.com
StephanVeamont1997C@tutanota.com
```

Dear blog readers,

Continuing the "Exposing a Currently Active Portfolio of High-Profile Cybercriminal Email Addresses" series I've decided to share yet another batch of currently active high-profile email addresses of high-profile cybercriminals with the idea to assist U.S Law Enforcement and the U.S Intelligence Community on its way to track down and prosecute the cybercriminals behind these campaigns.

Sample personal emails of currently active high-profile cybercriminal email accounts known to have participated in the campaign:

Dear blog readers,

Continuing the "Exposing a Currently Active Portfolio of High-Profile Cybercriminal Email Ad-

dresses" blog post series I’ve decided to share yet another batch of currently active high-profile

cybercriminal email addresses for the purpose of assisting U.S Law Enforcement and the U.S

Intelligence Community on its way to properly track down and prosecute the cybercriminals

behind these campaigns.

Sample personal emails known to have participated in the campaign:

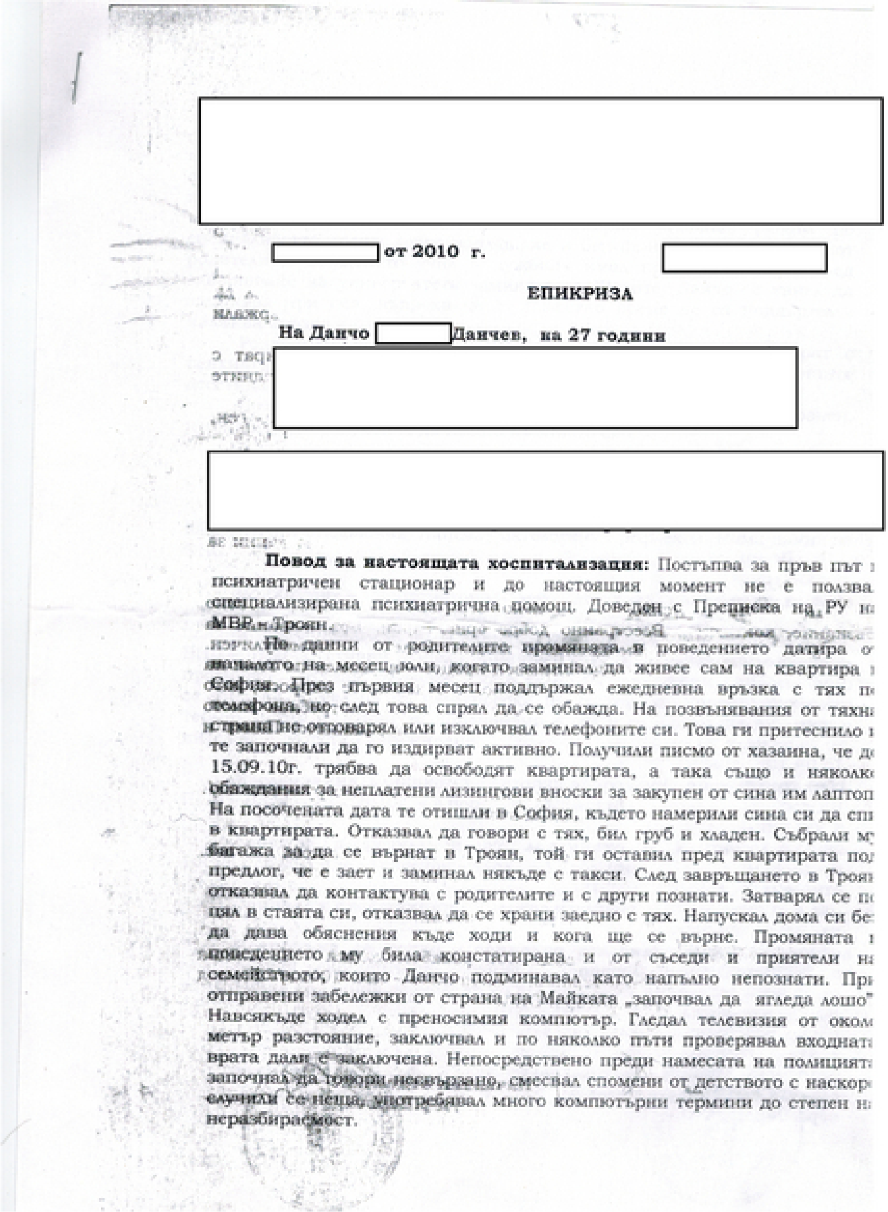
Dancho Danchev's Disappearance - 2010 - Official Complaint Against Republic of Bulgaria - Part Three (2021-03-18 21:47)

[1]

7620



[redacted]

[redacted] от 2010 г. [redacted]

ЕПИКРИЗА

На Данчо [redacted] Данчев, на 27 години

[redacted]

[redacted]

Повод за настоящата хоспитализация: Постъпва за пръв път
психиатричен стационар и до настоящия момент не е ползва
специализирана психиатрична помощ. Доведен с Преписка на РУ
МВР – Троян.
По данни от родителите промяната в поведението датира
началото на месец юли, когато заминал да живее сам на квартира
София. През първия месец поддържал ежедневна връзка с тях
телефона, но след това спрял да се обажда. На позвънявания от тяхн
страна не отговарял или изключвал телефоните си. Това ги притеснило
те започнали да го издирват активно. Получили писмо от хазаина, че д
15.09.10г. трябва да освободят квартирата, а така също и няколк
обаждания за неплатени лизингови вноски за закупен от сина им лаптоп
На посочената дата те отишли в София, където намерили сина си да сп
в квартирата. Отказвал да говори с тях, бил груб и хладен. Събрали м
багажа за да се върнат в Троян, той ги оставил пред квартирата по
предлог, че е зает и заминал някъде с такси. След завръщането в Троя
отказвал да контактува с родителите и с други познати. Затварял се п
цял в стаята си, отказвал да се храни заедно с тях. Напускал дома си бе
да дава обяснения къде ходи и кога ще се върне. Промяната
поведението му била констатирана и от съседи и приятели н
семейството, които Данчо подминавал като напълно непознати. Пр
отправени забележки от страна на Майката „започвал да изглежда лошо"
Навсякъде ходел с преносимия компютър. Гледал телевизия от око
метър разстояние, заключвал и по няколко пъти проверявал входнат
врата дали е заключена. Непосредствено преди намесата на полицият
започнал да говори несвързано, смесвал спомени от детството с наскор
случили се неща, употребявал много компютърни термини до степен н
неразбираемост.

Dear blog readers,

Continuing the "[2]Dancho Danchev's Disappearance - 2010 - Official Complaint Against Republic of Bulgaria" series I've decided to post yet another update on my current situation in my home town Troyan in Bulgaria where I was originally illegally arrested and kidnapped by local

police officers from Troyan Police using a stolen ID from my place with no witnesses and with

force and for holding me hostage for a period of several months with no explanation and no

legal action and injecting me on a daily basis.

Sample personal photo of my second personal kidnapper circa 2010 - Васил Моев Гачевски -

(https://www.facebook.com/profile.php?id=100030506870037):

Exposing a Currently Active Portfolio of High-Profile Cybercriminal Email Addresses -

Part Eight (2021-03-20 02:16)

[1]

7623

Torum
General Discussions

Dear blog readers,

Continuing the "[2]Exposing a Currently Active Portfolio of High-Profile Cybercriminal Email

Addresses" blog post series I’ve decided to share yet another currently active personal email

portfolio of high-profile cybercriminals with the idea to assist U.S Law Enforcement and the

U.S Intelligence Community on its way to track down and prosecute the cybercriminals behind

these campaigns.

Sample personal emails belonging to high-profile cybercriminals that are currently active and

are known to have participated in related cybercrime-friendly campaigns:

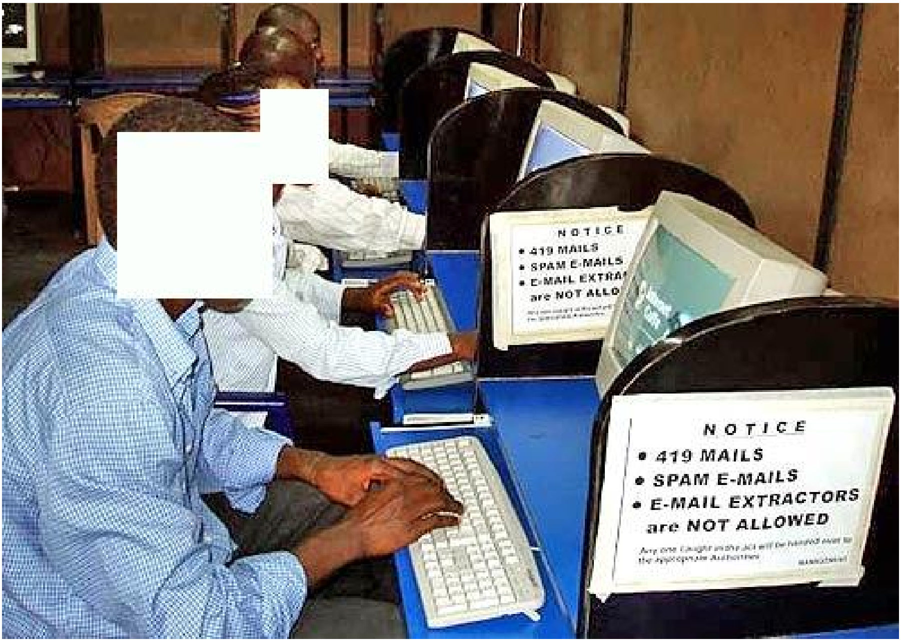
Exposing a Currently Active Portfolio of Personal Email Address Accounts Belonging

to 419 Scammers and Related Scammers - An OSINT Analysis (2021-03-20 02:41)

[1]

7647



Dear blog readers,

I've decided to share yet another currently active portfolio of personal email address accounts

belonging to high-profile and persistent 419 scammers including related scammers with the

idea to assist U.S Law Enforcement including the U.S Intelligence Community on its way to

track down and prosecute the cybercriminals behind these campaigns.

Sample personal emails currently in circulation belonging to high-profile 419 scammers including related scammers include:

Exposing a Currently Active Portfolio of High-Profile Cybercriminal Email Addresses -

Part Nine (2021-03-20 02:53)

Dear blog readers,

I’ve decided to share yet another batch of currently active email address accounts belonging to

high-profile cybercriminals that are currently active part of the "[1]Exposing a Currently Active

Portfolio of High-Profile Cybercriminal Email Addresses" series with the idea to assist U.S Law

Enforcement including the U.S Intelligence Community on its way to track down and prosecute

the cybercriminals behind these campaigns.

Sample personal emails belonging to high-profile cybercriminals that are currently active and

are known to have participated in related fraudulent and malicious campaigns include:

Exposing a Currently Active Portfolio of High-Profile Cybercriminal Email Addresses -

Part Ten (2021-03-20 07:12)

[1]

Dear blog readers,

Continuing the "[2]Exposing a Currently Active Portfolio of High-Profile Cybercriminal Email

Addresses" blog post series I’ve decided to share yet another batch of currently active high-

profile cybercriminal email address accounts with the idea to assist U.S Law Enforcement and

the U.S Intelligence Community on its way to track down and prosecute the cybercriminals

7892

behind these campaigns.

Sample portfolio of currently active personal email address accounts belonging to high-profile

cybercriminals that are currently active include:

Dancho Danchev's Blog Going Private Today! Request Access Now! (2021-03-22 09:21)

Dear blog readers,

This is Dancho. After approximately 12 years of operation and 5.6M page views since December, 2005, I've decided to make my personal blog which is one of the security industry's leading publications with thousands of unique visitors on a daily basis since December, 2005 private with the idea to attract a high-quality and vetted invite-only audience of up to 100 readers for a $100 for one year access to the blog which would greatly allow me to do my research and continue producing high-quality and never-published before type of research and cybercrime

and OSINT including threat intelligence type of analysis and research articles and reports.

Are you interested in obtaining invite-only access to my personal blog? Can you afford to pay

$100 for one year access to my personal blog? Keep reading.

7946

For the $100 amount I can guarantee daily updates of up to 5 or 6 high-quality blog post articles

discussing never-published or discussed before type of cybercrime research including hardcore

technical research and OSINT and threat intelligence type of research and information in the

following areas and categories:

- Targeted Malware Analysis - An Analysis
- In-the-Wild Malware Analysis - An Analysis
- Targeted Phishing Analysis - An Analysis
- Malicious URL Analysis - An Analysis
- Targeted Mobile Malware Analysis - An Analysis
- APT Coverage - New Campaign
- Fraudulent Infrastructure - An Analysis
- Online Fraud Campaign - An Analysis
- Historical OSINT Campaign - An Analysis
- Russian Business Network coverage
- Koobface Botnet coverage
- Kneber Botnet coverage

- Hundreds of IOCs (Indicators of Compromise)

- Tactics Techniques and Procedures In-Depth Coverage

- Malicious and fraudulent infrastructure mapped and exposed

- Malicious and fraudulent Blackhat SEO coverage

- Malicious spam and phishing campaigns

- Malicious and fraudulent scareware campaigns

- Malicious and fraudulent money mule recruitment scams

- Malicious and fraudulent reshipping mule recruitment scams

- Web based mass attack compromise fraudulent and malicious campaigns

- Malicious and fraudulent client-side exploits serving campaigns

Are you interested in continuing to read and go through my research as you were during the

initial opening of this blog since December, 2005 up to present day? I would need the following

information in order to grant access to my personal blog with the idea to resume posting high-

quality and never-published or discussed before type of research and articles as of today.

- An introduction email to my dancho.danchev@hush.com with a brief introduction including

your name and position and the reason why you're interested in obtaining access to my

personal blog for research purposes in an invite-only fashion

Sign in
Register
TFS
THEFRESHSTUFFS
Sign in

- An upfront payment of $100 to my PayPal ID: dancho.danchev@hush.com which guarantees one year free access to my personal blog an up to 5 or 6 high-quality and never-published before type of research articles on a daily basis
- A follow up email to my dancho.danchev@hush.com to confirm that you've send the payment and that you're interested in obtaining access to my personal blog where I'll use your email for the purpose of sending you an invitation and offering you access to my personal blog

Let's make this happen!

Exposing a Currently Active Stolen Credit Cards E-Shop - An OSINT Analysis

(2021-03-25 04:07)

[1]

I've recently came across to a currently active cybercrime-friendly online E-shop for stolen credit cards which basically empowers its customers with the necessary information including

actual stolen and compromised credit cards information for the purpose of allowing them to

obtain access to such type of information and I’ve decided to offer an exclusive peek inside

the inner workings of the E-Shop with the idea to assist U.S Law Enforcement and the U.S

Intelligence Community on its way to track down and prosecute the cybercriminals behind

these campaigns.

Sample screenshots of the cybercrime-friendly E-shop offering access to stolen and

compromised credit cards information:

Current and Future Assessment of U.S U.K and German Cyber Intelligence and Cyber

Surveillance Programs and Tradecraft - An Analysis (2021-03-26 01:41)

[1]

7950

NATIONAL SECURITY AGENCY
UNITED STATES OF AMERICA

Spooked by evil aliens? Did the Klingons did it again? Worry about your latest and very

greatest porn collection leaking online? Thinking about your IP (Intellectual Property) as if it

were U.S National Security? Want to find a meaningful way to contribute to a bigger cause -

The U.S Intelligence community. Keep reading.

In this rather long analysis I'll walk you though all the currently relevant U.S Intelligence

Community Cyber Intelligence and Cyber Surveillance programs in non-alphabetical order

with the idea to provoke a meaningful discussion on current tactics techniques and procedures

courtesy of the U.S Intelligence community how you can protect yourself and most importantly

how the U.S Intelligence community can "perform better" including practical software applications and services solution based recommendations for general users and organizations.

The data in this research has been obtained from [2]**Cryptome.org** the [3]**Snowden archive**

and the [4]**Electrospaces.net** research blog including the **[5] following a**

rchive.

For this purpose of this article I'll discuss the ABSOLINE EPILSON Top Secret and Classified

program and use it as example into how modern cyber surveillance and eavesdropping

courtesy of the U.S Intelligence Community and nation-state including rogue actors works for

the purpose of establishing the foundations for a successful discussion on the basis of which

I'll offer practical and relevant examples on the basics of how you can properly protect yourself

from modern cyber surveillance and eavesdropping campaigns courtesy of nation-state actors

including rogue actors.

7951

Program name:

[6]ABSOLINE EPILSON **-** [7]PDF **-** " This paper describes standard analy-

sis techniques that have been used to both discover iPhone target end point machines and

implant target iPhones directly using the QUANTUM system. It shows that the iPhone Unique

Device Identifier (UDID) can be used for target tracking and can be used to correlate with end point machines and target phone. It highlights the exploits currently available and the CNE process to enable further targeting. "

Current status: The current status of the program is active in terms of possible collerations between iPhone user ID’s including an end user’s end point Internet user activities in terms of traffic and Web site cookie acquisition for the purpose of interception profiling and active monitoring.

How it works: Every mobile has a unique ID? The problem? It tends to "phone back" to a manufacturers infrastructure and can be uniquely attributed to an end user including – possibly – to their end point potentially acting as the "weakest link" potentially exposing and end user’s end point Internet activities to the U.S Intelligence community.

The digitally naughty part: Data colleration on a third-party device for the purpose of exposing the actual infrastructure behind the device including related end-points and related devices associated with the user in question - is nothing new. The digitally naughty part? It can be done - and the mobile device in question – an iPhone – in this particular case can be easily labeled as the "weakest link" in a possible corporate and end user private environment.

How you can make it work better: Shipping and delivery including supply chain infiltration tactics for the purpose of collerating unique mobile device IDs to a specific isn’t new

including possible "purchase-order-to-user-ID" colleration and data infiltration through basic

social engineering and offensive CNO-based tactics. Potentially launching a targeted and

geo-located phishing campaign on a per country city-basis could definitely lead to a positive

results in terms of good old fashioned social engineering campaigns in terms of exfiltrating

the necessary data including mobile device IDs including possible browser-based Web-based

decoys for the purpose of further exposing an end user or an organization’s private network

and the necessary collerated end point devices.

• **Target application-isolation software and service solution providers and owners** - launch-

ing a variety of malicious and fraudulent potentially disruptive type of attack campaigns

should be considered as as option for the purpose of ensuring that the project owner’s

time remains spend on fighting the malicious attacks including the eventual slowing down

of the project development including the project’s eventual shutdown. Possible portfo-

lio of attacks might include online identity discrimination including spear phishing cam-

paigns DDoS attack campaigns including possibly mail-flood attacks including possibly

TDoS (Telephony Denial of Service attacks) against a variety of tailored and predefined

project owner’s contact points.

- **Develop an internal bug-bounty program for sand-boxing and application isolation software and service providers** - crowd-sourcing the bug bounty through public and official channels including the possible outsourcing of the bug hunting process through third-parties while offering the necessary financial incentives might be the best approach to undermine the credibility of the project including the actual owner's credibility and reputation to maintain and operate the project.

7952

- **Aim to wage disruptive warfare against private project owners -** it should be clearly noted that modern Intelligence Agencies have the capacity to wage disruptive warfare against private project and software owners using a variety of means which include a variety of technical and human-oriented online disruption tactics which should be easily considered as a threat to the project and software owner's existence where the appropriate measures to protect their online assets should be taken into consideration
- **Passively measuring and estimating product market-share for Targets of Opportunity** - modern Intelligence Agencies have the potential to easily measure the product or project that also includes the software's market share in an attempt to better position a disruptive campaign targeting the project owner including the software owner in a variety of

ways and positioning the project owner including the actual software owner as a Target of

Opportunity to participate in related mass surveillance and eavesdropping campaigns

How you can take measures to protect yourself: Consider obtaining one of the following

"stripped" mobile devices in terms of hardened mobile OS offering in-depth and multi-layered

security and privacy protection features for the purpose of bypassing wide-spread surveillance

techniques and techniques. Ensuring that you possess a "stripped" mobile device is crucial

for ensuring the necessary degree of personal privacy to stay ahead of current and emerging

Cyber Threats including wide-spread privacy violations courtesy of the U.S Intelligence Com-

munity and various other nation-state and rogue actors including cybercriminals.

On the majority of occasions modern cyber surveillance and eavesdropping campaigns

on passive or active SIGINT which has to do with legal and passive lawful surveillance

techniques which also includes offensive techniques such as for instance direct attempts to

interact with someone’s online infrastructure in place for the purpose of compromising and

obtaining direct access to their digital assets including personal information.

✓	1	27869	tcp	$EXTERNAL_NET	$FILE_DATA_POR...	$HOME_NET	any	BROWSER-PLUGINS HP LoadRunner WriteFileString ActiveX function call

Among the first things that a concerned user should take into place would be to ensure that a proper network security is taking place going beyond your ISP's supplied network router which "definitely" comes with a built-in antivirus and anti-malware solution in place in particular the use of pfSense which offers advanced and market relevant security and IDS/IPS (Intrusion Detection System and Intrusion Prevention System) including build-in sophisticated malicious Web site blocking features which also includes a modern and relevant geolocation-based security solution in place. The same goes for Cisco Firepower ASA which is a highly recommended and market relevant network-based protection including IDS/IPS solution in place. Both devices

are easily adoptable and a cost-effective solution for basic network level protection mechanisms that can greatly assist against widespread nation-state surveillance and eavesdropping

including active computer network exploitation (CNE) attempts.

Among the key benefits of using such type of device would be to ensure that no incoming

traffic is allowed to enter the network using a basic network level access policy which has

the potential to greatly mitigate a huge number of attack campaigns including active network reconnaissance campaigns. The second logical approach would be to utilize publicly accessi-

ble that also included proprietary sources of real-time threat intelligence information for the

purpose of ensuring that current and emerging threats are properly taken care of such as

for instance publicly accessible Web site blocking and URL reputation lists that also included

proactive and reactive solutions as for instance Snort which offers a pretty good coverage of

current and emerging cyber threats that also includes a variety of high-profile and relevant

network-based including DoS (Denial of Service) and network reconnaissance type of threats.

It should be clearly noted that both the public and free instance of Snort offers an in-depth

network-based and sophisticated current and emerging threats type of protection and that the

rule set gets properly updated on a daily basis with relevant signatures for a variety of threats which should be considered as a must use including Cisco's proprietary Snort rule set which also

gets updated on a periodic basis which also includes that use of Cisco's Threat Grid in terms of

offering real-time protection against current and emerging threats including the geolocation-

based firewall which basically allows a user to only allow access to a specific country's online

assets and to also deny access to the majority of countries internationally potentially mitigating

a possible breach and intrusion scenario where an attacker would attempt to phone back and

actually attempt to access the compromised network which is a where a geolocation based

firewall comes into play properly protecting a network and its infrastructure from possible leaks

and malicious software attempting to phone back including possible IP (Intellectual Property)

leaks which could easily allow a nation-state or a sophisticated online to easily map and attempt

to build a bigger picture in terms of a company or an end user's online activity for the purpose

of establishing the foundation for successful and related type of malicious attack campaigns

launched against a specific network or an end user.

Among the basic principles that should drive an individual or an organization that seeks to

protect itself from modern nation-state or rogue actors type of threats should include the use

of community driven and basically commercially free services and products which also include the use of Snort including the use of Cisco's global threat intelligence grid for the purpose of

preventing and responding to modern cyber attack outbreaks including currently active and

live threats.

Yet another highly recommended and extremely relevant in terms of proactive and reactive

protection feature courtesy of Cisco's Firepower ASA appliance is the

Botnet Traffic Filter feature which offers an additional set of botnet traffic mitigation features which basically protects a compromised network from possible data leaks and possible attempts for the malicious software to actually phone back to a rogue and malicious infrastructure.

[12]

For users interested in protecting their mobile device from possible mass surveillance and eavesdropping campaigns there are several scenarios which should be considered such as for instance the use of VPN on a mobile device including actual real-time and email communication which should be properly encrypted using for instance PGP including modern real-time communication protections mechanisms such as for instance the use of XMPP/Jabber’s OMEMO real-time encryption feature including the use of stripped and proprietary mobile devices which greatly mitigate the threat posed by modern mobile malware in the context of using a proprietary operating system which often offers an additional layer of security and privacy for the user.

7957

Recommended "stripped" mobile devices to use potentially preventing widespread surveillance efforts including personal privacy violations:

- [13]"Stripped" mobile device with hardened security and privacy-aware mobile

OS

- [14]"Stripped" mobile device with hardened security and privacy-aware mobile OS 01
- [15]"Stripped" mobile device with hardened security and privacy-aware mobile OS 02
- [16]"Stripped" mobile device with hardened security and privacy-aware mobile OS 03
- [17]"Stripped" mobile device with hardened security and privacy-aware mobile OS 04
- [18]"Stripped" mobile device with hardened security and privacy-aware mobile OS 05
- [19]"Stripped" mobile device with hardened security and privacy-aware mobile OS 06
- [20]"Stripped" mobile device with hardened security and privacy-aware mobile OS 07
- [21]"Stripped" mobile device with hardened security and privacy-aware mobile OS 08
- [22]"Stripped" mobile device with hardened security and privacy-aware mobile OS 09
- [23]"Stripped" mobile device with hardened security and privacy-aware mobile OS 10

The next logical step would be to ensure that the metadata on the device in terms of Web

browsing including possible public and proprietary service use is properly obfuscated. Among

the primary concerns whenever you choose to obfuscate a particular set of data would be

possible supply-chain infiltration on behalf of the U.S Intelligence community in particular pur-

chase orders that would further allow me to collerate and potentially identify a particular end user based on the actual supply-chain infiltration. One of the primary concerns in today's modern Internet world largely dominated by wide-spread surveillance courtesy of the U.S Intelligence Community including rogue and potentially malicious actors including nation-state and cybercriminals is the direct exposing of an individual's private network including possible collerated-based events that could potentially identify and track down a particular individual.

In terms of mobile device obfuscation the end user is largely advised to take advantage of personal firewall for the purpose of monitoring outgoing and incoming connections on the device in particularly blocking all-incoming connections and closely monitoring outgoing connections.

Furthermore, what an end user can potentially do in terms of hardening their mobile device is to ensure that it does not leak back any internal IP addresses including possibly the device MAC address potentially exposing the device user's internal and private network potentially falling victim to " **[24] ABSOLINE EPILSON**" type of end point and mobile device targeting type of attacks and campaigns courtesy of the U.S Intelligence Community including other rogue factors including nation-state actors and cybercriminals in general. How you should proceed in order to archive this process? Keep reading.

Security Levels

Emergency Level
Stops all network activity for the interface

High Security Level
All packets for this interface are blocked by default (allow filter rules override this level)

3rd Level Stealth Security
Locally established connections are allowed by default (IP address, protocol and port based security)

2nd Level Stealth Security
Locally established connections are allowed by default (IP address and protocol based security)

1st Level Stealth Security (recommended)
Locally established connection are allowed by default (IP address based security)

Low Security Level
Pass all packets which are not forbidden to pass explicitly

Traffic history (current max rate: 556061 B/sec)

Next to the general use of "stripped" mobile devices end users should also consider the follow-

ing highly recommended tactics techniques and procedures for the purpose of protecting their

IP (Intellectual Property) including their mobile device and end point device's confidentiality

availability and integrity:

• **WebCRT -** Among the most common privacy-exposing scenarios in terms of " **[25] ABSO-**

LINE EPILSON" remains the active utilization of unsecure browsing habits namely a mis-

configured browser in terms or browser extension including the newly introduced "local IP

exposing" WebCRT feature found in a variety of browsers. What should end users better

do to protect their local IP including adding additional privacy and security features to

their browser? Keep reading. The first thing a user should ensure from a network-based perspective is that their browser fingerprint remains as private as possible including the inability of the U.S Intelligence Community.

- **Personal Host Based Firewall** - the first thing to look for in a personal firewall is a bi-directional firewall functionality allowing you to block all incoming traffic and successfully allowing you to allow all ongoing traffic based on a variety of rules including possible white-listing. The next logical step would be to implement basic ARP-spoofing prevention solution for the purpose of ensuring that your ISP including VPN provider cannot perform basic ARP-spoofing attack campaigns which could compromise the confidentiality of the targeted host and expose to it a multitude of network-based attack deception attack campaigns.

[26]

- **HIPS-based firewall -** a decent and highly recommended solution to protect end points from malicious software including web-based client-side exploits who might attempt to

drop malicious software on the affected hosts include the use of host-based intrusion

prevention system which has the potential to stop a wide variety of threats that have the

potential to expose an end point to a multi-tude of malicious software such as for instance

the use of [27]Comodo Firewall which is a highly relevant and recommended solution for

a huge number of end points in terms of offering advanced and sophisticated malware

protection mechanisms.

- **Basic Network Deception -** it should be clearly noted that every network is a subject

to possibly compromise including automated and targeted attacks which could be easily

prevented and actually allow a network operator or a network user to gather the necessary

cyber attack information which could easily offer an in-depth peek inside the activities of

the cyber attacker in particular the type of information that they're interested in obtaining.

Case in point would be the use of a proprietary network-based deception appliance such

as for instance [28]Thinkst Canary including the use of the [29]Nova Network Deception

Appliance which empowers a network operator with a sophisticated network deception

techniques which allows them to trick a cyber attacker into falling victim into a rogue

network-based assets with the actual network operator in a perfect position to gather

intelligence on the real intentions of the cyber attacker while properly protecting their

infrastructure from malicious attackers

[30]

• **Custom-Based DNS-based DNSSEC-based servers with no logs policy** - worry about the

U.S Intelligence Community and your ISP eavesdropping on your traffic and Web browsing history potentially launching man-in-the-middle attacks? Consider utilizing basic free

privacy-conscious DNS service provider with DNSSEC-enabled no-logs policy such as for in-

stance - **[31] DNS Watch** - which you can freely use without worry that your Web browsing

history and DNS request history will be logged and potentially abused. A possible logi-

cal recommendation in the context of improving an end-point's in-depth security strategy

might be the utilization of the so called protective DNS which offers an in-depth protection

techniques and is often available online for free. Case in point is the use of [32]Cisco's

Umbrella solution which offers an in-depth protection mechanism and is available to end

users and organizations online for free.

[33]

Windows-based users should definitely consider using and learning how to use the **[34] Ad-**

vanced Tor Router application which basically offers a diverse set of unique privacy-enhancing

and privacy-preserving featuring while utilizing the Tor Network further ensuring and offering

a free solution for end users interested in preserving their Web browsing activities including

possible network-wide Tor Network adoption on per OS and on per application-based basis.

What does this application has to offer in terms of unique privacy-preserving features? Basi-

cally it offers a variety of unique and never presented or discussed before type of Tor-Network

and end-point privacy-enhancing or preserving features further ensuring that the end user

will remain properly protected from sophisticated network-based and client-based type of

attack campaigns potentially aiming to identify and expose their identity.

What's worth

emphasizing on in terms of the application is the unique set of privacy-preserving and ori-

ented client-side feature in terms of possibly privacy-oriented and secure browsing experience.

[35]

- **Anti-forensics** - it used to be a moment in time when users were primarily concerned with their browsing habits and use of online resources which is where specific browsers that don't log anything on the hard drive come into play. A possible solution and recommendation here include the use of the [36]Sphere anti-forensics browser which doesn't log anything on the hard drive and should be considered as a decent anti-forensics solution for anyone who's interested.

- **VeraCrypt containers** - a proper full-disk encryption solution should be taken into consideration in case the user wants to protect their information and intellectual property from physical type of attacks that also includes the use of Virtual Desktops with built-in security and privacy mechanisms in place such as for instance the use of [37]Comodo Secure Desktop
- **Application isolation** - it should be clearly noted that a modern and in-depth defense strategy should include the use of application sandboxing solutions which has the potential to prevent a huge number of client-side based exploitation attempts including to actually protect an end user from a variety of Web based client-side exploits serving threats such as for instance the use of [38]Sandboxie which is a free solution that actually works and has the potential to prevent a huge number of Web based threats that expose users to a variety of threats

7962

- **Hardware-Based Isolation** - a proper network based strategy should consist of a basic hardware-isolation methodology where for instance malicious attackers would have hard time trying to penetrate and compromise due an additional level of hardware-isolation applied methodologies and techniques

- **Whitelisting** - although this approach has been widely discussed throughout the years it should be clearly noted that modern anti-malware solutions should be also providing a possible application whitelisting feature where users should only whitelist a basic application which would allow them to still perform their activities and basically block and prevent and execution of related applications

Sample tips for the purpose of ensuring a proper and secure installation of end-point security solutions include:

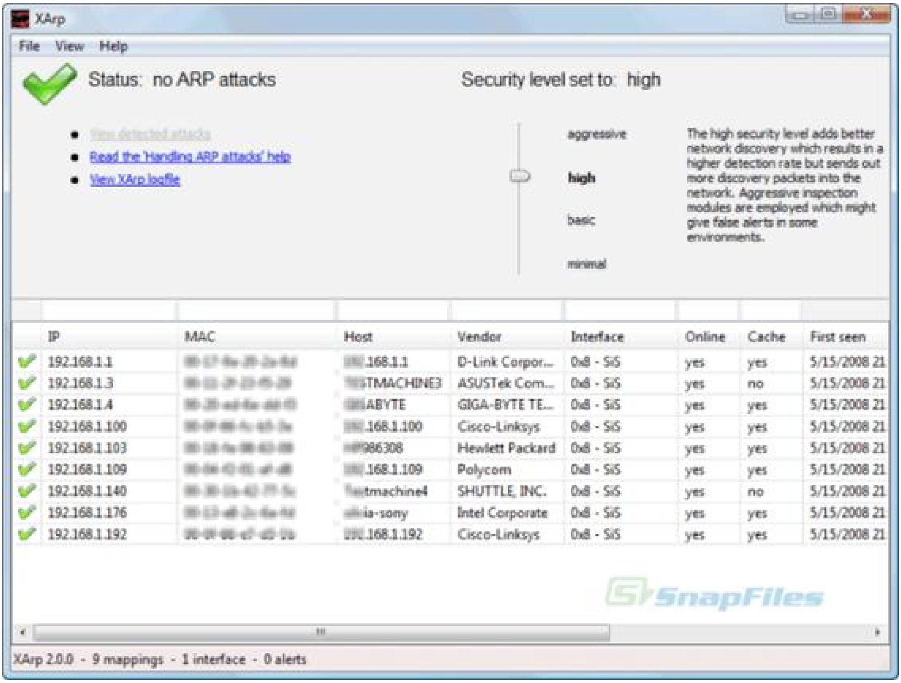
- always password-protect your end-point software including possibly ensuring that the end-point security software can self-protect from having it shut down
- always ensure that a manual update is properly taking place compared to automatic updates which leaves a window of opportunity for a possible network traffic colleration including possibly rogue and bogus update entering your network
- ensure that you’re not utilizing the cloud-database feature for the purpose of looking up your Web browsing history including possible host-based application execution which could lead to a possible data and end-point inventory colleration which basically leaves you with a properly secured "stripped" security solution that you can use to properly secure your end-point without the risk of having your Web browsing history exposes includ-

ing your end-point application inventory which could lead to possible fingerprinting and

inventory-mapping which could lead to possible targeted attacks

[39]

7963



Status: no ARP attacks

Security level set to: high

- View detected attacks
- Read the 'Handling ARP attacks' help
- View XArp logfile

The high security level adds better network discovery which results in a higher detection rate but sends out more discovery packets into the network. Aggressive inspection modules are employed which might give false alerts in some environments.

XArp 2.0.0 - 9 mappings - 1 interface - 0 alerts

What would be an appropriate choice for a VPN-provider basically offering the necessary peace

of mind in terms of network-based connectivity with privacy-enabled solutions in mind in terms

of possible no-logs policy including related value-added features further enhancing the neces-

sary privacy-based no-logs policy in today's modern Internet World with widespread surveil-

lance and privacy-violations courtesy of the U.S Intelligence Community and various other

rogue actors including nation-state and cybercriminals in general? Keep reading.

The next logical step would be to stay away from mainstream mobile devices citing potential

Security and Privacy in mind including the use of a properly selected VPN service provider for

the purpose of applying basic traffic obfuscation techniques including end-point network isola-

tion in this particual context the end user and the organization should definitely look forward

to implement a possible VPN provider actually "mixing" public legitimate jurisdiction-aware

infrastructure with privacy-aware public or proprietary network technology - in this particular

case VPN2Tor type of technology.

Mainstream VPN provider as an entry point to a proprietary hardened and privacy-features

tailored network - such as for instance the Tor network - NordVPN is a highly recommended

solution against "ABSOLINE EPILSON" type of end-point colleration-based targeting type

of attacks. What do I have in mind? Basically the off-the-shelf commercial vendor is also

currently capable of offering VPN2Tor type of access which basically offers a variety of privacy-

enhancing features which basically can offer stealth and commercially-relevant solution which

basically combines VPN functionality with access to the Tor Network which basically offers

a high-degree of security and anonymity which can be used to protect against "ABSOLINE

EPILSON" type of attacks in terms of traffic and geographical location deniability including possibly offering limited data-colleration capabilities on behalf of U.S Intelligence Agencies.

[40]

A proprietary off-the-shelf VPN service provider basically taking you a step higher in preserving your online privacy by introducing and actually providing a unique set of no-logs

jurisdiction-aware type of encryption-protocols and basic traffic-mixing tactics and strategies -

[41]Cryptohippie.

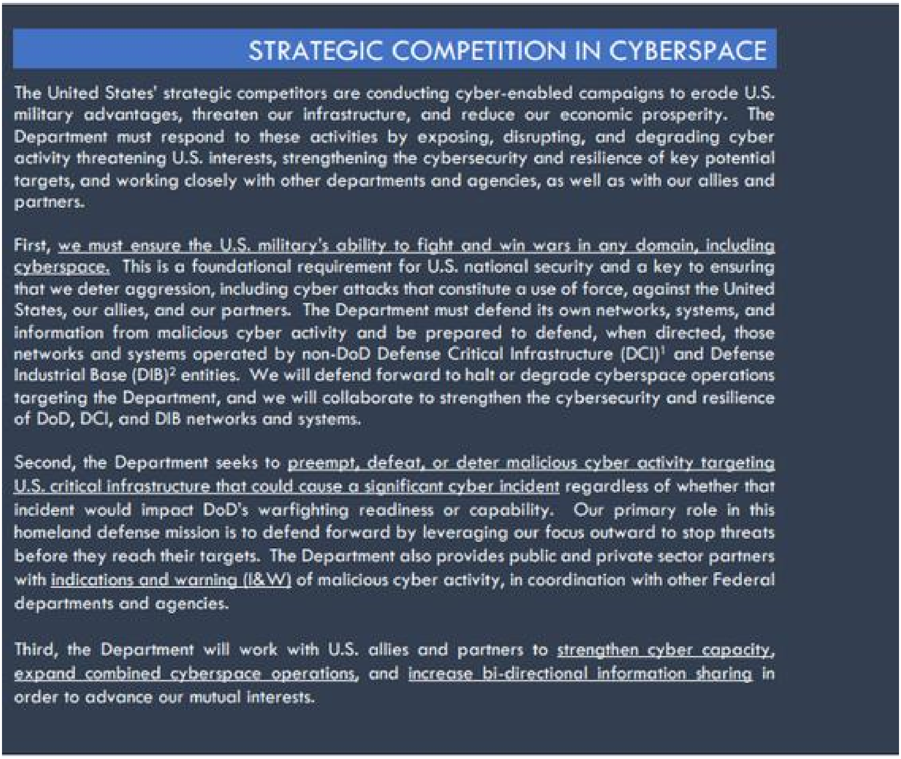
Sock Puppetry - Exposing Foreign Influence Operations or the Basics of Information

Warfare Operations - An Analysis (2021-03-27 01:16)

DoD's Cyber Strategy for 2018 - An Analysis (2021-03-28 21:52)

[1]

7966



STRATEGIC COMPETITION IN CYBERSPACE

The United States' strategic competitors are conducting cyber-enabled campaigns to erode U.S. military advantages, threaten our infrastructure, and reduce our economic prosperity. The Department must respond to these activities by exposing, disrupting, and degrading cyber activity threatening U.S. interests, strengthening the cybersecurity and resilience of key potential targets, and working closely with other departments and agencies, as well as with our allies and partners.

First, we must ensure the U.S. military's ability to fight and win wars in any domain, including cyberspace. This is a foundational requirement for U.S. national security and a key to ensuring that we deter aggression, including cyber attacks that constitute a use of force, against the United States, our allies, and our partners. The Department must defend its own networks, systems, and information from malicious cyber activity and be prepared to defend, when directed, those networks and systems operated by non-DoD Defense Critical Infrastructure (DCI)[1] and Defense Industrial Base (DIB)[2] entities. We will defend forward to halt or degrade cyberspace operations targeting the Department, and we will collaborate to strengthen the cybersecurity and resilience of DoD, DCI, and DIB networks and systems.

Second, the Department seeks to preempt, defeat, or deter malicious cyber activity targeting U.S. critical infrastructure that could cause a significant cyber incident regardless of whether that incident would impact DoD's warfighting readiness or capability. Our primary role in this homeland defense mission is to defend forward by leveraging our focus outward to stop threats before they reach their targets. The Department also provides public and private sector partners with indications and warning (I&W) of malicious cyber activity, in coordination with other Federal departments and agencies.

Third, the Department will work with U.S. allies and partners to strengthen cyber capacity, expand combined cyberspace operations, and increase bi-directional information sharing in order to advance our mutual interests.

Going through the latest [2]DoD Cyber Strategy for 2018 it should be clearly noted that

several key new developments are continuing to take place which are worth discussing in

the broader context of real-time cyber threat intelligence cyber attack attribution and cyber

attack prevention mechanism which today are taking place primarily courtesy of the U.S DoD

the NSA and the U.S Cyber Command.

In this post I'll discuss a newly emerged trend which is called "forward defense" where U.S based

cyber warriors will actually bother to proactively respond to and prevent current and emerging

cyber attacks by scouting foreign networks including foreign influence and information opera-

tion campaigns that also includes the use of botnets and cyber espionage type of campaigns

to further protect U.S critical infrastructure from current and emerging cyber threats.

While the majority of the cyber threat intelligence work in the U.S is done by the commercial

sector the U.S Cyber Command continues to actively apply basic U.S DoD military methodology

including near real-time information sharing initiatives for the purpose of demonstrating the

key operational capability in the context of targeting the online infrastructure that also includes

to actively respond to information warfare including foreign influence operations.

Key summary points to consider:

- **Information Warfare is making its way into the White House official Cyberspace strategy document** - I've already discussed this unique trend in a related article which you can check out [3]here - which undoubtedly sets a unique precedent where we have the White House directly interfering with basic military concepts such as for instance information warfare and information operations that also includes the use of foreign influence operations which further empowers the U.S DoD and the NSA with unique capabilities to respond to these type of campaigns possibly directly interfering with Russia's information warfare concepts which believe it or not in another world are directly copied from publicly accessible U.S DoD and NSA publicly accessible papers throughout the years. In terms of information warfare operations that also includes foreign influence operations this is a dangerous game to play which may inevitably lead to actually catching some high-profile information warfare operations or eventually KGB or Russia's FSB operators which goes far beyond the usual duties of the U.S Cyber Command the U.S DoD and the NSA in general which has to do with far more high-profile cyber threats that also includes cyber warfare campaigns and possible direct threats against U.S critical infrastructure

- **Foreign influence operations** - it still remains unclear as to the extend of this basic misconception which basically relies on the use of social media or the so called rogue and bogus content farms which are pretty similar to high-profile and relevant cybercrime-friendly blackhat SEO (search engine optimization) campaigns in the context of traffic acquisition and traffic hijacking which basically has nothing to do with Russia's active measures in Cyberspace which is a dangerous word to play with in particular in the context of having the U.S Cyber Command the U.S DoD and the NSA hunt down and track down foreign influence operations. It should be also clearly noted that a direct response should be issues on a systematic and persistent basis which basically represents the U.S Cyber Command and the U.S DoD including the NSA's basic principles and mode of operation where the virtual assets of a specific foreign influence operator can either can directly exposed or shut down or actually a direct DoS (Denial of Service) launched against them which shouldn't be surprising in the broader context of fighting cybercrime and responding to cyber warfare incidents and campaigns online

- **Sock puppetry and foreign influence operations** - yet another dangerous word which should be used with caution remains the use of "sock puppets" which are basically foreign influence operators positioned by the U.S Cyber Command the U.S DoD and the NSA as a possible National Security risk which should be properly monitored and actions taken against it in one form or another in particular a direct attempt to expose the operator behind the rogue and bogus content farm including to actually attempt to launch a DoS

(Denial of Service) attacks against their infrastructure

Stay tuned!

The "Russia Small Group" - A Step in the Right Direction or a Dangerous Game to Play With? (2021-03-29 10:01)

[1]

7968

U.S. CYBER COMMAND
NATIONAL SECURITY AGENCY
CENTRAL SECURITY SERVICE

It has recently came clear that the U.S DoD in direct cooperation with the NSA have been

busy working on the so called "[2]Russia Small Group" which aims to analyze and properly

respond to the growing threat of foreign influence operations launched and courtesy of Russia

that also includes basically anything related to Russia in the world of information and cyber

warfare including possibly botnet and malicious software attack campaigns including to further

protect the [3]U.S Elections from current and emerging cyber threats that also includes foreign

influence operations launched or courtesy by Russia Iran or China.

Among the key factors that should be considered when establishing a proper "Russia Small

Group" would eventually consist of monitoring for foreign influence operations and actually

establishing the foundation for a proper proactive and active Technical Collection that also

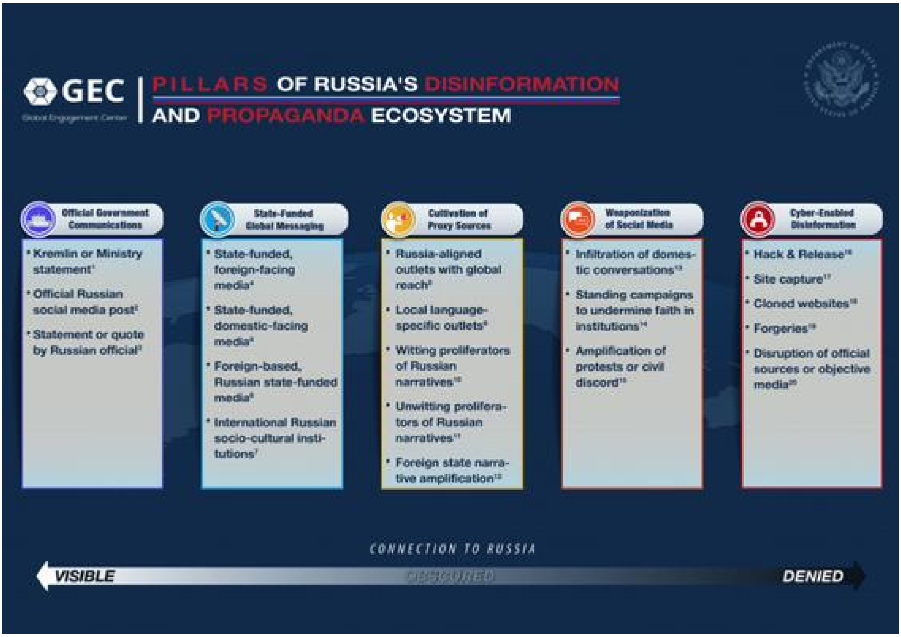
includes 4th party collection initiative for the purpose of establishing the foundations for a

successful proactive and reactive response to the growing threat posed by Russia that also

includes the good old fashioned cybercriminals threat that usually goes beyond the usual

GRU-themed malware and cyber espionage type of campaigns.

[4]



PILLARS OF RUSSIA'S DISINFORMATION AND PROPAGANDA ECOSYSTEM

Official Government Communications

- Kremlin or Ministry statement[1]
- Official Russian social media post[2]
- Statement or quote by Russian official[3]

State-Funded Global Messaging

- State-funded, foreign-facing media[4]
- State-funded, domestic-facing media[5]
- Foreign-based, Russian state-funded media[6]
- International Russian socio-cultural institutions[7]

Cultivation of Proxy Sources

- Russia-aligned outlets with global reach[8]
- Local language-specific outlets[9]
- Witting proliferators of Russian narratives[10]
- Unwitting proliferators of Russian narratives[11]
- Foreign state narrative amplification[12]

Weaponization of Social Media

- Infiltration of domestic conversations[13]
- Standing campaigns to undermine faith in institutions[14]
- Amplification of protests or civil discord[15]

Cyber-Enabled Disinformation

- Hack & Release[16]
- Site capture[17]
- Cloned websites[18]
- Forgeries[19]
- Disruption of official sources or objective media[20]

CONNECTION TO RUSSIA

VISIBLE — OBSCURED — DENIED

The currently ongoing misunderstanding that Russia is actively utilizing active measures in

cyberspace and the fact that information warfare operations are clearly making its way into

the White House Cyberspace strategy should be considered a precedent which despite the fact

that will clearly boost the funding and investment in the industrial military complex in particular

cyber threat intelligence and foreign influence detection campaigns to actually boost the U.S

Cyber Command and NSA’s budget in an attempt to respond to the threat posed by Russia in

cyberspace the use of information warfare and information operations in cyberspace that also

includes foreign influence operations in the form of active measures should be considered and

properly analyzed with caution as it blurs the lines between cyber warfare information warfare information operations and the newly emerged term called foreign influence operations which

from the perspective of cybercrime research should be considered a basic rogue and bogus

content farm which is capable of acquiring traffic and hijacking traffic using basic blackhat SEO

(search engine optimization) techniques.

It used to be a moment in time when Russia and China were actively busy playing copycats

from publicly obtainable and accessible U.S DoD and U.S Intelligence Community online docu-

mentation and material which basically helped them shape their modern information warfare

and cyber warfare doctrines if any. The rest remains cybercrime as usual.

Stay tuned!

Exposing the "KGB Hack" a.k.a Operation EQUALIZER - An OSINT Analysis

(2021-03-30 09:47)

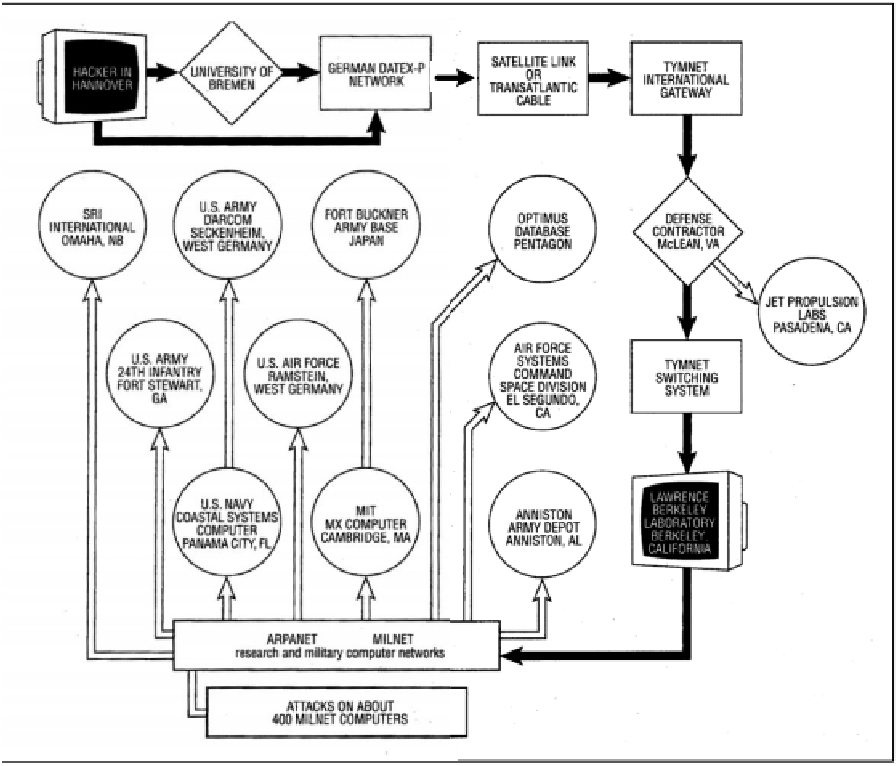
Have you ever heard of [1]Project RAHAB or [2]Operation EQUALIZER also known as the first

instance of cyber espionage in the form of having German citizens compromise U.S based net-

works to actually supply the information to the KGB? Keep reading. In this post I’ll provide actionable intelligence and I’ll discuss in-depth the infamous "KGB Hack" and include an in-depth and never discussed perspective on how Germany’s Intelligence Services at the time began outsourcing their cyber espionage needs to third-parties in particular the production of viruses at the time. What is Project RAHAB? Project RAHAB was among the first international campaign to utilize hackers for cyber espionage including possible disruptive activities internationally courtesy of Germany’s Intelligence Service largely relying on public sources of information in particular Germany’s Chaos Club that was widely known to have been working with and consisting of hackers which later on matured into a separate project called Operation EQUALIZER which aims to supply the KGB with cyber espionage secrets by compromising U.S based government and proprietary networks with the group consisting of German hackers who successfully managed to compromise the networks but eventually got caught which led to the first known case of cyber espionage with German hackers supplying information and U.S government secrets to the KGB.

An [3]excerpt:

" *The Germans appear to have taken their cue from the success of such amateur hacker groups as the "Chaos Club" and the "Hannover Hackers" that worked with the KGB. According* *to Schweizer, the Germans created "Project Rahab," named after the biblical character who helped the Israelites infiltrate Jericho, in the mid 1980s to develop a "professional" hacking capability. The project was developed by the Bundes Nacrichten Dienst's (BND) Christian Stoessel, who wrote the initial "point paper" proposing hacking into foreign data bases for intelligence purposes. The project was joint effort between BND's Division I (HUMINT), Division II (SIGINT) and Division IV (HQ). In addition to the intelligence professionals, other technical experts from a variety of outside institutions were recruited, resulting in a staff of*



HACKER IN HANNOVER

U.S. NAVY COASTAL SYSTEMS COMPUTER PANAMA CITY, FL
MIT MX COMPUTER CAMBRIDGE, MA
ANNISTON ARMY DEPOT ANNISTON, AL
LAWRENCE BERKELEY LABORATORY BERKELEY, CALIFORNIA
ARPANET MILNET research and military computer networks
ATTACKS ON ABOUT 400 MILNET COMPUTERS

approximately 70 people. While focused initially on retrieving information, the Project Rahab

staff soon turned to offensive measures that could be of use in a time of conflict, including a

variety of viruses that could be inserted in to target computers. Schweizer claims that the

Project has "accessed computer systems in the Soviet Union, Japan, France, the United

States, Italy, and Great Britain,"67 Included in the "hacks" of the Rahab staff is penetration of

the SWIFT network, a dedicated international banking network that carries there majority of

worldwide bank transfers. The implications of this information falling into terrorist hands are

clear. "

Including the following [4]excerpt:

[5]

"Bulgaria has been a "breeding ground" for computer viruses during and after Communist rule.

In the early 1990s, the Bulgarians had developed thirty unique viruses with more than 100 different variations and were releasing them at a rate of one per week.60 The "Hannover hackers"

of Cuckoo's Egg fame also identify the Bulgarians as active in computer intelligence. Madsen

7972

cites the National Intelligence Service (foreign and domestic intelligence), and Razuznavatelno Upravleniye na Ministerstvoto (RUMNO) (Military intelligence) as the Bulgarian intelligence organizations most likely to be involved in computer intelligence gathering.[61] It has also been rumored that a new "virus library" that allows anyone, not just a skilled programmer, to write a virus by "picking and choosing" among several options was first developed in Bulgaria. This system has the potential to produce thousands of new viruses to be unleashed at random or specific targets. A cyberterrorist bent on bringing a system down could single-handily generate a flood of viruses to infect the targeted computer. Even if virus detection software was installed, the chances are good that a virus could be created to evade detection."

ПРОФЕСИОНАЛЕН ПЕРСОНАЛЕН КОМПЮТЪР ИЗОТ 1036С

ИЗОТ 1036С е шестнадесетразреден професионален персонален компютър, предназначен за масово използуване в научноизследователски и инженерно-внедрителски организации, висши учебни заведения, учреждения

Базовата конфигурация на **ИЗОТ 1036С** се състои от централно устройство, два **ЗУГМД** ЕС5088М1, клавиатура, графичен монитор **ИЗОТ 7301С** и мозайково печатащо устройство **ИЗОТ 6305С**.

Програмното осигуряване на **ИЗОТ 1036С** използува дискова операционна система **ДОС ПК** или операционна система **МИКРОС—86**. То предоставя на потребителя следните езици за програмиране: **БЕЙЗИК, АСЕМБЛЕР, ФОРТРАН, ПАСКАЛ** и **КОБОЛ**. Предвидени са потребителски програми за текстообработка, финансово планиране, отчетност и др.

ТЕХНИЧЕСКИ ХАРАКТЕРИСТИКИ:

Централно устройство	
— използуван микропроцесор	— аналог на I8086/8088
— тактова честота	— 4,77 MHz
— обем на ПЗУ	— 48 Кбайта
— обем на ОЗУ	— 128 Кбайта с възможност за разширение до 640 Кбайта.
Графичен монитор ИЗОТ 7301С	
— цвят на екрана	— зелен
— формат на информацията:	
в режим на текст	— 25 реда по 80 знака
в графичен режим	— 640 × 200 точки
печатащо устройство — ИЗОТ 6305С	
— скорост	— 150 зн./s
— брой на знаците в ред	— 132
ЗУГМД — ЕС5088М1	
— диаметър на носителя	— 133 mm
— капацитет	— 250 Кбайта
— скорост на обмяна	— 250 Кбита/s
— метод на запис	— MFM

Клавиатура — буквено-цифрова с големи и малки букви на кирилица и латиница и 10 функционални клавиша.

Производител:
Завод: „ЕЛЕКТРОНИКА“
1113 София, бул. „Чапаев“ № 49
телефон 73-61, телекс 22745

Watch Dancho Danchev's Keynote at CyberCamp 2016 - Exposing Koobface - The World's Largest Botnet! (2021-03-30 09:50)

Dear blog readers,

I've decided to share a copy of my YouTube Keynote presentation presented at CyberCamp 2016 discussing in-depth my research into the Koobface botnet including the actual details on how I eventually attempted to monitor and take it offline including the actual [1]PPT. Enjoy!

Stay tuned!

Exposing Bulgaria’s "Durzhavna Sigurnost" - The Complete Technical and Scientific Collection Archive During the Cold War - An OSINT Analysis (2021-03-30 22:09)

[1]

Dear blog readers,

Have you ever wanted to take a peek inside Bulgaria’s "[2]Durzhavna Sigurnost" archive? It’s currently available on Cryptome.org including in particular - "[3]State Security and the Scientific and Technical Intelligence" where you can check out the original - "[4]Exposing Bulgaria - Or Who Build the Soviet Union’s Virus Factories in the 90’s? - An OSINT Analysis" including the original "[5]Exposing Bulgaria’s Involvement in Cold War Espionage - Who Stole the PC and Build a Fake Pro-Western Empire? - An OSINT Analysis" including "[6]Exposing the "KGB Hack" a.k.a Operation EQUALIZER - An OSINT Analysis".

Stay tuned!

Recommended High-Profile Espionage Movie for Watching! (2021-03-30 22:10)

Dear blog readers,

Remember the [1]DVD of the Weekend blog post series? I’ve decided to resume posting high-

quality YouTube video and movies worth watching with the idea to continue the series. In this

post I’ve decided to share the [2]Red Joan movie trailer which is a high-profile espionage movie

which you should definitely consider watching.

Dear blog readers,

I’ve recently updated my original "[2]Cybercrime Forum Data Set for 2019" to include an additional dozen of publicly accessible cybercrime-frindly forum communities which are ready for processing and enrichment. With the original Data Set now 16GB and basically including full offline copies of some of the most prolific publicly accessible cybercrime-friendly forum communities which basically consists of 1M of raw Web sites ready for processing and enrichment users interested in obtaining access to the original Cybercrime Forum Data Set for

2019 for research and enrichment purposes including to participate in my currently ongoing

Law Enforcement and OSINT Operation called "[3]Uncle George" should approach me at dancho.danchev@hush.com in order to obtain access to the Data Set for research purposes.

Sample graphics which I’ve recently produced part of the currently ongoing Law Enforcement

and OSINT Operation called "Uncle George":

Recommended High-Profile Psytrance Song of the Day! (2021-04-06 10:51)

Dear blog readers,

This is Dancho. I wanted to take and effort and present a newly launched series of blog posts

called "Psytrance Song of the Day" where I intend to share with you some of the high-profile and

currently circulating psytrance songs with the idea to help you reach out to a new set of music

including to empower you with a new set of music choice for your listening and enrichment

experience.

Dancho Danchev's Blog - Proprietary MISP (Malware Information Sharing Platform)

Instance Running - Request Access Today! (2021-04-07 04:11)

Dear blog readers,

This is Dancho. I wanted to let everyone know that I've recently started running a proprietary

MISP (Malware Information Sharing Platform) instance where I distribute and share most of my

proprietary research with a variety of third-parties including connected instances or users who

have API access to my research which is now also available in STIX/ TAXII including MISP format

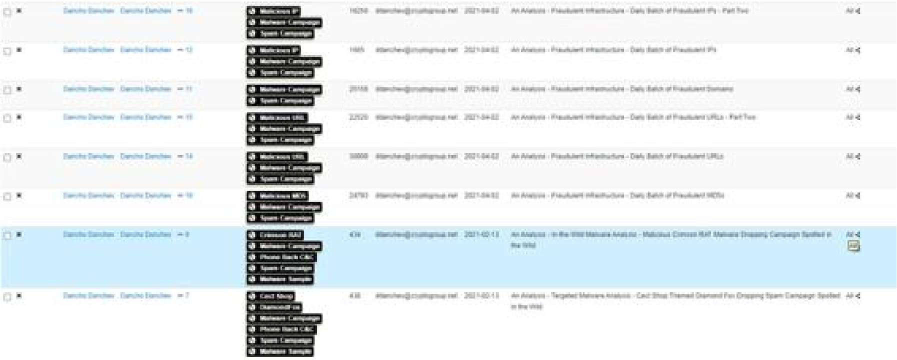
where you or your organization can request API access to my proprietary threat intelligence

feed for research or commercial purposes by approaching me at dancho.danchev@hush.com

Sample categories which I cover in my daily batch of proprietary threat intelligence research

include:

- Targeted Malware Analysis - An Analysis



- In-the-Wild Malware Analysis - An Analysis
- Targeted Phishing Analysis - An Analysis
- Malicious URL Analysis - An Analysis
- Targeted Mobile Malware Analysis - An Analysis
- APT Coverage - New Campaign
- Fraudulent Infrastructure - An Analysis
- Online Fraud Campaign - An Analysis
- Historical OSINT Campaign - An Analysis
- Russian Business Network coverage
- Koobface Botnet coverage
- Kneber Botnet coverage
- Hundreds of IOCs (Indicators of Compromise)
- Tactics Techniques and Procedures In-Depth Coverage
- Malicious and fraudulent infrastructure mapped and exposed
- Malicious and fraudulent Blackhat SEO coverage
- Malicious spam and phishing campaigns
- Malicious and fraudulent scareware campaigns

- Malicious and fraudulent money mule recruitment scams

- Malicious and fraudulent reshipping mule recruitment scams

- Web based mass attack compromise fraudulent and malicious campaigns

- Malicious and fraudulent client-side exploits serving campaigns

Sample screenshots of the research posted at my proprietary MISP (Malware Information

Sharing Platform) instance:

Recommended High-Profile Daily Military Technology Video! (2021-04-07 04:17)

Dear blog readers,

Continuing the "[1]Travel Without Moving" blog post series where I used to feature a high-

profile publicly accessible satellite imagery for a variety of high-profile locations throughout

the years I’ve decided to share a highly recommended video which is basically a [2]THAAD

demonstration video which you should watch and enjoy in case you’re interested in learning

more about modern military technology.

Dancho Danchev’s Second Edition of Cybercrime Forum Data Set for 2021 - Direct Download Available! Request Copy Today! (2021-04-13 17:37)

[1]

19GB

Exclusive Free Copy Available!

Cybercrime Forum Data Set 2021

FULL OFFLINE COPIES OF OVER 111 PUBLICLY ACCESSIBLE CYBERCRIME-FRIENDLY FORUM COMMUNITIES! LET'S SET THEM STRAIGHT!

dancho.danchev@hush.com

Dear blog readers,

This is Dancho and I wanted to let everyone know that I’ve just released the second edition of

the original "[2]Cybercrime Forum Data Set for 2019" this time including an additional set of

full offline copies of over a dozen of publicly accessible cybercrime-friendly forum communities

with the idea to distribute the Data Set to the academic community including vendors and orga-

nizations and researchers including U.S Law Enforcement and the U.S Intelligence Community

part of my currently ongoing Law Enforcement and OSINT operation "[3]Uncle George".

Users interested in receiving a direct download link (19GB) of the second edition of the

Cybercrime Forum Data Set for 2021 which now includes full offline copies of over 111

publicly accessible cybercrime-friendly forum communities should approach me at dan-

cho.danchev@hush.com and I would be happy to offer a direct download link for you and your

organizations.

Sample cybercrime-friendly forum communities included in the Data Set include:

Russian OSINT

Интервью с OSINT специалистом Данчо Данчевым. Не на все вопросы удалось получить развернутые ответы, но в целом посыл понятен. Киберкрайм прогрессирует, ransomware главный тренд 2021 года, а США по-прежнему находится в контрах с Россией. Содержание интервью:

- Кто такой Данчо?
- Чем он знаменит?
- Работа на U.S Law Enforcement и U.S Intelligence Community
- OSINT операция "Uncle George"
- Cybercrime Forum Data Set на 16 Гб
- Ransomware и Darkweb
- Прибыль REvil
- *"Россия остается главным рассадником киберпреступности"*
- Киберпреступность в СНГ

WhoisXML API
Unified Results!

Joining Team WhoisXML API! (2021-04-21 00:30)

[1]

Dear blog readers,

This is Dancho and I’ve decided to let everyone know that I’ve just joined forces with Team

[2]WhoisXML API on my way to fight and disrupt cybercrime globally for the position of DNS

Threat Researcher and that I would be releasing a variety of upcoming research articles including white papers and case studies on a variety of topics including the use of Maltego in

combination with WhoisXML API integration for the purpose of cybercrime research and threat intelligence gathering.

Dancho Danchev
DNS Threat Researcher at WhoisXML API
2h •

Folks. This is Dancho. Today is my second day with WhoisXML API and I've decided to issue a quick update on some of my current projects and responsibilities with the company. I wanted to personally thank CEO Jonathan Zhang for bringing me on board and say big thanks to my colleagues Alexander Ronquillo and Alexandre François including Ed Gibbs for their support and warm welcome in terms of supporting me to begin working on my research and contribute with high-quality cyber security and cybercrime including threat intelligence type of research and analysis utilizing one of the Web's and the industry's most extensive real time and historical WHOIS and domain and IP reputation database for the purpose of providing me with the opportunity to come up with new cyber attack threats and trends type of research and analysis and actually allow me to recommend the service to anyone doing cyber attack and cybercrime research including OSINT and threat intelligence type of research to begin using the service and grab an account including to take advantage of the Maltego integration which is so far providing to be an invaluable source of information on current and emerging cyber threats. Stay tuned!

Dancho Danchev

Folks. This is Dancho. Today is my second day with Whoisxml API and I've decided to issue an update on some of my current and ongoing responsibilities and projects with the company. I've just signed an NDA including a contract and I've already started working on several new and upcoming novel cyber attack and cyber threats type of research reports and white papers which I'll begin sharing on a daily basis including a high-profile daily Advanced Cyber Threats newsletter where you'll be pleasantly surprised by the novel and high-quality cyber attack including cybercrime and threat intelligence including OSINT type of research articles including actual white papers. I work with a team of professionals that utilize one of the Web's and the industry's most comprehensive and extensive real-time and historical WHOIS including domain and IP reputation database which in combination with the Maltego integration is providing to be an invaluable asset in some of my current and ongoing investigations where I'll be soon publishing the actual results in the form of reports and white papers. Check out the Web site - https://www.whoisxmlapi.com/ and grab an account today. Stay tuned!

Russia’s SVR Launches "SecureDrop" Similar National Security Threats Soliciting Web Site on the Dark Web - An Analysis (2021-04-24 23:27)

[1]

Big stuff! Russia’s SVR has recently launched a Dark Web onion Web site similar to Secure-Drop for the purpose of enticing citizens and individuals into submitting information regarding threats facing Russia. Users are enticed into visiting the Dark Web onion Web site including to use a publicly accessible PGP for the purpose of submitting information relevant to Nation Security Threats facing Russia.

Primary Russia SVR Dark Web Onion URL:

hxxp://svrgovru24yd42e6mmrnohzs37hb35yqeulvmvkc76e3drb75gs4qrid.onion

It's time now to make big money!

We are better then pay-per-install and other pay-per-sale programs - just sign up and you'll see difference!

Also, think about reselling - you can start your own business quickly and without big efforts and investments.

Date from 2009-04-09 to 2009-04-16

Date	Promoinst	Joinscount	Downloads	Sales	Refunds	Charges

*Please note each refund cost you $21

- $15 per sale and more! $20 if You generate 100+ per day

- Special rates for resellers
- White-label solution, everything under your brand

In my previous [1]analysis on the pay per install underground market business model I

elaborated more on the actual business model using a variety of images which I've collected over the years to showcase the business model sticking to the usual "an image is worth a thousand words" methodology.

In this post I’ve decided to continue the series and offer an additional exclusive peek inside the cybercrime ecosystem pay per install underground market business model including to discuss in-depth the tactics techniques and procedures of the cybercriminals behind these campaigns.

Sample screenshots of various pay per install business franchises throughout the years in particular circa 2008:

About Golden Cash

GoldenCashWorld it not simply next pay-per-install program, it is the company that won big part of the market, but not in public. Our adverts are people which receive maximum money from their installs. We don't shave at all, our stat is true 100%, and we have individual support for big adverts. The number of our support staff grows every day, so we can solve any problems in a very short time, if you have it during working with our programm. You can make installs for us even if You install another pay-per-install programm, our soft won't conficate with it. Payments are maid by: WebMoney, Fethard, e-gold, Western Union, Wire and other payment systems (minus comissions of exchange). You can join our partner program right now and start making money!

My First Research Paper for WhoisXML API is now Live! (2021-04-27 06:04)

[1]

Dear blog readers,

This is Dancho and I wanted to let everyone know that my first research paper for WhoisXML

API is now live [2]here. Long story short it’s an investigation of a bulletproof hosting provider

that’s currently hosting an E-Shop for stolen credit cards information.

Stay tuned!

1. https://lh3.googleusercontent.com/-oatvUi_ukEg/YIgaAZ0WqWI/AAAAAAAAM2s/QmiOdywT7fgl-mJPB2yhwZuvp0rm0vCKwCL

I’m currently offering and accepting serious advertising offers for permanent banner and a

text link placement on my blog from vendors oflr organizations in this space where I can offer

a pretty decent and good advertising inventory in terms of traffic and we can sign a monthly

or yearly traffic acquisition and brand exposure agreement for your vendor or organization.

Astalavista.box.sk - Accepting Advertisers! (2021-04-28 09:28)

[1]

Dear blog readers,

As many of you know I've been officially running a high-profile security and hacking project on

the original [2]Astalavista.box.sk including the launch management and maintenance of one of

the Web’s most popular and high-traffic volume search engine for hackers and security experts

where we’re currently accepting advertisers and offering a pretty good advertising inventory

in terms of traffic while we’re offering a permanent banner and a text link for those who are

interested.

My Response to Ransomware! - An Analysis (2021-04-29 08:00)

[1]

Dear blog readers,

Worry about ransomware and its epidemic growth next to the hype of cryptoviral extortion

which I originally predicted in my "[2]Malware - Future Trends" paper circa 2006? Keep reading.

Part of an ongoing effort on my behalf using Technical Collection and continuing my [3]series

of posts [4]exposing the activities of [5]ransomware gangs I managed to take offline approxi-

mately 3,000 email addresses belonging to ransomware gangs and lone individuals using ran-

somware in direct cooperation with Protonmail and Tutanota's Abuse Departments.

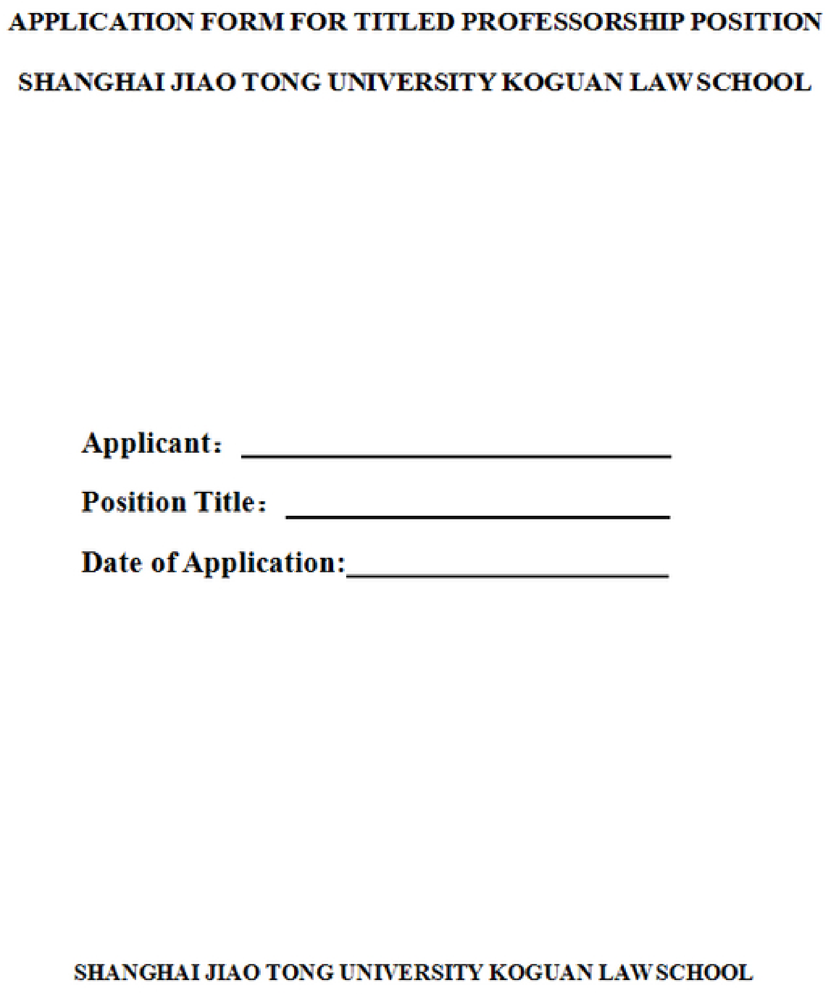
Exposing China's "Thousand Talents Program" - An OSINT Analysis (2021-04-29 08:42)

China's "[1]Thousand Talents Program" is known to be the country's one of the main sources for attempting to steal and lure foreign scientists into falling victim into a vast network of scientific research activities for foreign countries which in reality can fall victim to active counter-intelligence and intellectual and technological "know-how" exchange and stealing for the purpose of exchanging financial incentives.

In this post I’ll discuss in-depth China’s "Thousand Talents Program" and provide actionable intelligence on the actual recruitment practices.

Sample Shanghai Jiao Tong University Application Form:

8078



APPLICATION FORM FOR TITLED PROFESSORSHIP POSITION

SHANGHAI JIAO TONG UNIVERSITY KOGUAN LAW SCHOOL

Applicant： ______________________________

Position Title： ___________________________

Dancho Danchev’s Law Enforcement and OSINT Operation "Uncle George" - An Update - Collected ICQ, Cryptocurrency, XMPP/Jabber, Phone, QQ, Telegram and Viber Accounts (2021-04-29 09:25)

Dear blog readers,

I've decided to issue the following update part of my currently ongoing Law Enforcement and

[1]OSINT Operation called "[2]Uncle George" including a special thanks to McAfee and Ilya

Timchenko for taking the time and effort and going through the actual [3]Cybercrime Forum

Data Set for 2019 including the [4]Cybercrime Forum Data Set for 2021 and producing a variety of interesting results in the context of providing personally identifiable information on the

cybercriminals behind these campaigns.

In this post I'll provide a recently collected ICQ numbers list part of my currently ongoing Law

Enforcement and OSINT Operation "[5]Uncle George" for the purpose of assisting U.S Law Enforcement on its way to track down and prosecute the cybercriminals behind these campaigns:

A currently active list of ICQ numbers belonging to high-profile cybercriminals part of my

currently ongoing Law Enforcement and OSINT Operation called "Uncle George":

My Second Research Paper for WhoisXML API is now Live! (2021-04-29 21:47)

Five New White Papers for WhoisXML API Released Online!

Grab a Copy Today!

(2021-04-30 19:27)

[1]

Dear blog readers,

This is Dancho and I wanted to let everyone know that I’ve just released six new white papers

and case studies on the topic of using Maltego in combination with [2]WhoisXML API for the

purpose of mapping and doing reconnaissance of fraudulent and malicious online infrastructure

used by cybercriminals.

Find below the actual copies:

- [3]Profiling a Money Mule Recruitment Registrant Emails Portfolio - An Analysis

- [4]Profiling a Rogue Fast-Flux Botnet Infrastructure That’s Currently Hosting Multiple Online

Cybercrime Enterprises - An Analysis

- [5]Profiling the “Jabber ZeuS” Rogue Botnet Enterprise - An Analysis

Exposing Iran-based Hackers and Web Site Defacement Group's Personal Web Sites

Portfolio - Direct Technical Collection Download! Grab a Copy Today! - Part Two

(2021-05-23 18:02)

[1]

8618

Dear blog readers,

I’ve recently changed the actual download locations for two of the "Iran-based Hackers and Web

Site Defacement Group’s Personal Web Sites Portfolio - Direct Technical Collection Download"

file archives where you can actually go through some of the entire content portfolio on a huge

number of currently active Web sites belonging to Iran-based hacking groups including lone

hackers posted [2]here including [3]here.

Grab a free copy of the original research [4]here including the second part [5]here.

Part 01 - Download [6]here

Part 02 - Download [7]here

Check out the actual document [8]here.

14.	KAMALIAN Behrouz	POB: Tehran DOB: 1983	Head of the IRGC- linked "Ashiyaneh" cyber group. The "Ashiyaneh" Digital Security, founded by Behrouz Kamalian is responsible for an intensive cyber-crackdown both against domestic opponents and reformists and foreign institutions. On 21 June 2009, the internet site of the Revolutionary Guard's Cyber Defence Command posted still images of the faces of people, allegedly taken during post-election demonstrations. Attached was an appeal to Iranians to "identify the rioters".	10.10.2011

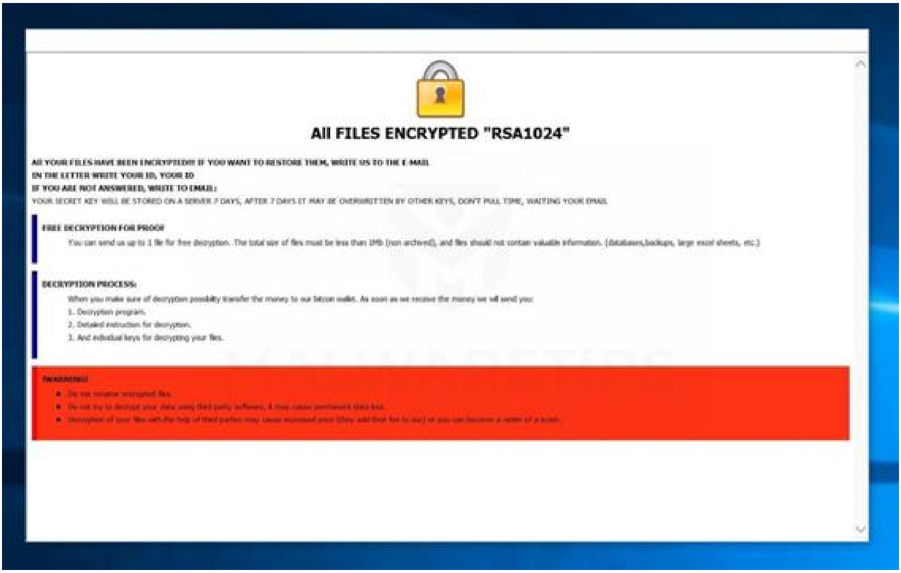
Profiling a Currently Active High-Profile Cybercriminals Portfolio of Ransomware-

Themed Extortion Email Addresses - Part Three (2021-05-24 09:29)

[1]

8731



All FILES ENCRYPTED "RSA1024"

ALL YOUR FILES HAVE BEEN ENCRYPTED!!! IF YOU WANT TO RESTORE THEM, WRITE US TO THE E-MAIL

IN THE LETTER WRITE YOUR ID, YOUR ID

IF YOU ARE NOT ANSWERED, WRITE TO EMAIL:

YOUR SECRET KEY WILL BE STORED ON A SERVER 7 DAYS, AFTER 7 DAYS IT MAY BE OVERWRITTEN BY OTHER KEYS, DON'T PULL TIME, WAITING YOUR EMAIL

FREE DECRYPTION FOR PROOF

You can send us up to 1 file for free decryption. The total size of files must be less than 1Mb (non archived), and files should not contain valuable information. (databases,backups, large excel sheets, etc.)

DECRYPTION PROCESS:

When you make sure of decryption possibility transfer the money to our bitcoin wallet. As soon as we receive the money we will send you:

1. Decryption program.
2. Detailed instruction for decryption.
3. And individual keys for decrypting your files.

Shipping them while they’re hot.

Continuing the "[2]Profiling a Currently Active High-Profile Cybercriminals Portfolio of Ransomware-Themed Extortion Email Addresses - Part Two" including "[3]Exposing Protonmail and Tutanota’s Illicit Abuse by Ransomware Gangs - A Compilation of Currently Active Ransomware-Themed Email Addresses" including "[4]Profiling a Currently Active High-Profile Cybercriminals Portfolio of Ransomware-Themed Extortion Email Addresses" series I’ve decided to share yet another recently obtained using Technical Collection portfolio of currently active personal email addresses belonging to currently active lone ransomware users including ransomware gangs with the idea to assist U.S Law Enforcement on its way to track down and prosecute the cybercriminals behind these campaigns.

Currently active sample ransomware-themed personal email addresses known to have participated including to be currently participating in active ransomware-themed campaigns:

Sample Conference Presentations - Accepting Conference Event Invitations!

(2021-05-25 11:50)

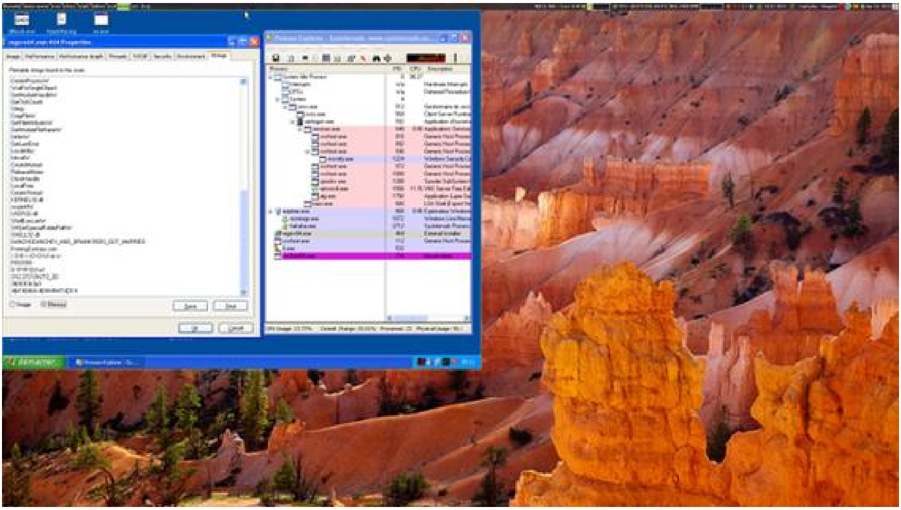
[1]

Dear blog readers,

This is Dancho. I've decided to share some of my previous conference event presentation

photos with the idea to find out who might be interested in inviting me to speak at their event.

8763



Famous Cyber Jihadist Cases

Irhabi007- caught and prosecuted

Jihad Jane – caught and prosecuted

GIMF members – caught and prosecuted

RSA CONFERENCE EUROPE 2012
RSA CONFERENCE EUROPE 2012

Feel free to approach me at dancho.danchev@hush.com in case you’re interested in having me

present at your event and I would be happy to attend and consider going through my actual

presentations [2]here.

Dancho Danchev

An In-Depth Picture Inside Security Researcher's Dancho Danchev Understanding of Security Hacking and Cybercrime Incidents

Dancho Danchev's Personal Security Hacking and Cybercrime Research Memoir

Sample Articles and OSINT Research Publications Full Offline E-Book Compilations

Available! Grab a Free Copy Today! (2021-05-25 11:51)

Dear blog readers,

This is Dancho and I’ve decided to share with everyone some of my currently active and

recently published full offline E-Book copy of some of my research articles and OSINT

publications throughout the years. Are you interested in downloading a free full offline E-Book

copy of my personal blog in various E-Book reader formats? Are you an Amazon Kindle user?

CYBERCRIME FORUM DATA SET 2021

OVER 111 FULL OFFLINE COPIES (19GB) OF PUBLICLY ACCESSIBLE CYBERCRIME FORUM COMMUNITIES. FREE TO DOWNLOAD FOR PROCESSING AND ENRICHMENT.

APPROACH ME AT DANCHO.DANCHEV@HUSH IN ORDER TO OBTAIN A FREE COPY!

Cybercrime Forum Data Set for 2019 and 2021 - Free Direct Download Technical Collection Copy Available! Grab a Copy Today! (2021-05-25 11:53)

[1]

Dear blog readers,

This is Dancho. I've decided to make my Cybercrime Forum Data Set for [2]2019 and [3]2021

exclusively available online for free in order for me to speed the dissemination process and

to possibly empower security researchers and vendors with the necessary information to help

them stay on the top of their game in terms of current and emerging cyber threats including

U.S Law Enforcement on its way to track down and prosecute the cybercriminals behind these

campaigns part of my currently ongoing Law Enforcement and OSINT operation called "[4]Uncle

George".

Including the following actual direct download links for the actual cybercrime-friendly forums

in question:

8776

19GB

Exclusive Free Copy Available!

Cybercrime Forum Data Set 2021

FULL OFFLINE COPIES OF OVER 111 PUBLICLY ACCESSIBLE CYBERCRIME-FRIENDLY FORUM COMMUNITIES! LET'S SET THEM STRAIGHT!

Dear blog readers,

I’ve decided to continue the "[2]Profiling a Currently Active Portfolio of High-Profile Cybercriminal Jabber and XMPP Accounts Including Email Address Accounts - Part Three" blog post series and I’ve also decided to share yet another batch of currently active high-profile cybercriminal XMPP/Jabber including email addresses accounts with the idea to assist vendors and U.S Enforcement on its way to track down and prosecute the cybercriminals behind these campaigns.

Sample currently active high-profile cybercriminal Jabber and XMPP including email address

accounts:

O solo me estas enviando fake info 10:24 P.M.

Como sea, pavo... que tengo cosas en mi vida personal y no he actualizado bases, ¿sabes? 11:37 P.M.

Me la pelas, ya hice en el carding lo que iba a hacer 11:38 P.M.

Se me respeta porque sí 11:38 P.M.

Te devolveré el dinero 11:38 P.M.

Ya no me revientes las pelotas 11:38 P.M.

Gilipollas 11:38 P.M.

Mañana por la noche, que hoy estoy ocupado 11:38 P.M.

Fimvark
Te devolveré el dinero
Si hagale 11:38 P.M.

Fimvark
Mañana por la noche, ...
Jaja 11:38 P.M.

Profiling a Currently Active Portfolio of High-Profile Cybercriminal Jabber and XMPP Accounts Including Email Address Accounts - Part Five (2021-05-30 22:42)

Dear blog readers,

I've decided to continue my "[1]Profiling a Currently Active Portfolio of High-Profile Cybercriminal Jabber and XMPP Accounts Including Email Address Accounts - Part Four" blog post series

and I've recently decided to issue yet another update in terms of currently active high-profile

XMPP/Jabber including email address accounts used by high-profile cybercriminals which I've

managed to obtain using Technical Collection.

Sample currently active high-profile XMPP/Jabber accounts used by cybercriminals include:

webprofile@xmpp.jp

ok 12:49 ✓

they are fresh I bought them yesterday 12:51 ✓

Yes you're psn card Was live 12:55

But bro i exchanged that and got 5$ of it 12:55

I can't sell u the paxfull for 5$ 12:55

Or for 10€ 12:55

U understand brother? 12:55

10=5 12:56 ✓

40=20 12:57 ✓

Then 40 12:57

So that means u remaining payment is 30€ psn card 12:57

2That's why i said 2 after 2 12:58 ✓

Then send now the 2nd one 12:58

If check how much pop out 12:58

If it's good i will send u the account directly 12:58

U have to understand bro 12:58

hi bro 10:33

I need help to verify paxful. someone with knowledge? I will pay for the work 10:34

Ya 12:20

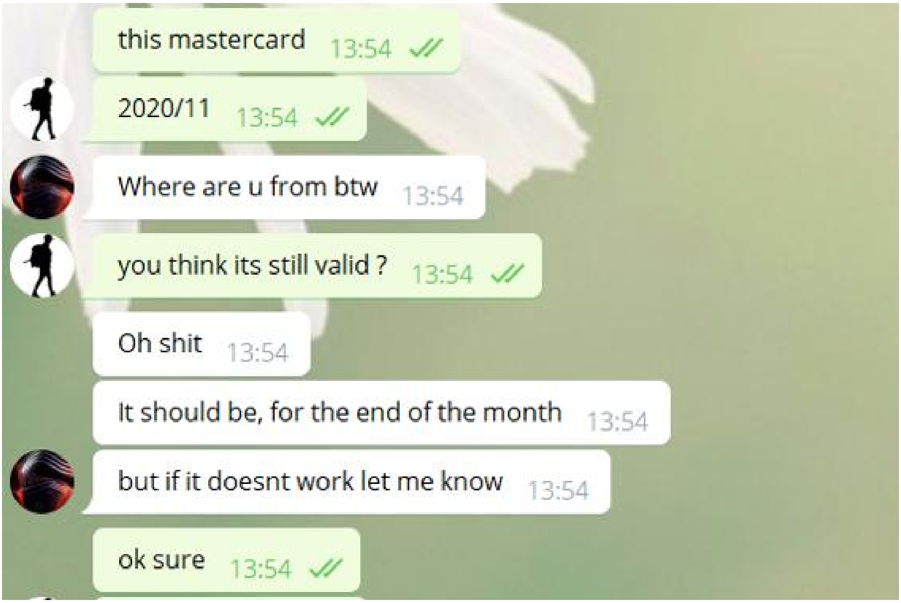
I do the work 12:21

What country is the paxfull linked 12:22

Verify an account and when it is verified I will pay you 12:23

spain 12:24

lok33r lok33r
Verify an account and when ...
I don't work like that bro 12:24



this mastercard 13:54

2020/11 13:54

Where are u from btw 13:54

you think its still valid ? 13:54

Oh shit 13:54

It should be, for the end of the month 13:54

but if it doesnt work let me know 13:54

ok sure 13:54

Exposing Protonmail and Tutanota’s Illicit Abuse by Ransomware Gangs - A Compilation of Currently Active Ransomware-Themed Email Addresses - Part Two

(2021-05-30 22:42)

Dear blog readers,

I’ve decided to continue the "[1]Exposing Protonmail and Tutanota’s Illicit Abuse by Ransomware Gangs - A Compilation of Currently Active Ransomware-Themed Email Addresses" blog post series and offer an in-depth tactical and actionable threat intelligence on some of the currently active Protonmail and Tutanota email accounts known to have been involved in currently active ransomware campaigns.

A list of currently active Protonmail email address accounts known to have been involved in

currently active ransomare campaigns:

Dancho Danchev's Disappearance - 2010 - Official Complaint Against Republic of Bulgaria - Part Four (2021-06-08 16:09)

[1]

8876

Dear friends.

I never really had the chance to elaborate or actually explain what really took place with me in

2010 when I was what appears to be illegally arrested using a stolen ID and a molestion and

home robbery attempt courtesy of local police officers from Troyan Police where Troyan is my

home town including a kidnapping attempt where I was taken into a car by the same people -

one of them is the mayor of a village called Debnevo and the other two are running local pizza

businesses and are actually involved with my town's administration as advisers. It appears that

I was then drugged and sedated without my knowledge for a period of 5 years where under a

physical violence pressure I've lost approximately $85,000 due to physical harassment without

no legal action on behalf of my country or any other country involved which leaves me with

home molestation kidnapping attempt and a physical robbery attempt by police officers from

the town of Troyan with no legal action besides a DANS agent visit who asked me to attend a

doctor session and actually advised me to take a pension. The same people that robbed and

kidnapped me and basically ruined my money and well-being are currently still supposed to

be working in the local police department with no legal action on behalf of my country or any

other country involved leaving me with no money and a steady flow of loans which I try to take

care of by working on a part-time or contractor basis.

Sample Facebook profile IDs of the people responsible for my illegal kidnapping illegal arrest

home molestation and the stealing of my personal ID from my place and holding me hostage

for a period of couple of months an injecting me on a daily basis:

https://www.facebook.com/profile.php?id=100030506870037

8877

https://www.facebook.com/profile.php?id=100005932519460

Primary points of contacts in case someone is worried about well-being and whereabouts in

this case should be:

Email: dans@dans.bg

Telefon za korupciq na slujiteli na MVR - 02 / 982 22 22

GDBOP - Signal za korupciq i izpirane na pari - gdbop@mvr.bg

Nachalnik RPU Troyan - rutr.lo@mvr.bg

Troyan Police - Email: police _troyan@abv.bg

Troyan Hospital - Email: mbal _troyan@abv.bg

Lovech Psychiatry Clinic - Email: dpblovech@abv.bg

Troyan Municipality - Email: mail@troyan.bg

لاحظ العنوان حيث يحتوي على اسم الملف

و بنفس الطريقة؛ لو كان الملف المخفي ملف نصي نستخدم برنامج المفكّرة (**notepad**) أو الوورد في فتحه كما في المثال السابق، ونحتاج فقط أن نعرف مكان وجود المفكّرة أو الوورد في الجهاز.

حتى هذه النقطة نكون قد انتهينا من عملية إخفاء الملفات واستخدامها بهذه الطريقة، ولكن بقي علينا شرح كيفية إلغاء الملفات المخفية، وشرح ميزات ومضار هذه الطريقة.

2) حذف الملفات المخفية:

وهنا لدينا حالتان:

- إما أن يكون الملف الذي أخفينا فيه الملف وهمياً وليس ذا أهمية، عندها بمجرد إلغاء الملف الوهمي نكون قد ألغينا الملف المخفي. كما في مثالنا السابق، فلو قمنا بإلغاء الملف **test1.txt** فإننا نكون أيضا قد ألغينا

Dear blog readers,

I’ve decided to share a recently obtained using Technical Collection portfolio of email addresses

known to have been involved in various cyber jihad campaigns online including to possess a

direct involvement with the GIMF (Global Islamic Media Front) including the Ekhlaas Islamic

Network including the actual registrations of cyber jihad themed domains for the purpose of

assisting U.S Law Enforcement and the U.S Intelligence Community on its way to track down

and monitor the cybercriminals behind these campaigns.

Exposing a Currently Active Portfolio of Cyber Jihad Related Email Addresses - An

OSINT Analysis (2021-06-13 07:53)

8886

Dear blog readers,

This is Dancho and I've decided to share with everyone a currently active list of high-profile

cyber jihad domain and campaign registration email addresses which I obtained using a variety

of means where the ultimate goal would be to assist U.S Law Enforcement and the U.S Intel-

ligence Community on its way to track down and prosecute the cybercriminals behind these

campaigns.

Sample currently active email addresses known to have been involved in cyber jihad domain

registrations and current and ongoing cyber jihad campaigns include:

Dancho Danchev’s Law Enforcement and OSINT Operation "Uncle George" - Sample

Graphics (2021-06-13 08:09)

[1]

Dear blog readers,

This is Dancho and I’ve decided some of the graphs which I produced part of my currently

ongoing Law Enforcement and OSINT Operation called "[2]Uncle George" where the ultimate goal would be to assist fellow researchers vendors and organizations including U.S Law

Enforcement and the U.S Intelligence Community on its way to track down and prosecute the

cybercriminals behind these campaigns.

Exposing a Currently Active Email Address Portfolio of Web Site Defacement Groups

or Lone Web Site Defacement Groups - An OSINT Analysis (2021-06-14 13:49)

Dear blog readers,

This is Dancho and I’ve decided to share what appears to be one of the most comprehensive

and up-to-date and relevant email address portfolio of personal email addresses belonging to high-profile Web site defacement groups including lone Web site defacement groups with the

idea to assist U.S Law Enforcement and the U.S Intelligence Community on its way to track

down and prosecute the cybercriminals behind these campaigns.

Currently active portfolio of high-profile email address accounts belonging to high-profile

Web site defacement groups including lone Web site defacement groups:

mil Kyulev | Generali Databases

From: **e.kyulev** <*e.kyulev@protonmail.com*>

Sent 10/25/2020 (5 days ago)

To: klienti.bg@generali.com, klienti@generali.bg

Здравейте,
През изминалите няколко дни се поразрових в системите Ви.
С интерес обходих цялата информация във всичките Ви 3 датабази:

[*] generali_agents
[*] generali_custome
[*] generali_mvr

Можете да се запознаете с пълната структура на датабазите на следният линк:

https://pastebin.com/NKGenvDN

Направил съм Ви няколко снимчици за спомен:

https://prnt.sc/v6844i
https://prnt.sc/v684ax
https://prnt.sc/v684g9
https://prnt.sc/v687km
https://prnt.sc/v688ph
https://prnt.sc/v688x8
https://prnt.sc/v68ct7
https://prnt.sc/v68d7y
https://prnt.sc/v68dew

Имайки предвид, че сме запознати каква е глобата според GDPR (Регламент (ЕС) 2016/679), нека ме улесните.

Здравей.

Предлагам ти да смениш системите ти администраторчета от StudioX

Дължиш ми такса дигитално спокойствие в размер от 25 000 EUR.

Ориентирай се да я платиш на 1GASoz7QTbfYbexS4DM2LpuNohdM6uPEPd

Желая да благодаря на протестантите #ПротестиДоКрай

Не се предавайте пред милиционерите, шамарете ги като нападат да си знаят!

Те са нисък клас хора и не трябва да се страхувате от тях!

Драги граждани, знаете ли как г-н Иван Стоименов Гешев рекетираше през 2012 Magic Coin, а също така и редица други в тази ниша?

Следете сайта на afera.bg, поне са обективни противно на тази пасмина :)

Посетете линка по-долу, има редица от интересни датабази:

https://shoppy.gg/@Kyutey

Какво искаш като бтц? 8:04 AM

30k BGN в BTC е добре. 8:04 AM

0.32 8:05 AM

След това, ще метна repot-чета къде - какво. 8:05 AM

Нищо няма да се продава, разгласява. 8:05 AM

Как може да съм сигурен 8:06 AM

You have my word, нямам и нищо лично към Вас. 8:06 AM

Можеш л да ми кажеш и другите сайтове 8:07 AM

```
Database: mining

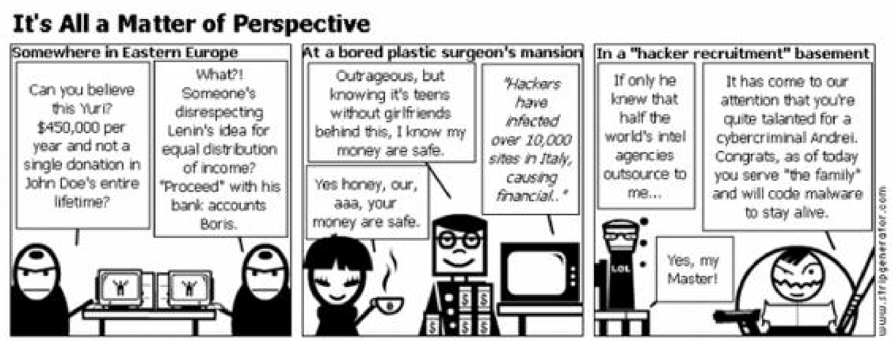
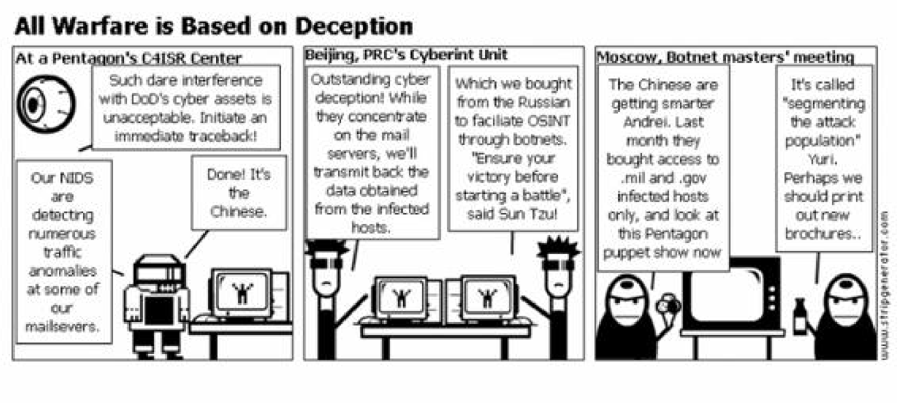
The Blackberry Espionage Saga
Paris, France
What's with all that Blackberry espionage paranoia?!
Don't know! I doubt spies are intercepting our emails anyway.
At the NSA
Our SIGINT operations are consistently lacking behind our Russian adversaries. We must dominate the French spectrum once again!
The interception will proceed smoothly.
Acknowledged!
At the FSB headquarters..
"..will proceed smoothly."
"..intercepting our emails.."
Nyah, Nyah! Do I tell the French or open a disinformation channel to the U.S through France?
www.stripgenerator.com



It's All a Matter of Perspective
Somewhere in Eastern Europe
Can you believe this Yuri? $450,000 per year and not a single donation in John Doe's entire lifetime?
What?! Someone's disrespecting Lenin's idea for equal distribution of income? "Proceed" with his bank accounts Boris.
At a bored plastic surgeon's mansion
Outrageous, but knowing it's teens without girlfriends behind this, I know my money are safe.
"Hackers have infected over 10,000 sites in Italy, causing financial.."
Yes honey, our, aaa, your money are safe.
In a "hacker recruitment" basement
If only he knew that half the world's intel agencies outsource to me...
It has come to our attention that you're quite talanted for a cybercriminal Andrei. Congrats, as of today you serve "the family" and will code malware to stay alive.
Yes, my Master!
LOL
www.stripgenerator.com



All Warfare is Based on Deception
At a Pentagon's C4ISR Center
Such dare interference with DoD's cyber assets is unacceptable. Initiate an immediate traceback!
Our NIDS are detecting numerous traffic anomalies at some of our mailsevers.
Done! It's the Chinese.
Beijing, PRC's Cyberint Unit
Outstanding cyber deception! While they concentrate on the mail servers, we'll transmit back the data obtained from the infected hosts.
Which we bought from the Russian to faciliate OSINT through botnets. "Ensure your victory before starting a battle", said Sun Tzu!
Moscow, Botnet masters' meeting
The Chinese are getting smarter Andrei. Last month they bought access to .mil and .gov infected hosts only, and look at this Pentagon puppet show now
It's called "segmenting the attack population" Yuri. Perhaps we should print out new brochures..

The Basics of Building an Early Warning System for Anticipating and Researching

Cybercrime Trends - An Analysis (2021-07-04 22:46)

My Memoir - Accepting Research Questions! (2021-07-05 01:47)

[1]

9126

Dear blog readers,

I wanted to share with everyone the fact that I've started working on a high-profile personal

memoir which basically encompasses a period of over 20 years in the field of computer and information security including the infamous Web 2.0 transition including my current career

success and experienced in the world of security blogging cybercrime research and threat

intelligence gathering up to present day.

I also wanted to let you know that there will be a lot of bonus content including never-published

before personal account type of research activity and the true story that took place throughout

the 90’s in the world of hacking and computer security where I was a teenage hacker enthu-

siast today’s leading expert in the field of security blogging cybercrime research and threat

intelligence gathering.

My request? I’m currently accepting research and interview questions from my blog readers

which I could properly answer and present in the form of book chapters where necessary in

terms of my experience as a teenage hacker enthusiast including my current position as a

Thanks, But no Thanks! (2021-07-06 11:10)

[1]

Dear blog readers,

Following a series of successful data mining and OSINT enrichment successes in the face of

OSINT and Law Enforcement operation called "Uncle George" including my recent attempt to

take down approximately 3,000 ransomware emails which was quite a success including the

recent and ongoing publication of various compilations of currently active high-profile cyber-

criminal email addresses and XMPP/Jabber accounts I had the privilege to get several of my

blog posts censored and basically taken offline courtesy of Google which is actually good news

in the face of the basic news that I'm currently sitting have been and will continue to be sitting

on a treasure trove of threat intelligence and cyber attack attribution information on current

and emerging cyber threats including to get actual legal threats from various individuals who

appear to have been busy closing down their Twitter and Facebook accounts including LinkedIn

accounts meaning quite a success for the actual data mining and technical collection process where the ultimate goal here would be to assist U.S Law Enforcement and the U.S Intelligence

Community on its way to track down and prosecute the cybercriminals.

Who wants to rock the boat with me? Request an invite-only

reader access today! Sharing is caring.

Are you a long-time reader of this blog? Are you basically fascinated by the richness and

the informative content on current and emerging cyber threats? Do you want to get a private invite-only reader access to keep me motivated? Sharing is caring. Consider sending an

introduction message to dancho.danchev@hush.com including your current position and motivation for reading this blog how has it helped you including a copy of your CV for the purpose

of getting invite-only private access that would greatly motivate me to produce high-quality

and never published content before in an invite-only fashion.

[6]

Therefore after approximately 12 years of active one-man operation running one of the security

industry’s leading security publications which is my personal blog which I originally launched in

December, 2005 when I was working on [7]https://astalavista.com while I was studying in the

Netherlands I've decided that the time has come to find an alternative medium to communicate

the treasure trove of threat intelligence and OSINT information that I'm currently sitting on and

have been sitting on throughout the past decade with the idea to show and present the crown

jewels of my research to basically any sort of vetted and trusted client who's interested in my

research and proven methodology for fighting and disrupting the bad guys in a systematic and

efficient way throughout the past decade.

It’s been a privilege and an honor to serve everyone’s needs for approximately 12 years as

an independent contractor running this blog where I’ve actually had the chance to meet and

actually get to know some of the security industry’s leading companies and actual folks working

within the security industry and it will continue to be a privilege and an honor to know and work

with them in the future.

Those greedy cybercriminals, should we tell them to decrease the price or we could have them in the basement, hell, it's tax payers money we're using to obtain 0days?
Mainstream media catching up
Ensuring that as many people as possible are aware of Microsoft's latest security bulletin, improves the overall state of Internet security, ultimately better serves society, thereby limiting carbon dioxide emissions...

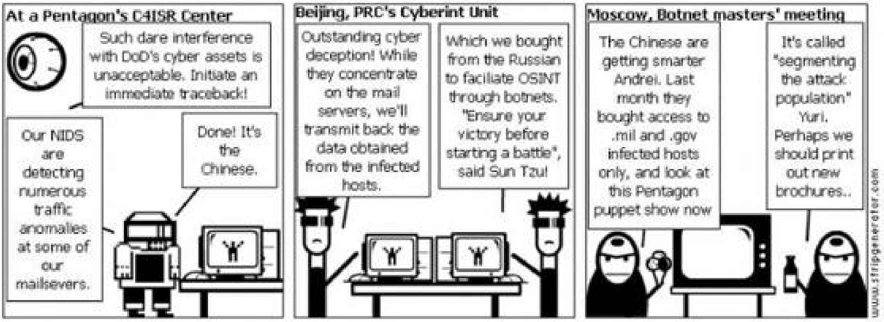
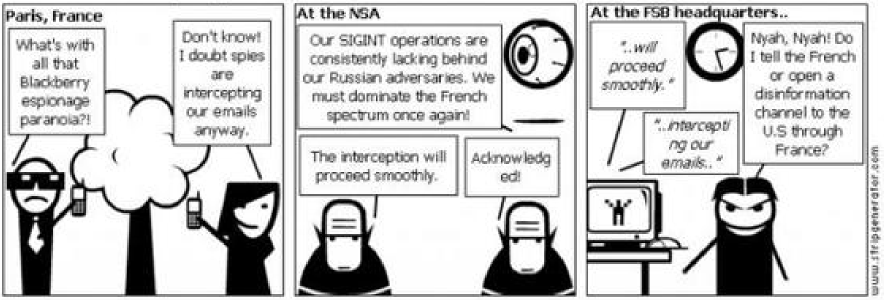
All Warfare is Based on Deception



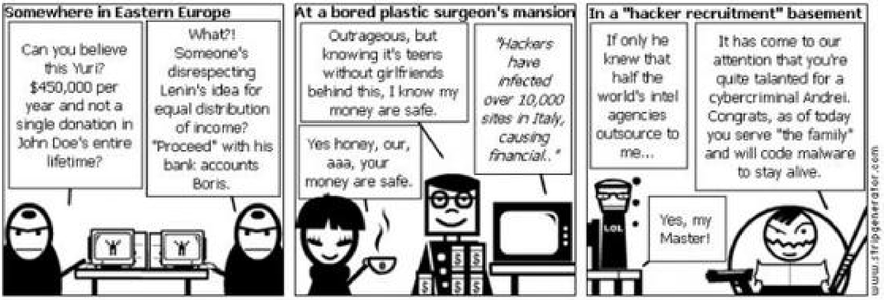
At a Pentagon's C4ISR Center
Such dare interference with DoD's cyber assets is unacceptable. Initiate an immediate traceback!
Our NIDS are detecting numerous traffic anomalies at some of our mailsevers.
Done! It's the Chinese.
Beijing, PRC's Cyberint Unit
Outstanding cyber deception! While they concentrate on the mail servers, we'll transmit back the data obtained from the infected hosts.
Which we bought from the Russian to faciliate OSINT through botnets. "Ensure your victory before starting a battle", said Sun Tzu!
Moscow, Botnet masters' meeting
The Chinese are getting smarter Andrei. Last month they bought access to .mil and .gov infected hosts only, and look at this Pentagon puppet show now
It's called "segmenting the attack population" Yuri. Perhaps we should print out new brochures..
www.stripgenerator.com

The Blackberry Espionage Saga



Paris, France
What's with all that Blackberry espionage paranoia?!
Don't know! I doubt spies are intercepting our emails anyway.
At the NSA
Our SIGINT operations are consistently lacking behind our Russian adversaries. We must dominate the French spectrum once again!
The interception will proceed smoothly.
Acknowledged!
At the FSB headquarters..
"..will proceed smoothly."
"..intercepting our emails.."
Nyah, Nyah! Do I tell the French or open a disinformation channel to the U.S through France?
www.stripgenerator.com

It's All a Matter of Perspective



Somewhere in Eastern Europe
Can you believe this Yuri? $450,000 per year and not a single donation in John Doe's entire lifetime?
What?! Someone's disrespecting Lenin's idea for equal distribution of income? "Proceed" with his bank accounts Boris.
At a bored plastic surgeon's mansion
Outrageous, but knowing it's teens without girlfriends behind this, I know my money are safe.
"Hackers have infected over 10,000 sites in Italy, causing financial.."
Yes honey, our, aaa, your money are safe.
In a "hacker recruitment" basement
If only he knew that half the world's intel agencies outsource to me...
It has come to our attention that you're quite talanted for a cybercriminal Andrei. Congrats, as of today you serve "the family" and will code malware to stay alive.
Yes, my Master!
LOL

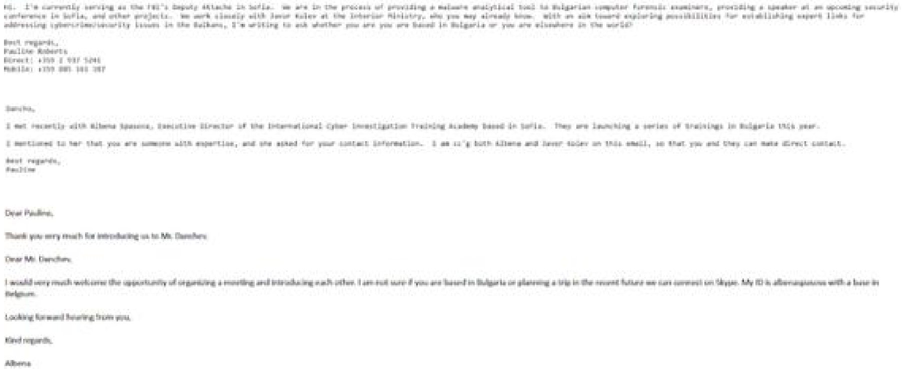
[20]

[21]



Hi. I'm currently serving as the FBI's Deputy Attache in Sofia. We are in the process of providing a malware analytical tool to Bulgarian computer forensic examiners, providing a speaker at an upcoming security conference in Sofia, and other projects. We work closely with Javor Kolev at the Interior Ministry, who you may already know. With an eye toward exploring possibilities for establishing expert links for addressing cybercrime/security issues in the Balkans, I'm writing to ask whether you are you are based in Bulgaria or you are elsewhere in the world?

Best regards,
Pauline Roberts
Direct: +359 2 937 5241
Mobile: +359 885 161 387

Dancho,

I met recently with Albena Spasova, Executive Director of the International Cyber Investigation Training Academy based in Sofia. They are launching a series of trainings in Bulgaria this year.

I mentioned to her that you are someone with expertise, and she asked for your contact information. I am cc'g both Albena and Javor Kolev on this email, so that you and they can make direct contact.

Best regards,
Pauline

Dear Pauline,

Thank you very much for introducing us to Mr. Danchev.

Dear Mr. Danchev,

I would very much welcome the opportunity of organizing a meeting and introducing each other. I am not sure if you are based in Bulgaria or planning a trip in the recent future we can connect on Skype. My ID is albenaspasova with a base in Belgium.

Looking forward hearing from you,

Kind regards,

Albena

Awesome.

Check this out in terms of my disappearance and possible kidnapping courtesy of Bulgaria's

Law Enforcement in the form of an illegal arrest using a stolen ID from my place and actual

home molestation courtesy of local police officers who basically escorted me and held me in

another town for a period of couple of months.

Zdraweite Albena, Javor,

Nadqvam se nqmate nishto protiv da govorq na ti, vupreki che ne se poznavame lichno, nadqvam se tova skoro da se promeni. Purvo, izvinqvam se za zakusnenieto s otgovora, po dobre kusno otkolkoto nikoga. Poglednah syllabus-a na Academiqta i ne che sum imal predrasuduci, no bqh priqtno iznenadan ot temite koito se discutirat i nai-veche ot poziciite na horata koito sa gi pravili. In short - opredeleno ima s kakvo da contribute kato temi i expertise.

Shte se opitam da obqsnq po-tochno v kakvi areas imam opit over email.

- Security awareness perspective/presenting etc.

Povecheto prezentacii koito pravq sa na invite-only conferences, trusted set of folks, za da se poluchi maximalen efect v sravnenie s masovi conferencii za publichnost, tui kato ne sum ot tipa hora koito "rushat iztochnici na informaciq" za publichnost etc. attachvam edna prezentaciq koqto sum pravil s Honeynet Project-a http://www.honeynet.org , za da dobiete nqkakva predstava. Pretendiram che imam mnogo dobri presenting skills, v smisul che moga da obqsnqvam ednakvo na technical i ne chak tolkova technical audience.

Tova e portfolio of 350+ statii/research koito sa za mass audience: http://www.zdnet.com/topics/dancho+danchev

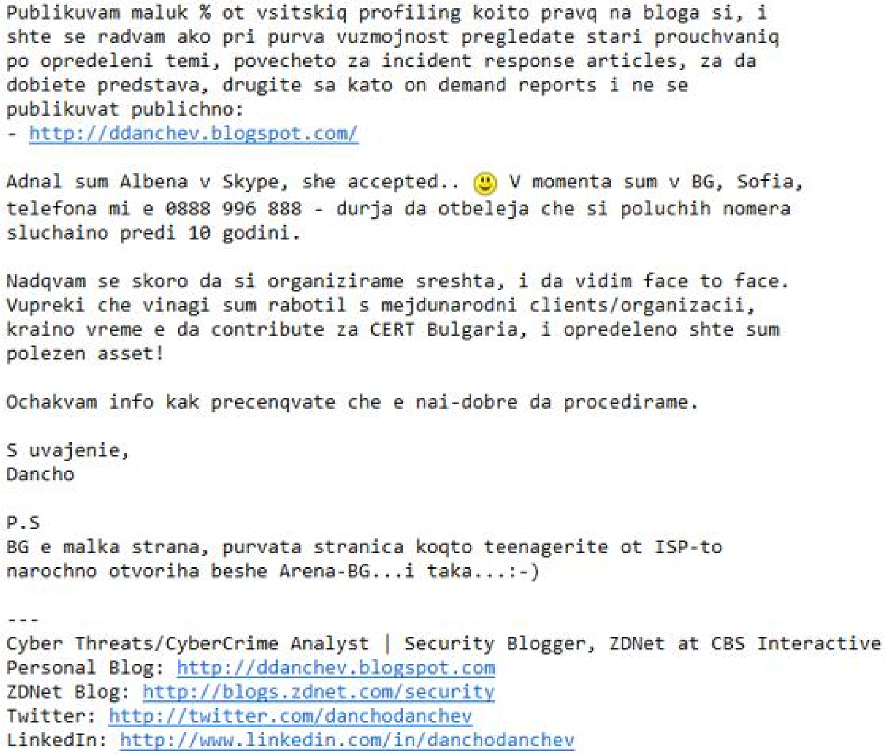
A tova e edin "best practice" type of paper koito go pisal 2003 godina: http://www.windowsecurity.com/pages/security-policy.pdf

- Operational level expertise

Obshto vzeto tova e osnovno koeto pravq, bez speculacii za trends ili fads, a real data za opredelini grupi, schemi, i ataki. Mnogo dobre sum networked v smisul, private mailing lists sus personal contacts within the industry, vuzmojnost za dostup do malware samples, ili info za opredelena ataka ot perspectivata na vsitski big vendors koeto spodelqt info s ideqta da zashtitqt vuzmojno nai-golqm broi clienti, contacti sus key persons vuv vajni ISP-ta i CERT-ove za da moje da se reagira momentalno pri opredel tip ataka v dadenata strana etc.

[26]

9143



Publikuvam maluk % ot vsitskiq profiling koito pravq na bloga si, i shte se radvam ako pri purva vuzmojnost pregledate stari prouchvaniq po opredeleni temi, povecheto za incident response articles, za da dobiete predstava, drugite sa kato on demand reports i ne se publikuvat publichno:
- http://ddanchev.blogspot.com/

Adnal sum Albena v Skype, she accepted.. 🙂 V momenta sum v BG, Sofia, telefona mi e 0888 996 888 - durja da otbeleja che si poluchih nomera sluchaino predi 10 godini.

Nadqvam se skoro da si organizirame sreshta, i da vidim face to face. Vupreki che vinagi sum rabotil s mejdunarodni clients/organizacii, kraino vreme e da contribute za CERT Bulgaria, i opredeleno shte sum polezen asset!

Ochakvam info kak precenqvate che e nai-dobre da procedirame.

S uvajenie,
Dancho

P.S
BG e malka strana, purvata stranica koqto teenagerite ot ISP-to narochno otvoriha beshe Arena-BG...i taka...:-)

Zdrasti Yavore,

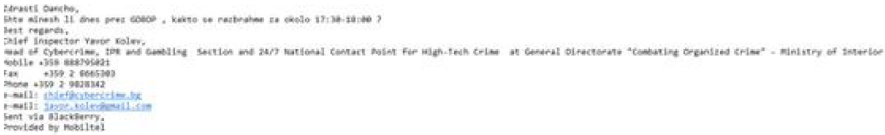
Jalko che ne uspehme da se vidim dnes, tui kato vupreki che mi se iskashe da govorim za dosta po profesionalni temi, kato che li az ti uvajavam rabotata poveche otkolkoto ti moqta, i nqma kak da ti namekna za nqkoi points koito me bezpokoqt i vuprosi koito iskah da te pitam. Az go davam profesionalno i straight to the point, nadqvam se i ti i vednuj zavinagi da si produljim po profesionalniq si put i eventualno nqkoi den, ako se naloji da se poluchi neshto productivno ot facta che se imame kato kontakti.

Vuprosi:
- Koga shte moga da si vzema dush na spokoistvie, i kak shte stane tova? 🙂
- Centralna Cooperativna Banka tvurdi (do rabotodatelq mi) che ne "moje da svurje imeto mi sus smetkata" za poluchavane na plashtane ot rabotodatelq mi CBS Interactive, chast ot CBS Corporation, za PRUV put za poslednite 2 godini i polovina. Shte probvam sus trite si imena - DANCHO [redacted] DANCHEV, shte se poluchi li tozi put?

Points:
- Az neznam dali vuobshte poglejdash research-a koito ti prashtam (2 presentations so far, sus permission), no sled tezi "projectori" imam problemi sus sigurnostta si, v smisul takuv poslednoto neshto ot koeto imam nujda e NEDOVERIE za socialno-orientiranata mi rabota na mejdunarodno nivo, koqto nqma nishto obshto sus neshtata koito se sluchvat v rodinata mi - BULGARIA, a ako eventualno nqkoga ima TI si the point of contact for anything BG related!

Priqten weekend, i shte se radvam na otgovorite ti, ili v nai-dobriq sluchai nqkakvo razvitie v pravilnata (pone spored men) posoka.

S uvajenie,
--



Zdrasti Dancho,
Shte minesh li dnes prez GDBOP , kakto se razbrahme za okolo 17:30-18:00 ?

Historical OSINT - An Analysis of the South Korean/U.S DDoS Attacks Circa 2009

(2021-07-09 13:56)

During the last couple of days, I was getting harder to resist not publishing some of literally

moronic commentary on the DDos attacks, thankfully not made by people I know in person or virtually. From the "we know they did it but we don’t have data

to prove it", to the very latest and most disturbing commment

by a U.S intelligence

Why disturbing? Because that’s exactly what the person – controversial to the common wisdom

you don’t need a team to launch this old school amateur-ish http

request flooder –

Key summary points:

- if such a small botnet with such a noisy and amateur-ish request flooder can shutdown the

U.S FCC for days, I wonder what would have happened to the rest

of the sites in the target list if the size of the botnet and sophistication of DDoS techniques

improved

Let me continue in this line of thought - or they secretly brainwash the Teletubies and infiltirate

he hearts and minds of children across the globe, a future

generation of pro-North Korean youngerts. Or they could secretly become a Russian Business

Network franchise, now try sending an abuse notice to the non-existent

North Korean ISPs. They could,

The Web is abuzz with news reports regarding the ongoing DDoS (distributed denial of service

attack)

The attacks which originally took off in the 4th of July weekend, target 26 Sourth Korean and

American government sites and financial institutions.

The W32.Dozer comes in the form of an email attachment

9150

Upon execution the trojan attempts to download the list of targets from three apparently com-

promised servers based in Germany, the U.S and Austria.

Profiling "Nedasites" - A DDoS Attack Tool Campaign Aiming to Target Iran Prior to

the 2009 Election - An OSINT Analysis (2021-07-11 22:06)

[1]

9151

Hit:241 | Received:2.43MB | Speed:94.2KB/s | Limit:1.45MB/s

I've recently stumbled upon a unique DDoS tool which is basically enticing users into downloading it and launching DDoS attacks against a pre-defined list of Iran-based government and various other Iran-based targets which appears to have been originally released during the 2009 election in Iran.

In this post I'll provide actionable intelligence and discuss in-depth the campaign including the actual tool and provide the actual list of targeted URLs including the actual MD5 for the malicious DDoS tool and discuss in-depth the actual crowd-sourcing DDoS campaign which was originally lauched during the 2009 election in Iran.

It appears that back in 2009 a tiny group of folks including companies actually organized an online spree to help and support Iran's activists and protestors with technologies and access to free service which basically violates the law and should be considered a dangerous precendent

in the context of assisting Iran-based activists and protestors. Therefore I've decided to take a

deeper look inside the trend that took place internationally back in the 2009 Iran-based election

and offer practical and relevant technical and actionable intelligence information on the actual

infrastructure behind the campaign including its participants.

Related domains and URLs known to have been involved in the campaign:

Something else that’s also worth emphasizing on in terms of the Iran 2009 election is that the

U.K’s GCHQ has also been busy attempting to track down protestors including activists and

has been busy working on an election specific and GCHQ owned URL shortening service which

I managed to profile and expose [3]here including the following still active Twitter accounts

and URLs known to have been involved in the GCHQ campaign to monitor and track down Iran

2009 election protesters and activists:

Two Persons on the U.S Secret Service Most Wanted Cybercriminals List Run a Managed Android Malware Enterprise Including a Black Energy DDoS Botnet - An OSINT Analysis (2021-07-27 02:07)

[1]

Dear blog readers,

This is Dancho. In this post I'll provide actionable intelligence on two individuals on the U.S Secret Service's Most Wanted Cybercriminals list in particular - [2]Oleksandr Vitalyevich Ieremenko including [3]Danil Potekhin for the purpose of assisting U.S

Law Enforcement on its way

to track down and prosecute the individuals behind these campaigns.

In this analysis I'll offer actionable intelligence on the fact that the first individual Oleksandr

Vitalyevich Ieremenko is currently running a profitable managed android malware botnet busi-

ness using the - hxxp://agressivex.com domain for his business and is currently on the U.S

Sanctions List as well.

Personally Identifiable Information Regarding Various Internationally Recognized Cyber Threat Actors - A 2021 Compilation - Free Download! (2021-07-31 09:32)

An image is worth a thousand words.

Go though my 230 pages 2021 compilation on some of the most high-profile and popular cybercrime gangs and cybercriminals internationally in the form of a cyber attack and cyber threat actor attribution information which could greatly improve your vendor’s or organization’s situa-

tional awareness in the world of cybercrime including cyber threat actor attribution campaigns.

Grab a copy from [1]here.

Approach me at dancho.danchev@hush.com in case you’re interested in discussing with me

your cyber threat actor attribution or cyber attack or campaign attribution requirements and I

xakep @ carding.ws

would be happy to respond as soon as possible and assist with me knowledge and expertise in

the field.

Stay tuned!

April 9

Hi 9:07

Нужен обмен 9:07

Я с xss 9:07

привет 10:58

какое направление вас интересует 13:11

Рубли перевод usdt 15:38

на какую сумму? 15:39

20000 15:42

Сколько usdt будет? 15:42

5536 9138 7184 5901

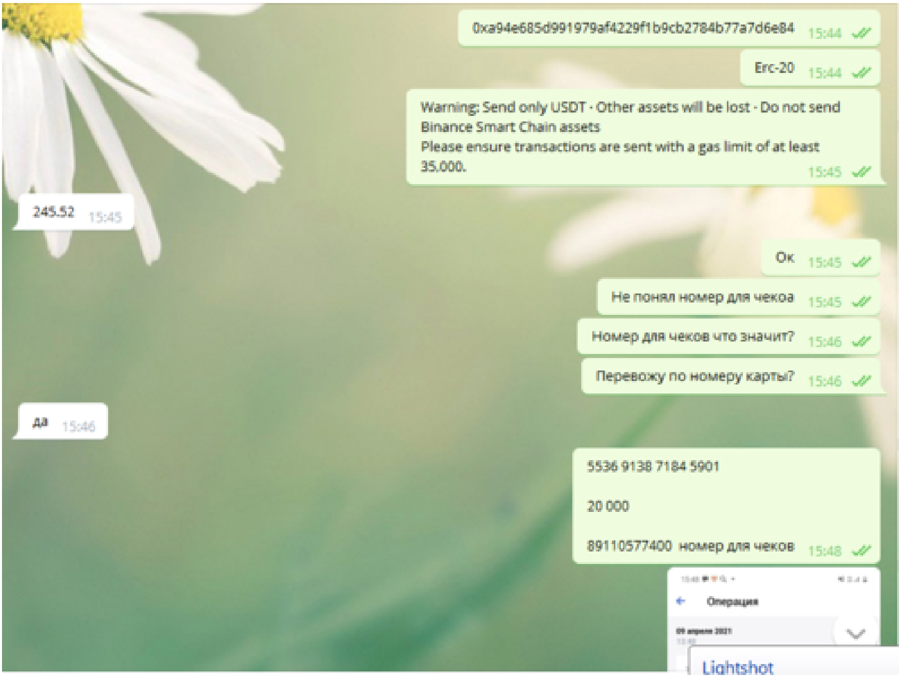
20 000

89110577400 номер для чеков 15:43

сейчас посчитаю 15:43

0xa94e685d991979af4229f1b9cb2784b77a7d6e84 15:4

Erc-20



0xa94e685d991979af4229f1b9cb2784b77a7d6e84 15:44

Erc-20 15:44

Warning: Send only USDT - Other assets will be lost - Do not send Binance Smart Chain assets
Please ensure transactions are sent with a gas limit of at least 35.000. 15:45

245.52 15:45

Ок 15:45

Не понял номер для чекоа 15:45

Номер для чеков что значит? 15:46

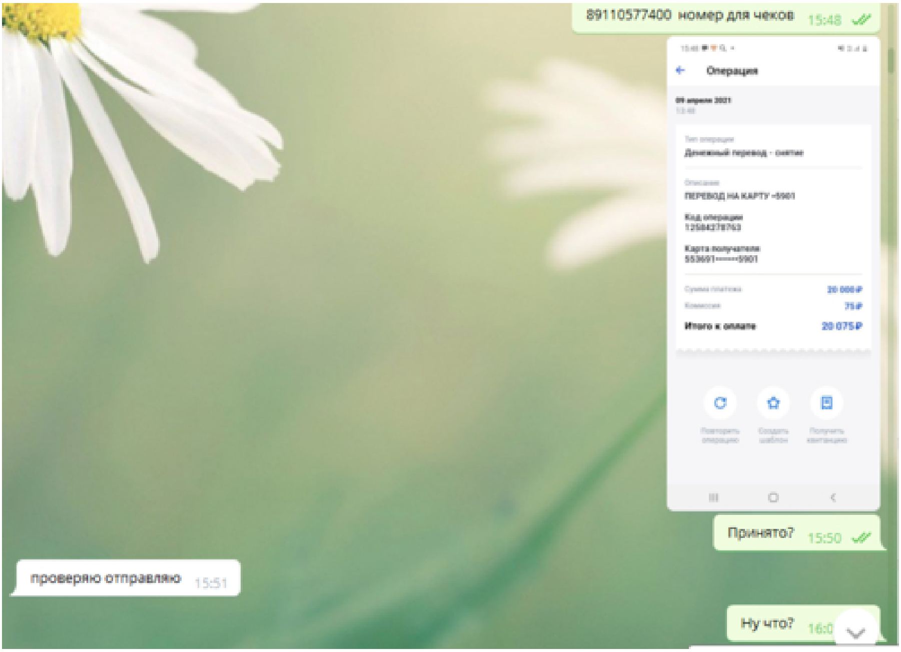
Перевожу по номеру карты? 15:46

да 15:46

5536 9138 7184 5901

20 000

89110577400 номер для чеков 15:48



89110577400 номер для чеков 15:48

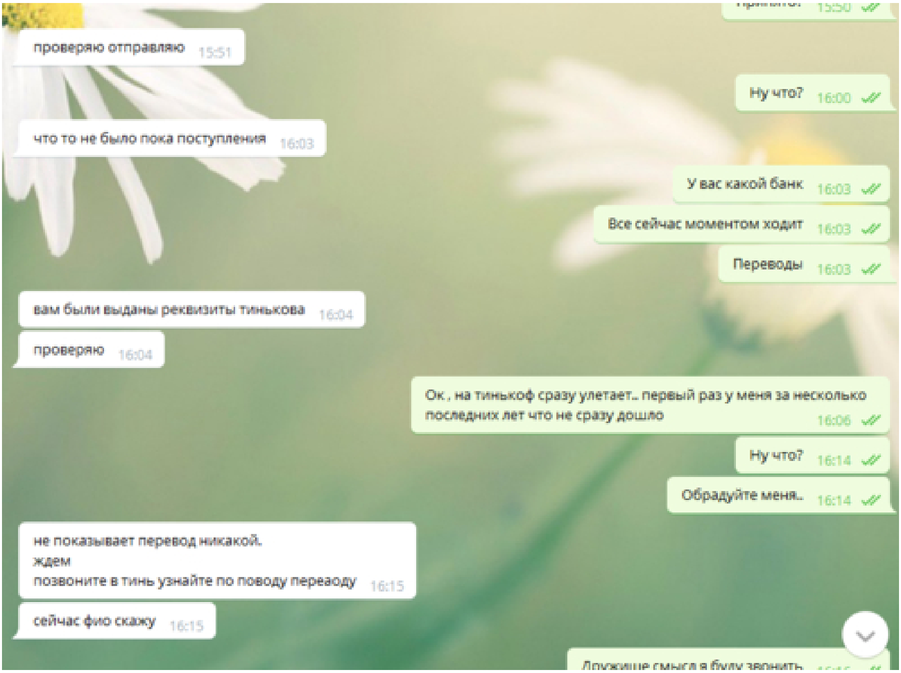
Ну что? 16:0



Принято? 15:50

проверяю отправляю 15:51

Ну что? 16:00

что то не было пока поступления 16:03

У вас какой банк 16:03

Все сейчас моментом ходит 16:03

Переводы 16:03

вам были выданы реквизиты тинькова 16:04

проверяю 16:04

Ок , на тинькоф сразу улетает.. первый раз у меня за несколько последних лет что не сразу дошло 16:06

Ну что? 16:14

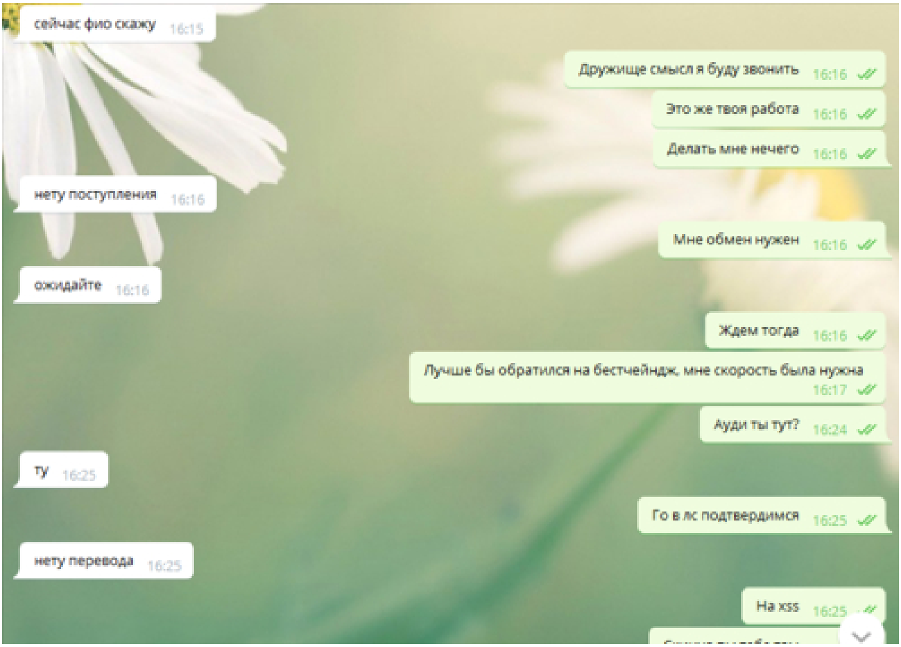
Обрадуйте меня.. 16:14

не показывает перевод никакой.
ждем
позвоните в тинь узнайте по поводу переаоду 16:15

сейчас фио скажу 16:15

Дружище смысла я буду звонить

9197



сейчас фио скажу 16:15

Дружище смысл я буду звонить 16:16

Это же твоя работа 16:16

Делать мне нечего 16:16

нету поступления 16:16

Мне обмен нужен 16:16

ожидайте 16:16

Ждем тогда 16:16

Лучше бы обратился на бестчейндж, мне скорость была нужна 16:17

Ауди ты тут? 16:24

ту 16:25

Го в лс подтвердимся 16:25

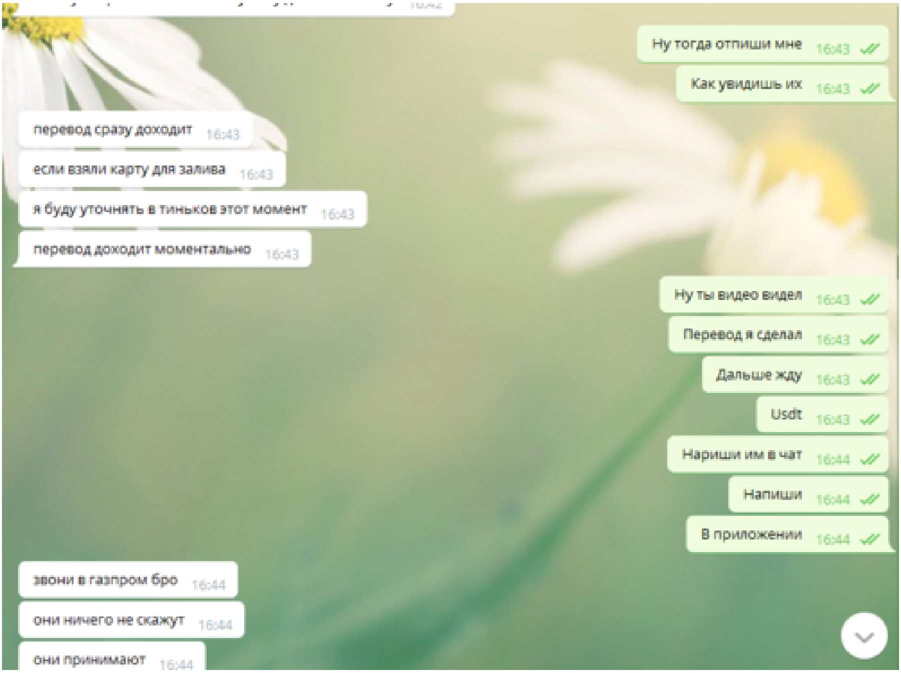
Увидел? 16:37

грузится 16:37

Вот квиташка 16:4

я могу отправить только как увижу деньги на счету



Ну тогда отпиши мне 16:43

Как увидишь их 16:43

перевод сразу доходит 16:43

если взяли карту для залива 16:43

я буду уточнять в тиньков этот момент 16:43

перевод доходит моментально 16:43

Ну ты видео видел 16:43

Перевод я сделал 16:43

Дальше жду 16:43

Usdt 16:43

Нарищи им в чат 16:44

Напиши 16:44

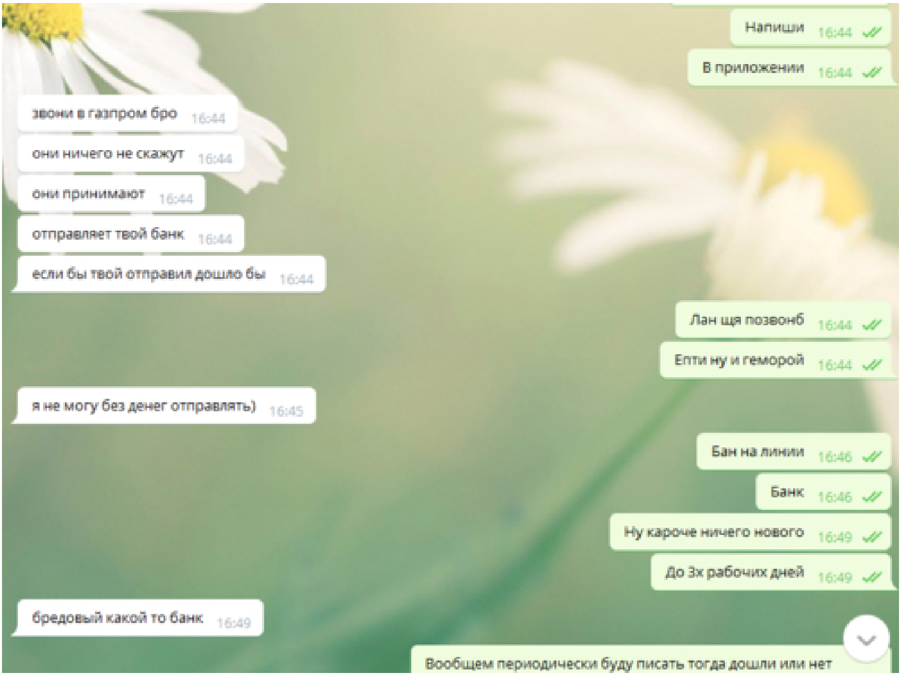
В приложении 16:44

звони в газпром бро 16:44

они ничего не скажут 16:44

они принимают 16:44

9200



Напиши 16:44

В приложении 16:44

звони в газпром бро 16:44

они ничего не скажут 16:44

они принимают 16:44

отправляет твой банк 16:44

если бы твой отправил дошло бы 16:44

Лан щя позвонб 16:44

Епти ну и геморой 16:44

я не могу без денег отправлять) 16:45

Бан на линии 16:46

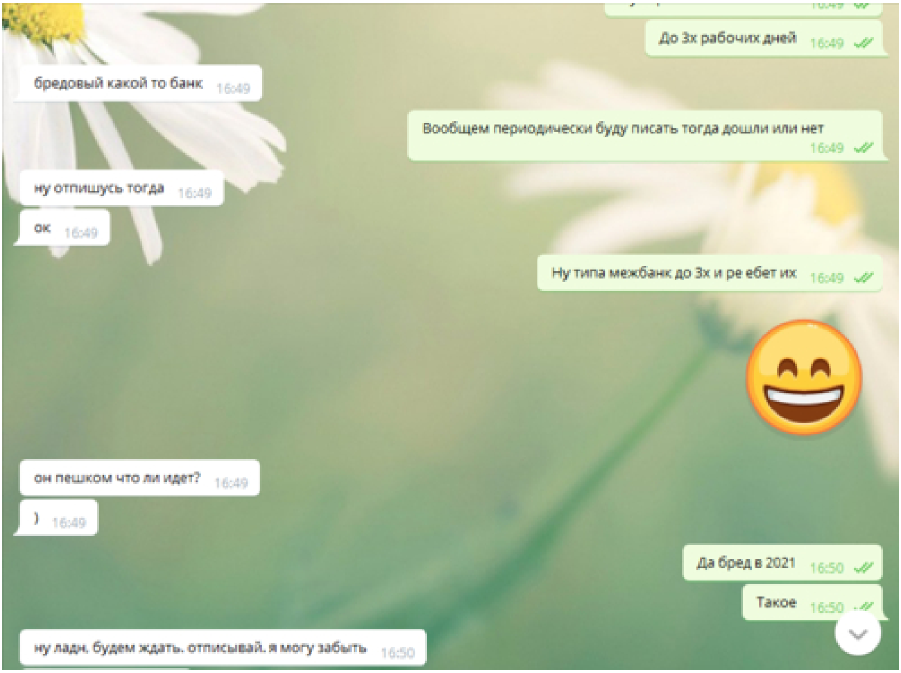
Банк 16:46

Ну кароче ничего нового 16:49

До 3х рабочих дней 16:49

бредовый какой то банк 16:49

Вообщем периодически буду писать тогда дошли или нет



До 3х рабочих дней 16:49

бредовый какой то банк 16:49

Вообщем периодически буду писать тогда дошли или нет 16:49

ну отпишусь тогда 16:49

ок 16:49

Ну типа межбанк до 3х и ре ебет их 16:49

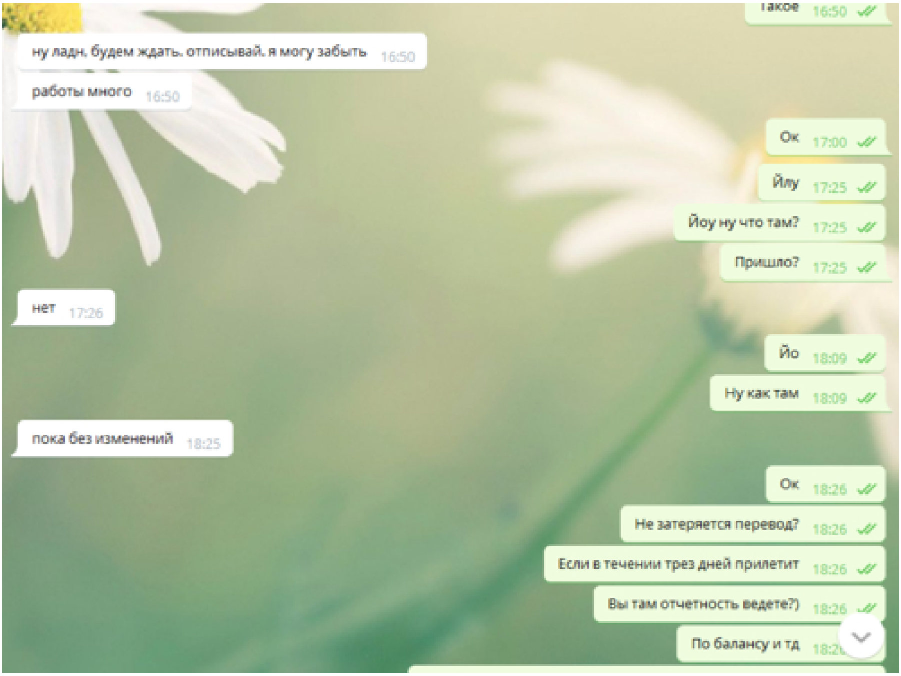
он пешком что ли идет? 16:49

) 16:49

Да бред в 2021 16:50

Такое 16:50

ну ладн, будем ждать. отписывай. я могу забыть 16:50



Такое 16:50

ну ладн, будем ждать. отписывай. я могу забыть 16:50

работы много 16:50

Ок 17:00

Йоу 17:25

Йоу ну что там? 17:25

Пришло? 17:25

нет 17:26

Йо 18:09

Ну как там 18:09

пока без изменений 18:25

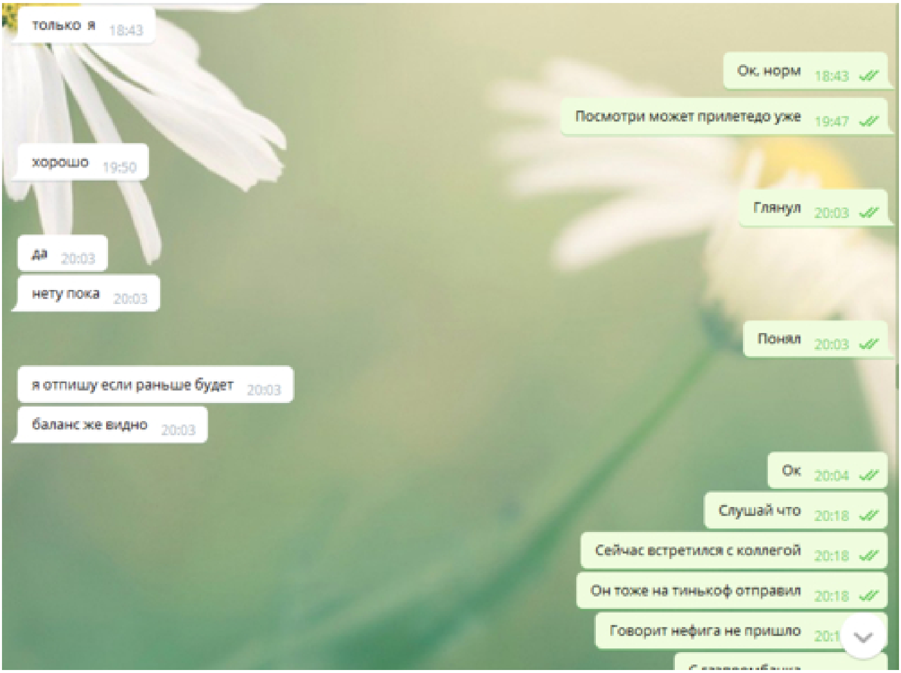
Ок 18:26

Не затеряется перевод? 18:26

Если в течении трез дней прилетит 18:26

Вы там отчетность ведете?) 18:26

По балансу и тд 18:2



только я 18:43

Ок, норм 18:43

Посмотри может прилетедо уже 19:47

хорошо 19:50

Глянул 20:03

да 20:03

нету пока 20:03

Понял 20:03

я отпишу если раньше будет 20:03

баланс же видно 20:03

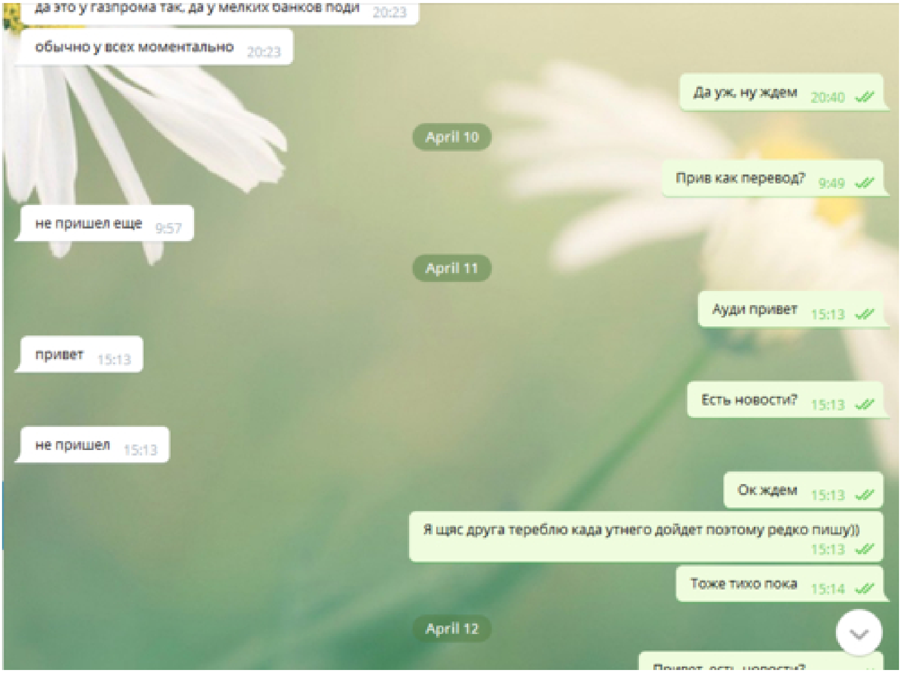
Ок 20:04

Слушай что 20:18

Сейчас встретился с коллегой 20:18

Он тоже на тинькоф отправил 20:18

Говорит нефига не пришло 20:1



да это у газпрома так, да у мелких банков поди 20:23

обычно у всех моментально 20:23

Да уж, ну ждем 20:40

April 10

Прив как перевод? 9:49

не пришел еще 9:57

April 11

Ауди привет 15:13

привет 15:13

Есть новости? 15:13

не пришел 15:13

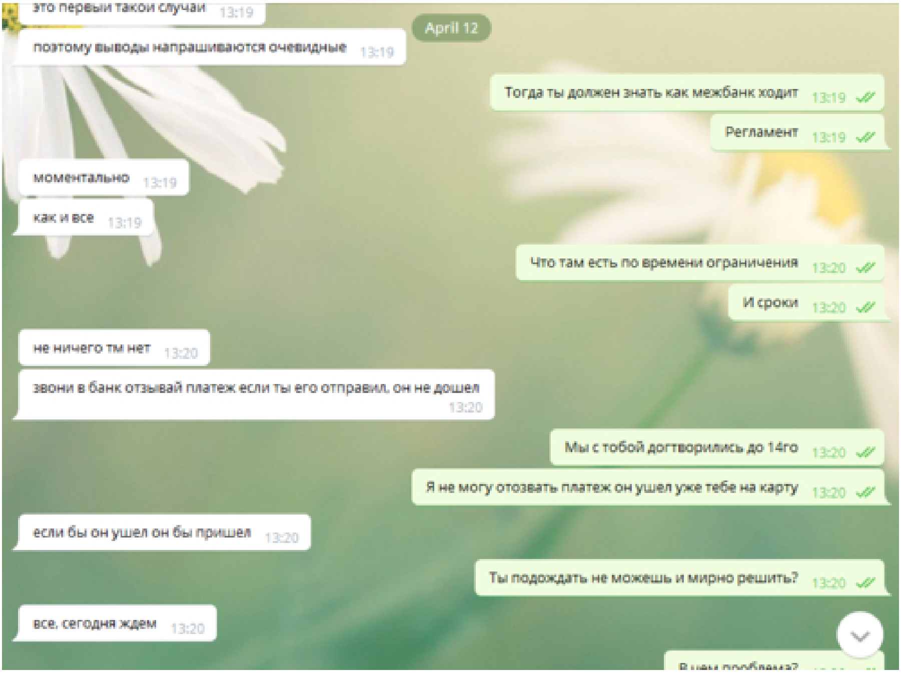
Ок ждем 15:13

Я щяс друга тереблю када утнего дойдет поэтому редко пишу)) 15:13

Тоже тихо пока 15:14

April 12

Привет, есть новости?



это первый такой случай 13:19

April 12

поэтому выводы напрашиваются очевидные 13:19

Тогда ты должен знать как межбанк ходит 13:19

Регламент 13:19

моментально 13:19

как и все 13:19

Что там есть по времени ограничения 13:20

И сроки 13:20

не ничего тм нет 13:20

звони в банк отзывай платеж если ты его отправил. он не дошел 13:20

Мы с тобой догтворились до 14го 13:20

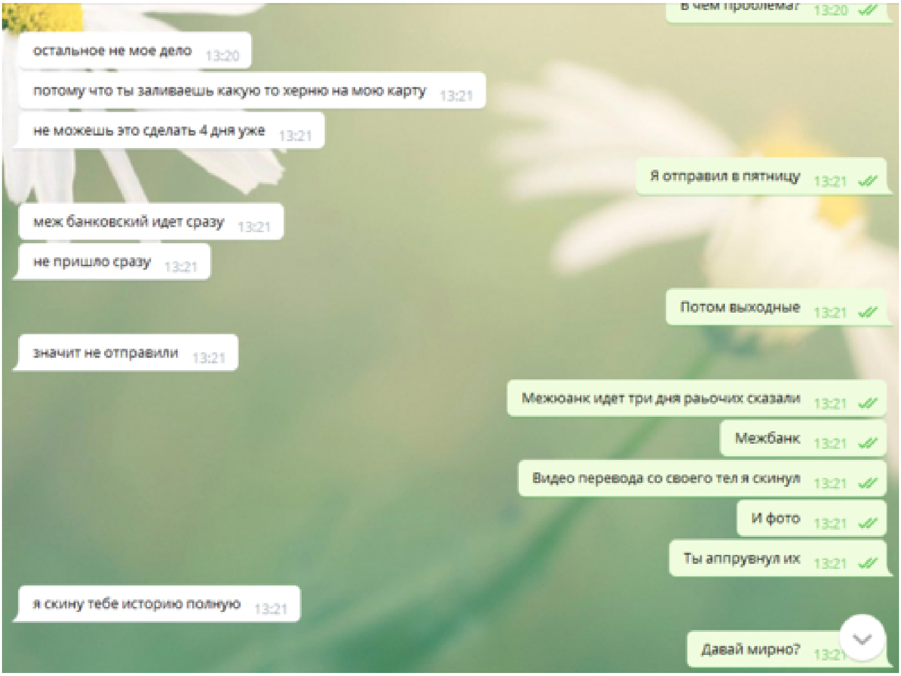
Я не могу отозвать платеж он ушел уже тебе на карту 13:20

если бы он ушел он бы пришел 13:20

Ты подождать не можешь и мирно решить? 13:20

все. сегодня ждем 13:20

В чем проблема?



В чем проблема? 13:20

остальное не мое дело 13:20

потому что ты заливаешь какую то херню на мою карту 13:21

не можешь это сделать 4 дня уже 13:21

Я отправил в пятницу 13:21

меж банковский идет сразу 13:21

не пришло сразу 13:21

Потом выходные 13:21

значит не отправили 13:21

Межюанк идет три дня раьочих сказали 13:21

Межбанк 13:21

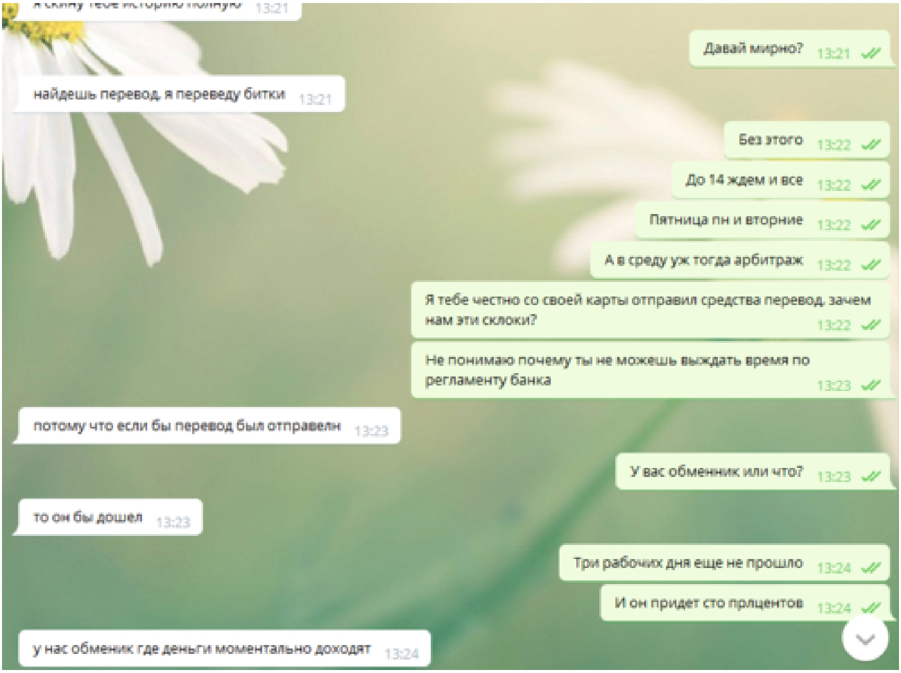
Видео перевода со своего тел я скинул 13:21

И фото 13:21

Ты аппрувнул их 13:21

я скину тебе историю полную 13:21

Давай мирно? 13:21



я скину тебе историю полную 13:21

Давай мирно? 13:21

найдешь перевод, я переведу битки 13:21

Без этого 13:22

До 14 ждем и все 13:22

Пятница пн и вторние 13:22

А в среду уж тогда арбитраж 13:22

Я тебе честно со своей карты отправил средства перевод, зачем нам эти склоки? 13:22

Не понимаю почему ты не можешь выждать время по регламенту банка 13:23

потому что если бы перевод был отправелн 13:23

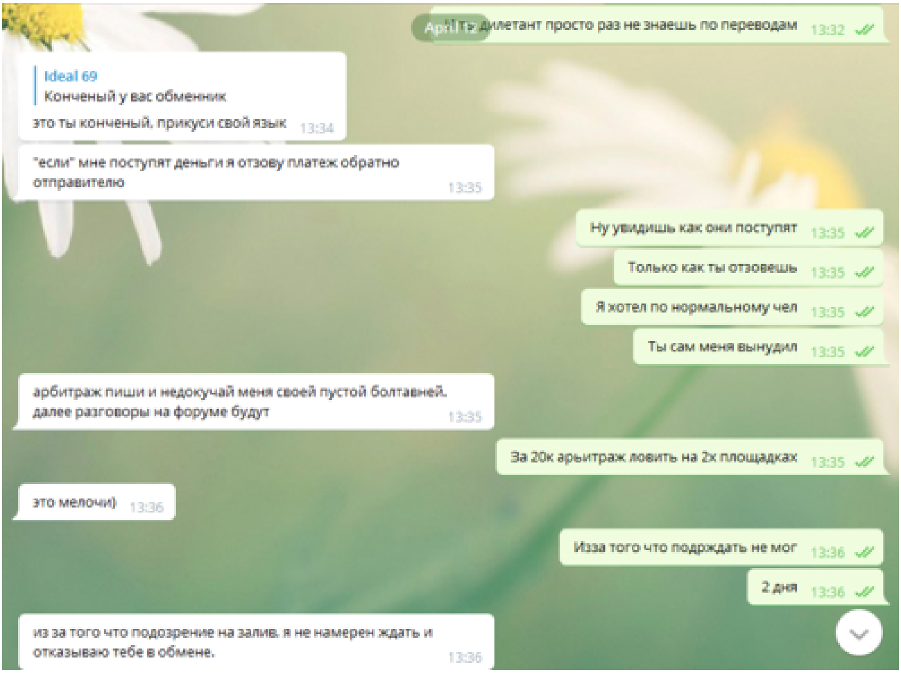
У вас обменник или что? 13:23

то он бы дошел 13:23

Три рабочих дня еще не прошло 13:24

И он придет сто прлцентов 13:24

у нас обменик где деньги моментально доходят 13:24



April 12

ты дилетант просто раз не знаешь по переводам 13:32

Ideal 69
Конченый у вас обменник

это ты конченый. прикуси свой язык 13:34

"если" мне поступят деньги я отзову платеж обратно отправителю 13:35

Ну увидишь как они поступят 13:35

Только как ты отзовешь 13:35

Я хотел по нормальному чел 13:35

Ты сам меня вынудил 13:35

арбитраж пиши и недокучай меня своей пустой болтавней. далее разговоры на форуме будут 13:35

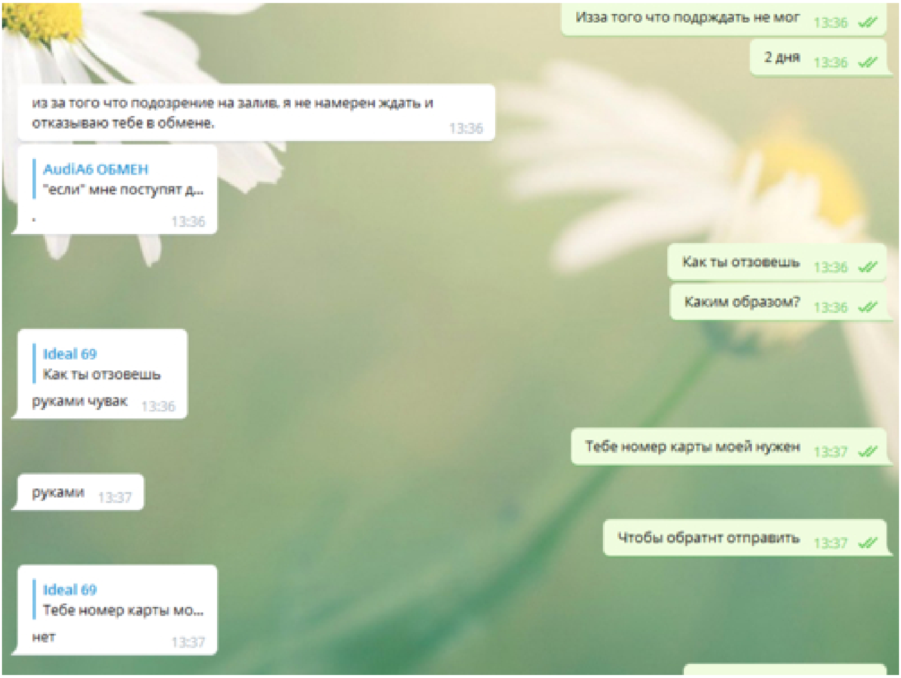
За 20к арьитраж ловить на 2х площадках 13:35

это мелочи) 13:36

Изза того что подрждать не мог 13:36

2 дня 13:36

из за того что подозрение на залив. я не намерен ждать и отказываю тебе в обмене. 13:36



Изза того что подрждать не мог 13:36

2 дня 13:36

из за того что подозрение на залив. я не намерен ждать и отказываю тебе в обмене. 13:36

AudiA6 ОБМЕН
"если" мне поступят д...

. 13:36

Как ты отзовешь 13:36

Каким образом? 13:36

Ideal 69
Как ты отзовешь

руками чувак 13:36

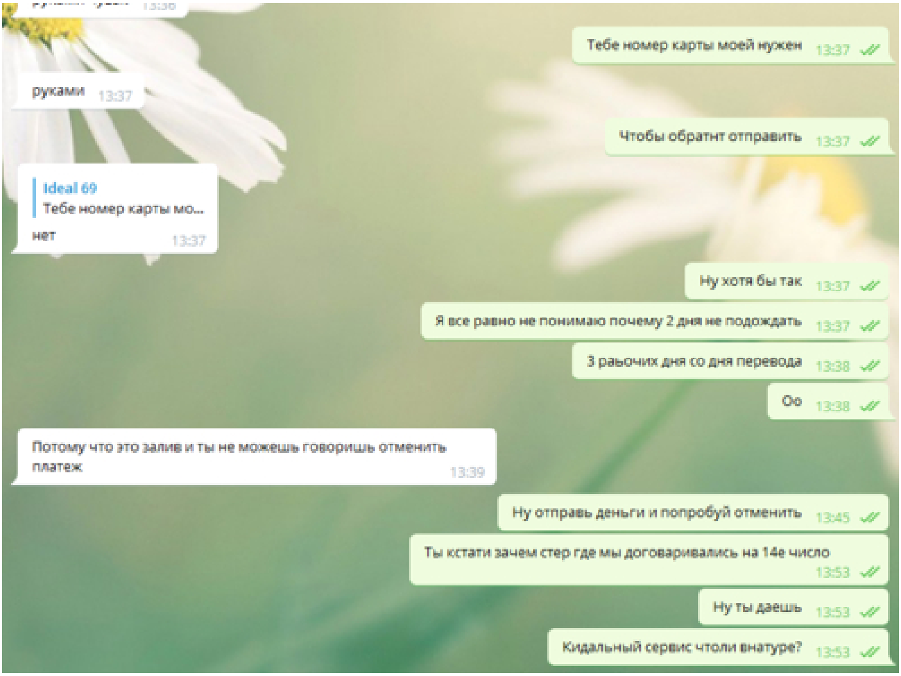
Тебе номер карты моей нужен 13:37

руками 13:37

Чтобы обратнт отправить 13:37

Ideal 69
Тебе номер карты мо...

нет 13:37



Тебе номер карты моей нужен 13:37

руками 13:37

Чтобы обратнт отправить 13:37

Ideal 69
Тебе номер карты мо...
нет 13:37

Ну хотя бы так 13:37

Я все равно не понимаю почему 2 дня не подождать 13:37

3 раьочих дня со дня перевода 13:38

Оо 13:38

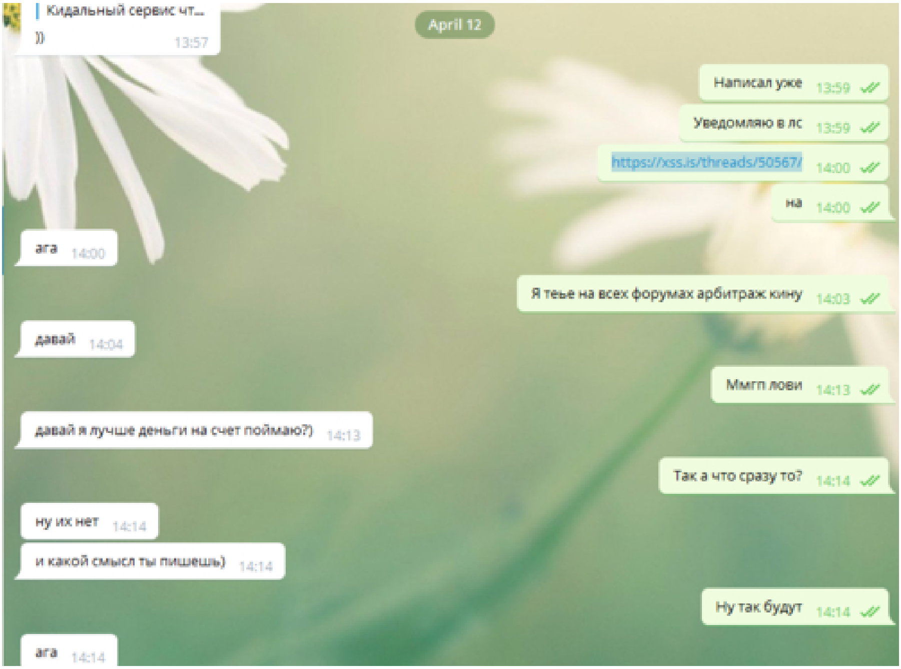
Потому что это залив и ты не можешь говоришь отменить платеж 13:39

Ну отправь деньги и попробуй отменить 13:45

Ты кстати зачем стер где мы договаривались на 14е число 13:53

Ну ты даешь 13:53

Кидальный сервис чтоли внатуре? 13:53



Кидальный сервис чт...
)) 13:57

April 12

Написал уже 13:59

Уведомляю в лс 13:59

https://xss.is/threads/50567/ 14:00

на 14:00

ага 14:00

Я теье на всех форумах арбитраж кину 14:03

давай 14:04

Ммгп лови 14:13

давай я лучше деньги на счет поймаю?) 14:13

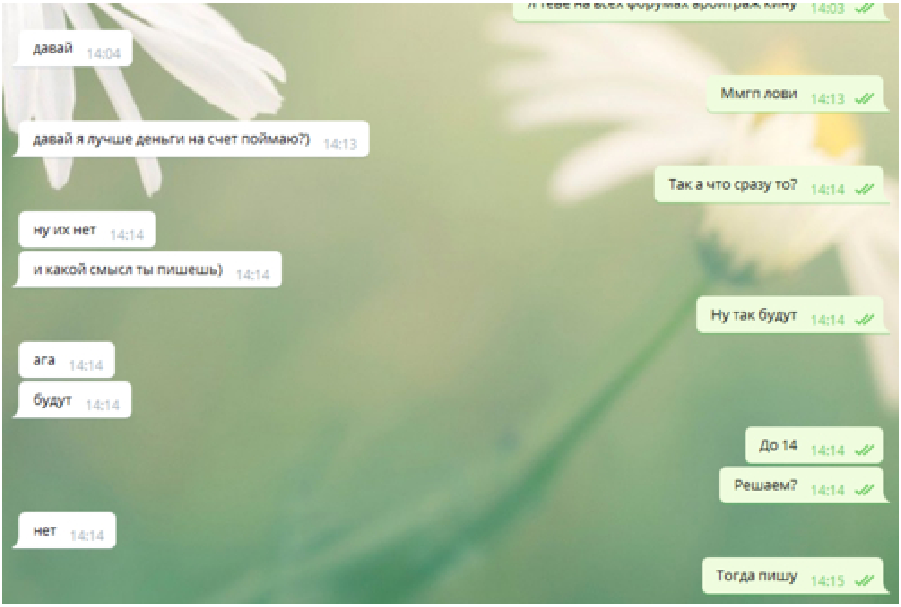
Так а что сразу то? 14:14

ну их нет 14:14

и какой смысл ты пишешь) 14:14

Ну так будут 14:14

ага 14:14



Я тебе на всех форумах арбитраж кину 14:03

давай 14:04

Ммгп лови 14:13

давай я лучше деньги на счет поймаю?) 14:13

Так а что сразу то? 14:14

ну их нет 14:14

и какой смысл ты пишешь) 14:14

Ну так будут 14:14

ага 14:14

будут 14:14

До 14 14:14

Решаем? 14:14

нет 14:14

Тогда пишу 14:15

Exposing HackPhreak Hacking Group - An OSINT Analysis (2021-09-06 18:25)

HackPhreak is a well known U.S based hacking group throughout the 90's which is known to

have been actively using IRC for the purpose of communicating and recruiting new members

including its own Anti-Pedophile organization among the Internet's first community-driven or-

ganization to fight online child pornography launched by a popular and well-known hacking

group including the following high-profile members of the group:

HackPhreak Group Members Include:

Bronc Buster, Lothos, Overdose, Truedog, x-empt, phriction, ntwakO, Gridmark, Phemetrix,

Mnemonic, t0ucht0ne, muted, espionage, mercs, kanuchsa, Morbid Angel, Lucii, optiklenz, cap

n crunch, tip, icer, sreality, Zyklon, havoc, HyperLogik, Defiant, Duncan Silver. Slfdstrct, lothos

Group's founder: Charlie Wellborne - rloxley@hackphreak.org

Personally identifiable information for Digital Ebola:

Digital Ebola - Email: digi@legions.org

- Kris Oosthoek

Analyzing Chinese Information Operations (InfoOps) with Threat Intelligence

Che Chang, Silvia Yeh

Cyber Threat Intelligence Summit 2021

Che Chang
Silvia Yeh
TEAMTS
SANS
SUMMITS

Hi everyone,

I recently came across to the entire portfolio of [2]SANS Threat Intelligence Summit presen-

tations which are currently online at YouTube and I've decided to take the time and effort to

go through them and offer practical and relevant threat intelligence and OSINT advice and recommendations which I hope will come handy to the presenters including anyone currently

working in the field or interested in making an impact as a threat intelligence analyst.

[3]

Sample presentations from the Summit include:

- [4]Analyzing Chinese Information Operations with Threat Intelligence - this is a pretty informative presentation that offers practical and relevant Information Operations advice including

a pretty decent case study on the topic of a high-profile information leak campaign based in

China

- [5]Collections and Elections: How The New York Times built an intel collections program in

2020 - this is a pretty informative presentation that offers an in-depth and relevant advice on

building threat intelligence capabilities in terms of building a threat intelligence team including

a first person experience in the process of building a threat intelligence program

- [6]Better Than Binary: Elevating State Sponsored Attribution via Spectrum of State Responsibility - this is a pretty informative presentation that offers a very good overview of various

threat intelligence techniques including collection enrichment and actual technical collection

advice

What the presenters should keep in mind when doing their research and homework is to actually

implement a threat intelligence "rock star" mentality when doing research and actually attempt

to take a step higher in their research and make disruption and actually take both active and

proactive measures and actions against specific cyber threat actors and adversaries.

I’ve been recently working on several articles on the topic of threat intelligence and I came up

with a proper article which I’ll share in this post with the idea to improve my reader’s situational

awareness on the topic eventually improving the way they work and do threat intelligence

gathering online.

—————————-

00. The Basics of Threat Intelligence - A Novice Cyber Threat Researcher’s Guide

In this article we’ll aim to successfully provide an in-depth overview of the Threat Intelligence

Gathering process including various methodologies for processing enriching and dissemination

including active case studies and in-depth overview of various standards and technologies

including an in-depth overview of various Threat Intelligence Gathering tools and techniques.

This article aims to successfully provide readers with general and in-depth overview of the

Threat Intelligence Gathering process including live and relevant examples including in-depth

overview of various Threat Intelligence Gathering tools and techniques.

This article is aiming to target a diverse set of audience including security practitioners information security professionals threat intelligence analysts and organizations seeking an informative and educational approach further understanding the basics of threat intelligence including an in-depth overview of various threat intelligence methodologies and practices including a variety of in-depth case studies related to threat intelligence gathering including an in-depth discussion on various methodologies and threat intelligence gathering tools.

Overview of Threat Intelligence

Threat intelligence is a multi-disciplinary approach to collecting processing and disseminating actionable threat intelligence for the purpose of ensuring that an organizations security defense is actively aware of threats facing its infrastructure so that an adequate and cost-effective strategy can be formulated to ensure the confidentiality integrity and availability of the information. Threat Intelligence is the process of collecting processing and disseminating actionable intelligence for the purpose of ensuring that an organizations infrastructure remains properly secured from threats facing its infrastructure. The collection phrase can be best described as the process of obtaining processing and analyzing actionable threat intelligence for the purpose of processing and disseminating the processed data. The collection phrase consists of actively obtaining real-time threat intelligence data for the purpose of processing

enriching and assessing the data for the purpose of processing and disseminating the data.

9261

The collection phase consists of active monitoring of sources of interest including various public

and privately closed community sources for the purpose of establishing an active threat intelligence

gathering program foundation. The collection phrase consists of assessing and selecting

a diverse set of primary and secondary public and privately closed sources for the purpose of

establishing a threat intelligence gathering model. The collection phase consists of assessing

and selecting primary and secondary public and privately closed sources for the purpose of

establishing an active threat intelligence collection model. The collection phase consists of

assessing the primary secondary public and privately closed sources for the purpose of establishing

an active threat intelligence gathering collection model. The collection phase consists

of assessing and selecting the primary and secondary public and privately closed sources for

the purpose of establishing the foundations of the collection phrase.

What analysts should keep in mind when doing threat intelligence collection including the actual

Technical Collection process in terms of obtaining access to actual raw threat intelligence

information which includes domains URLs and MD5’s that also includes raw cybercrime forum

information or actual copies of a cybercrime friendly forum community for the purpose of building

a capacity driven threat intelligence program in terms of profiling and applying basic cyber

attack attribution methodologies is to have a well trained staff force which could easily and

efficiently obtain access to both real-time current and historical threat intelligence information

using proprietary and publicly accessible sources for the purpose of enriching the information

and actually coming up with new and novel research and cyber attack trends analysis.

The processing phrase consists of actively selecting processing tools and methodologies for

the purpose of setting the foundations for a successful processing of the data. The processing

phase consists of actively processing the threat intelligence gathering collected data for the

purpose of establishing the foundations for a successful processing of the data. The processing

phase consists of collecting the processed data for the purpose of establishing the foundations

for a successful processing of the collected data for the purpose of processing and enriching the

processed data. The processing phase consists of active collection enrichment and processing

of the collected data for the purpose of active processing of the collected data. The processing

phase consists of active selection of primary and secondary public and privately closed sources for the purpose of processing the collected data for the purpose of enriching and processing the collected data. The processing phase consists of active real-time aggregation of actionable threat intelligence data for the purpose of establishing the foundations of active processing and enrichment of the processed data for the purpose of processing and enriching of the processed data.

What analysts should keep in mind when doing threat intelligence processing is the relevance and timeliness of the actual information including the quality of the source including public and proprietary sources where the analysts should keep in mind that a huge portion of the information that could properly protect an enterprise or a vendor online is already publicly accessible and should be properly processed including possibly enriched in terms of coming up with the big picture in terms of the actual information including to come up with novel and new cyber attack attribution research. Sticking to major threat intelligence sharing and dissemination standards should be crucial in terms of feeding the publicly accessible and processed information into a threat intelligence processing system that also includes a cyber attack attribution process for the purpose of coming up with new and novel research including actual cyber attack attribution research using a researcher's or an organization's own methodology.

The dissemination phase consists of active processing and dissemination of the processed data for the purpose of communicating the actionable intelligence for the purpose of ensuring that an organizations defense is actively aware of the threats facing its infrastructure and security defense mechanisms. The dissemination phase consists of active distribution of the processed and enriched actionable intelligence for the purpose of active dissemination of the processed and enriched data. The dissemination phase consists of active dissemination and enrichment of the processed data for the purpose of establishing the foundations of an active threat intelligence gathering process. The dissemination phase consists of active communication and distribution of the processed and enriched data for the purpose of communicating the processed and enriched data across the organizations security defense mechanisms.

9262

What analysts should keep in mind when disseminating threat intelligence is to always reach out to the proper parties including as many sources of information as possible for the purpose of presenting their research and information to the security industry industry and the security community in an in-depth enriched and properly processed way potentially assisting the security industry and the security community on its way to properly attribute a cyber attack or detect new cyber attack trends.

Threat Intelligence Methodologies

Numerous threat intelligence methodologies are currently available for an organization to take advantage of on its way to properly secure its infrastructure taking into consideration a proactive security response. Among the most common data acquisition strategies remains the active data acquisition through forum and communities monitoring including the active monitoring of private forums and communities. Carefully selecting and primary and secondary sources of information is crucial for maintaining the necessary situational awareness to stay ahead of threat facing the organizations infrastructure including the establishment of an active response through an active threat intelligence gathering program. Among the most common threat intelligence acquisition methodologies remains the active data acquisition through primary and secondary forums and communities including the data acquisition through private and secondary community based type of acquisition platforms.

Among the most common threat intelligence data acquisition strategies remains the active team collaboration in terms of data acquisition data processing and data dissemination for the purpose of establishing an active organizations security response proactively responding to the threats facing an organizations infrastructure. Among the most common data acquisition strategies in terms of threat intelligence gathering methodologies remains the active enrichment of the sources of information to include a variety of primary and secondary sources including private and community based primary and secondary sources.

Proactive Threat Intelligence Methodologies

Anticipating the emerging threat landscape greatly ensures an organizations successful implementation of a proactive security type of defense ensuring that an organizations security defense remains properly protected from the threats facing its infrastructure. Properly understanding the threat landscape greatly ensures that a proactive response can be properly implemented for the purpose of ensuring that an organizations security defense remains properly protected from the threats facing its infrastructure. Taking into consideration the data obtained through an active threat intelligence gathering program greatly ensures that a proactive security response can be adequately implemented to ensure that an organizations security defense remains properly protected from the threats facing its infrastructure.

Among the most common threat acquisition tactics remains the active understanding of the threats facing an organizations security infrastructure to ensure that an adequate response can be properly implemented ensuring that an organizations defense remains properly protected from the threats facing its infrastructure. Among the most common threat intelligence gathering methodologies remains the active team collaboration to ensure that an active enrichment

9263

process can be properly implemented further ensuring that an organizations defense can be properly protected from the threats facing its infrastructure. Based on the information acquired through an active threat intelligence gathering acquisition processing and dissemination program further ensuring that an organizations infrastructure can be properly protected from the threats facing its infrastructure.

The Future of Threat Intelligence

The future of threat intelligence gathering largely relies on a successful set of threat intelligence gathering methodologies active data acquisition processing and dissemination strategies including the active enrichment of the processed data for the purpose of ensuring that an organizations security defense remains properly in place. The future of threat intelligence largely relies on the successful understanding of multiple threat vectors for the purpose of establishing an organizations security defense. Relying on a multi-tude of enrichment processes including the active establishment of an active threat intelligence gathering acquisition processing and dissemination program greatly ensures that a proactive team-oriented approach can be implemented to ensure that an organizations security defense remains properly protected from the threats facing its infrastructure.

---

including the following second article which I've been working on in terms of using OSINT in

combination with threat intelligence to do a better research online and actually come up with

novel and never-published research and cyber threat actor research and analysis:

---

00. Basics of OSINT in the Context of Fighting Cybercrime - The Definite Beginner's Guide

"*What use are they? They've got over 40,000 people over there reading newspapers.* " - President Nixon

This introductory guide into the world of OSINT is part of an upcoming series of articles aiming to

assist both novice and experienced security practitioners including analysts for the purpose of

entering the world of OSINT for cybercrime research and aims to offer a high-profile and never-

published before practical and relevant in today's nation-state and rogue cyber adversaries

Internet and cybercrime ecosystem whose purpose general overview and introductory material

and training course material for novice beginners including advanced Internet users hackers

security consultants analysts including researchers who are interested in exploring the world of OSINT (Open Source Intelligence) for the purpose of making a difference doing their work in

a better and more efficient way including to actually be fully capable and equipped to catch

the bad guys online including to monitor and track them down to the point of building the big

picture of their fraudulent and rogue online activities. The course including the actual learning

and training material is courtesy of Dancho Danchev who is considered one of the most popular

security bloggers threat intelligence analysts and cybercrime researchers internationally and

within the security industry.

The primary purpose behind this guide is to summarize Dancho Danchev's over a decade of

active passive and active including actionable threat intelligence and OSINT research type of

experience including cybercrime research type of experience where the ultimate goal would

be to empower the student or the organization taking this course into better doing their online

research work including to be fully capable of tracking down and monitoring the rogue and

malicious online activities of the bad guys online where the ultimate goal would be to better

position and enhance your cyber attack or malicious threat actor cyber campaign attribution

skills ultimately improving your work activities and actually empowering you to learn how to

do OSINT for good and most importantly to track down and monitor the bad guys.

Introduction

In a world dominated by sophisticated cybercrime gangs and nation-state sponsored and tolerated rogue cyber actors the use of OSINT (Open Source Intelligence) is crucial for building the big picture in the context of fighting cybercrime internationally including to actually "connect the dots" in the context of providing personally identifiable information to a closed-group and invite-only LE community including international Intelligence Agencies on their way to track down and prosecute the cybercriminals behind these campaigns.

In this training and learning material Dancho Danchev one of the security industry’s most popular and high-value security blogger and cybercrime researcher will offer an in-depth peek inside the world of OSINT in the context of fighting cybercrime and will provide practical advice examples and case in particular on how he tracked down and shut down the infamous Koobface botnet and continued to supply never-published and released before potentially sensitive and classified information on new cyber threat actors which he continued to publish at his Dancho Danchev’s blog.

Basics of OSINT

OSINT in the context of fighting cybercrime can be best described as the systematic and persistent use of public information for the purpose of building a cyber threat intelligence enriched

data sets and intelligence databases both for real-time situational awareness and historical

OSINT preservation purposes which also include to actually "connect the dots" in cybercrime

gang and rogue cyber actor campaigns and cyber attack type of campaigns. A general ex-

ample would consist of obtaining a single malicious software sample and using it on a public

sandbox to further map the infrastructure of the cybercriminal behind it potentially exposing

the big picture behind the campaign and connecting the dots behind their infrastructure which

would lead to a multi-tude and variety of personally identifiable information getting exposed

which could help build a proprietary cybercrime gang activity database and actually assist LE

in tracking down the prosecuting the cybercriminals behind these campaigns.

" *There's no such thing as new cyber threat actors. It's just new players adopting economic*

and marketing concepts to steal money and cause havoc online. "

The primary idea here is to locate free and public online repositories of malicious software and

to actually obtain a sample which will be later on used in a public sandbox for the purpose of

mapping the Internet-connected infrastructure of the cybercrime gang in question including to

actually elabore more on the ways they attempt to monetize the access to the compromised

host including possibly ways in which they make money including to actually find out what

exactly are they trying to compromise. Possible examples here include VirusTotal or actually

running a malware interception honeypot such as for instance a spam trap which would allow

you to intercept currently circulating in the wild malare campaigns that propagate using email

and actually analyze them in terms of connecting the dots exposing their Internet-connected in-

frastructure and establishing the foundations for a successful career into the world of malicious

software analysis and cybercrime research.

" *Everything that can be seen is already there*".

The next logical step would be to properly assess and analyze the recently obtained sample and

to properly establish the foundation of a "connect the dots" culture within your organization

where the primary goal would be to have researchers and analysts look for clues on their way

to track down and monitor a specific campaign potentially coming up with new and novel cyber

attack attribution research. Visualization is often the key to everything in terms of visualizing

threats and looking for additional clues and possible cyber attack attribution clues where a

popular visualization and threat analysis tool known as Maltego should come into play which

9265

basically offers an advanced and sophisticated way to process OSINT and cybercrime research and threat intelligence type of information and actually enrich it using public and proprietary

sources of information for the purpose of establishing the big picture and actually connecting

the dots for a specific cyber attack campaign.

Among the first things that you should consider before beginning your career in the World

of OSINT is that everything that you need to know about a specific online event a specific

online campaign that also includes the activities of the bad guys online is already out there

in the form of publicly accessible information which should be only processed and enriched

to the point where the big picture for a specific event or a malicious online campaign should

be established using both qualitative and quantitative methodologies that also includes the

process of obtaining access to the actual technical details and information behind a specific

online event or an actual malicious and rogue online campaign.

Among the few key things to keep in mind when doing OSINT including actual OSINT for cyber

attack and cyber campaign attack attribution is the fact that in 99 % of the cases all the col-

lection information that you need in terms of a specific case is already publicly known and is

publicly accessible instead of having to obtain access to a private or a proprietary source of

information and the only thing that you would have to do to obtain access to it is to use the

World’s most popular search engine in terms of collection processing and enrichment.

The second most popular thing to keep in mind when doing OSINT is that you don’t need to obtain access to proprietary even public OSINT tools.

Current State of the Cybercrime Ecosystem

In 2021 a huge number of the threats facing the security industry including vendors and organizations online include RATs (Remote Access Tools) malicious software part of a larger bother malicious and fraudulent spam and phishing emails including client-side exploits and vulnerabilities which have the potential to exploit an organization or a vendor’s end points for the purpose of dropping malware on the affected host including the rise of the ransomware threat which is basically an old fashioned academic concept known as cryptoviral extortion.

With more novice cybercriminals joining the underground ecosystem market segment largely driven by a set of newly emerged affiliate based revenue sharing fraudulent and malicious networks offering financial incentive for participation in a fraudulent scheme it shouldn’t be surprising that more people are actually joining the cybercrime ecosystem potentially causing widespread damage and havoc online.

With cybercrime friendly forums continuing to proliferate it should be clearly evident that more people will eventually join these marketplaces potentially looking for new market segment propositions to take advantage of for the purpose of joining the cybercrime ecosystem and that

more vendors will eventually continue to occupy and launch new underground forum market

propositions for the purpose of promoting and looking for new clients for the services.

In a World dominated by a geopolitically relevant Internet cybercrime ecosystem it shouldn't

be surpising that more international cybercrime gangs will eventually continue to launch new

fraudulent and malicious spam and phishing campaigns that also includes malicious software

campaigns for the purpose of earning fraudulent revenue.

With more affiliate based underground market segment based networks aiming to attract new

uses where they would forward the risk for the actual infection process and fraudulent transac-

tion to the actual user in exchange for offering access to sophisticated bulletproof infrastructure

including advanced and sophisticated malware and ransomware releases it shouldn't be sur-

prising that more people are actually joining these affiliate networks for the purpose of earning

fraudulent revenue in the process of causing havoc and widespread disruption online.

Notice of European data protection law removal from Google Search

To: Webmaster of https://ddanchev.blogspot.com/,

Due to a request under the data protection law in Europe, Google can no longer show one or more pages from your site in Google Search results. This only affects responses to some search queries for names or other personal identifiers that might appear on your pages. Only results on versions of Google's search results for countries applying European data protection law are affected. No action is required from you.

Overall I believe that the presentations from this event are worth watching and worth going

through and I can’t wait to actually participate in the Call for Papers for the upcoming virtual

Summit.

Happy watching!

My Compilations of Personally Identifiable Information Belonging to Multiple International and High-Profile Cyber Threat Actors - An Elaboration (2021-09-20 12:56)

[1]

Awesome!

I just got my first Notice of European Data Protection Law Removal Request for my personal blog in particular for one of my compilations of personally identifiable information. Great stuff!

In Retrospective - The "Office" Circa 2006 Up To Present Day (2021-09-20 13:02)

[1]

Dear blog readers,

This is Dancho. It’s been a while since I’ve last posted a high-quality update and I’ve decided to

post and elaborate on some of my current and upcoming security and hacking projects with the

idea to touch base with the loyal audience that’s been following my research since December,

2005 when I originally this blog and actually feature a personal and never-published before

sample photo of the "office" also known as the "lab" circa 2006 when I originally launched this

blog while working for - [2]https://astalavista.com.

In this post I’ll elaborate more on some of my current and upcoming projects including the

recent re-launch of the original https://astalavista.box.sk which is the original search engine

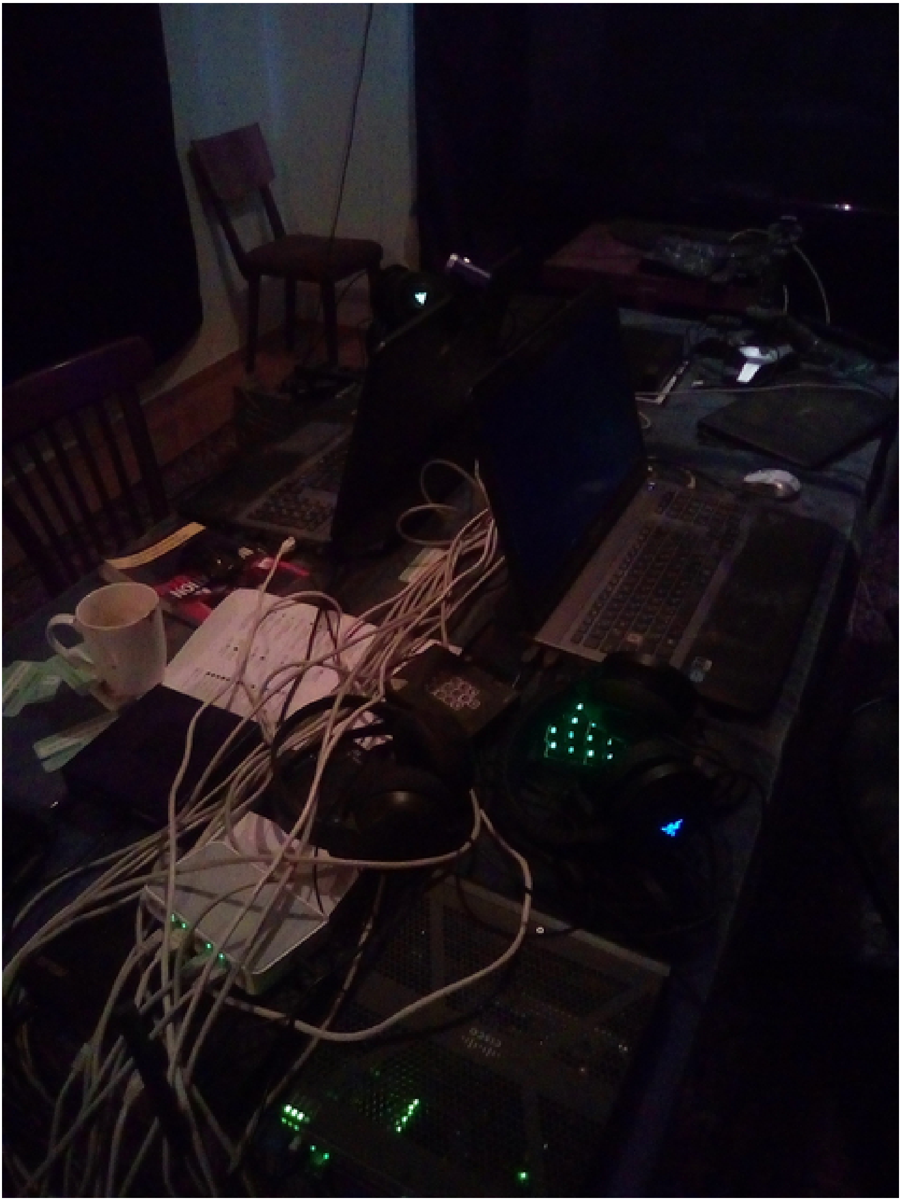
for hackers and security experts circa 1994 under my management including the re-launch of

my personal online E-Shop for Intelligence Deliverables and elaborate more on some of the

cool stuff that we’re doing at one of my current employers which is WhoisXML API including to

discuss in-depth my latest researcher position at [3]https://cybernews.com.

[4]



Ever since my original kidnapping and law enforcement issues circa 2010 I've participated

in a Top Secret GCHQ Program known as "Lovely Horse" which monitors hackers and security

experts for information and "know-how" with my old Twitter account and I've been also recently

quoted in the official press release for the upcoming launch of the new https://linuxsecurity.com

by Dave Wreski with whom I had the privilege to interview for the infamous Astalavista Security

Group Newsletter circa 2003-2006.

I’m also proud to let everyone know that I’ve launched an official Android [5]mobile application

for my personal blog where the idea is to empower everyone with an easy to use Android mobile

application which you can use and catch up with some of my research that I’ve been publishing

at one of the security industry’s leading security publications since December, 2005.

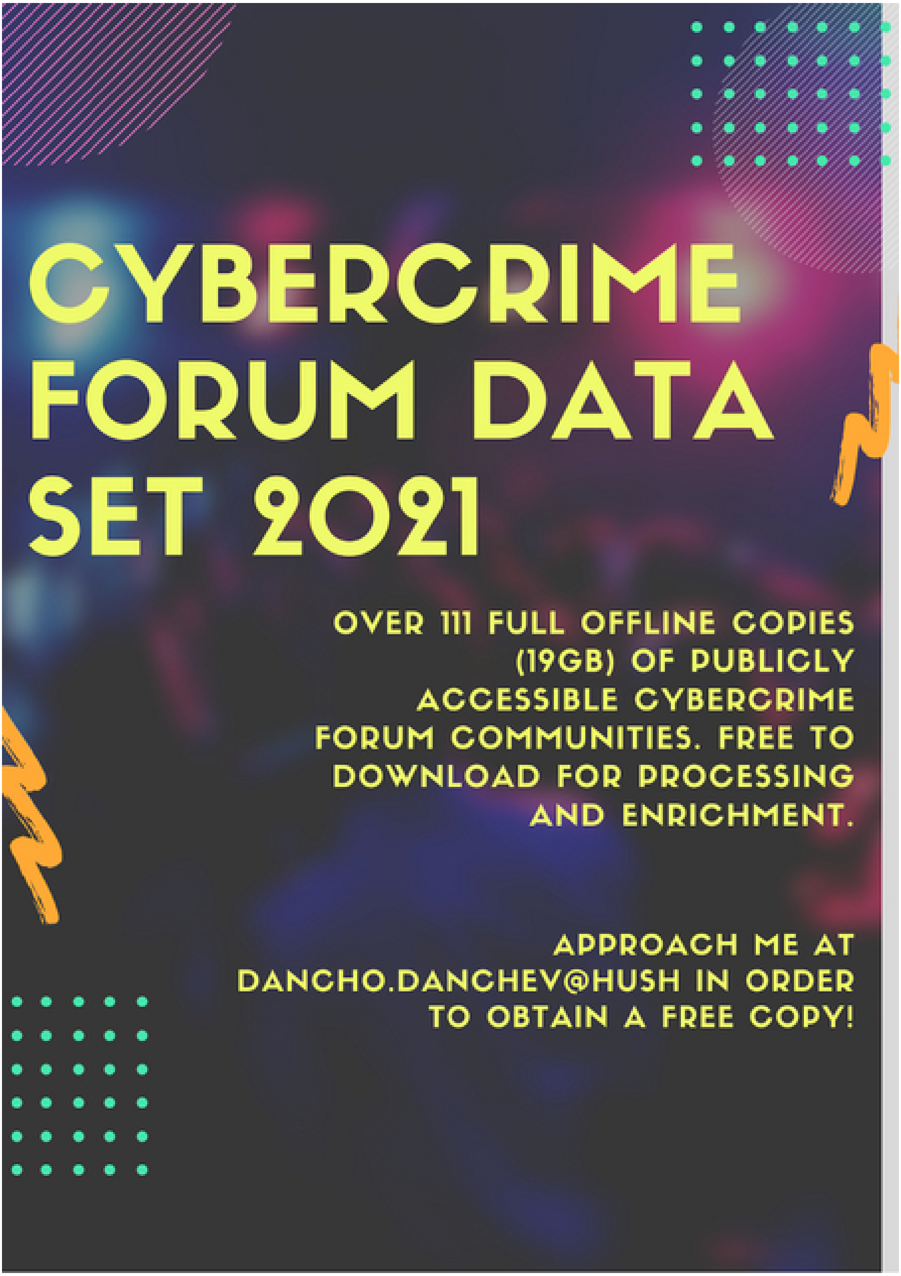
Dancho Danchev's Cybercrime Forum Data Set - Direct Free Technical Collection Download - Grab a Copy Today! (2021-09-22 11:21)

[1]



CYBERCRIME FORUM DATA SET 2021

OVER 111 FULL OFFLINE COPIES (19GB) OF PUBLICLY ACCESSIBLE CYBERCRIME FORUM COMMUNITIES. FREE TO DOWNLOAD FOR PROCESSING AND ENRICHMENT.

APPROACH ME AT DANCHO.DANCHEV@HUSH IN ORDER TO OBTAIN A FREE COPY!

Dear blog readers,

This is Dancho and I've decided to share with everyone a direct download link for my Cybercrime Forum Data Set with the idea to assist everyone on their way to achieve a decent situational awareness in the world of cybercrime research and threat intelligence gathering including to help everyone improve their cyber threat actor attribution campaigns.

The Cybercrime Forum Data Set is part of my currently ongoing Law Enforcement and OSINT operation called "[2]Uncle George".

Sample direct download links to the cybercrime-friendly forum communities found in the actual Cybercrime Forum Data Set:

Флуд мобильных телефонов

Сбой номера из-за непрерывных вызовов с коротким интервалом времени.
Владелец номера не сможет воспользоваться своим телефоном.
Позвонить, принять другие вызовы, отправлять сообщения будет не возможно.
Мобильный будет разрываться от входящих звонков столько-сколько пожелаете.
Сделаем бесплатный тест.
Услуга доступна для абонентов РФ.

Цена за 1 номер:
1 час - 350 руб.
2 часа - 699 руб.
3 часа - 899 руб.

Пошути над другом -
Заблокируй его телефон!

Только представьте, что ваш сотовый звонит неумолкая минимум полчаса и без разницы скидываете или снимаете трубку - он все равно звонит

Поверьте, это реальный вынос мозга!

Наш сервис предлагает услуги по непрерывному дозвону на мобильные телефоны всех операторов России

Устрой реальный экшен своим знакомым всего за 60 рублей

сервис не имеет мировых аналогов

Введите номер блокируемого телефона

Выберите продолжительность блокировки

Стоимость услуги: 60 рублей

У меня есть промокод

☑ Я согласен с условиями публичной оферты

Бесплатный тест

Сервис реально работает, в этом можно легко убедиться, указав свой номер.
Телефон будет бесплатно заблокирован на 1 минуту

Безопасность:

Безопасность работы с нами подтверждена многими международными системами контроля качества:

На сервере установлен VPN и SSL - полное шифрование ваших данных. Все наши счета верифицированы, включая персональный аттестат WebMoney:

- Бесперебойная работа, 24/7
- Флуд по всем направлениям, без ограничений
- Многоканальность
- Низкие тарифы
- Постоянные скидки, накопительные бонусы
- Реселлерский аккаунт, вы сами можете создавать аккаунты и подключать собственных клиентов, либо даже собственных реселлеров
- Независимая работа
- Полная отказоустойчивость, нет бана за флуд
- Абон. плата отсутствует, стоимость подключения единоразовая

Подмена номера » Спам/флуд телефонных номеров

Подмена номера телефона от SIP-system

Бесплатная **подмена номера телефона**, при звонках и отправке смс сообщений. **Подмена номера** предоставляется всем пользователям. На сайте SIP-system можно скачать программу для подмены номера телефона, как для звонков, так и для отправки сообщений. Также имеется подробная инструкция, как звонить с подменой номера телефона. Вы можете установить произвольный номер телефона и сразу же совершать с него вызовы.
Подмена номера телефона от компании SIP-system

Звони прямо со своего компьютера с подменой номера при помощи SIP-телефона. Звонки на остальных SIP операторов совершенно бесплатны, включая звонки на Skype. Услуга подмена номера бесплатно предоставляется всем клиентам SIP-system и не требует дополнительной активации, не имеет абонплаты и скрытых платежей. Звони прямо с мобильного, установи в своём мобильном приложение и совершай звонки с подменой номера на любые номера от 0,001$ за минуту разговора, без платы за соединение, по всему МИРУ!!! Компания SIP-system всегда заботится о своих клиентах!

Флуд телефонов!!! Без блокировки аккаунта!

Недорогие звонки!!!

Недорогие звонки по всему миру!!!

О компании

Здравствуйте! Предлагаем Вашему вниманию Флуд телефонов! Разрушьте планы своих конкурентов или сделайте так, чтобы у ваших знакомых был постоянно занят телефон!!! В отличие от других, у нас аккаунты не блокируются за совершение 50 и более звонков в день!

Предоставляется программа для флуда, настроите и программа будет работать автоматом.

С настройками программы поможем.

Дорогой друг!

Прими самые искренние поздравления с наступающим Новым годом!

Пусть Новый год подарит Вам благополучие, исполнение заветной мечты и укрепит веру в будущее.

Пусть успех сопутствует всем Вашим начинаниям всегда и во всем. Желаю Вам мира, согласия, терпения, добра, счастья и, конечно же, удачи!

С Новым годом

Страна: США

С 15 ДЕКАБРЯ

Главный герой работает в рекламном агентстве Нью-Йорка. Не так давно в его личной жизни произошла трагедия, ввергнувшая его в тяжелейшую депрессию. Коллеги пытаются помочь и разрабатывают нетрадиционный план по возвращению друга обратно на твёрдую почву, однако план срабатывает неожиданным образом.

[бесплатно] Galaxy Legend

В 2841 году в результате освоения далеких планет началась новая эпоха в истории человечества. Оказавшись в фантастическом мире загадок, интриг и возможностей, игрок примет командование галактической заставой, ведущей борьбу за власть. Это будет непросто: придется мобилизовать все силы, чтобы отразить удары неприятелей, жаждущих вашего уничтожения.

Приветствуем вас уважаемые пользователи ProCrd.Cc!

Предлагаем вам наши услуги:

Разработка сайтов

Создание

- Сайта автоматических продаж	от 20 000 руб.
- Сайта объявлений	от 10 000 руб.
- Интернет магазина	от 7 000 руб.
- Landing page	от 5 000 руб.
- Сайта «Визитка»	от 3 000 руб.

И другие... Рассмотрим любую задачу по созданию сайта!

От вас требуется хостинг и домен для сайта.

Дизайн в подарок!

Система управления сайтом

Все сайты создаем на удобной и простой в использовании системе управления, вы с легкостью научитесь управлять сайтом, добавлять и редактировать материалы. Мы предоставим вам подробную инструкцию по управлению сайтом.

Поддержка

Консультируем по любому возникшему вопросу и поможем вам в сложных ситуациях.

Услуги Web дизайна

Создание баннеров от 1 000 руб.
Самые завлекающие баннеры любого размера, под любые цели в формате Gif, Flash, html5 и другие.

Создание логотипов от 1 000 руб.
Креативный подход.

Разработка дизайна для вашего сайта от 5 000 руб.
Самый привлекательный дизайн любой сложности. Верстка.

И другое...
Рассмотрим любую задачу!

По остальным вопросам обращайтесь в Jabber: dizainer@exploit.im или в ЛС форума.

Портфолио спрашивайте по контактам.

Принимаем к оплате: Bitcoin, Qiwi, Сбербанк

Как построить карьеру в кибербезопасности

1 Шаг Ознакомьтесь с индустрией кибербезопасности и вакансиями на рынке труда

Меня часто спрашивают, как построить карьеру в сфере кибербезопасности? Многие не совсем правильно понимают, что из себя представляет эта индустрия и чем нужно будет заниматься в начале карьеры.

Часто люди считают, что кибербезопасность - это технологии и хакерство. Это похоже на правду, но кибербезопасность гораздо более широкая сфера. Это отрасль знания по управлению рисками, которые могут возникать при использовании технологий для решения каких-либо задач. Это означает, что специальности в безопасности могут сильно различаться от узкоспециализированных до руководства высшего звена, от аудита до компьютерной криминалистики.

Первое, что я бы порекомендовал вам сделать, это понять, какие виды работы есть в этой индустрии. Изучите сайты для поиска работы и найма персонала на вашем локальном рынке труда. Почитайте должностные обязанности, поймите отличия между специальностями, какими навыками/квалификациями нужно обладать.

Попытайтесь понять, какие специальности вам интересны на старте карьеры, чем бы вы хотели заниматься в середине своей карьеры и в ее завершении. Попытайтесь понять, какими зонами ответственности обладают все виды работы, что из себя представляют карьерные лестницы. От младшего аналитика безопасности до руководителя по информационной безопасности (CISO).

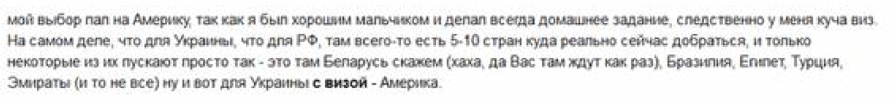
А вот Туркиши вырезали))) 90 % всего того, за что они Туркиши... как например, бухло в принципе, горячие блюда в принципе, и прочие другие полезные вещи



мой выбор пал на Америку, так как я был хорошим мальчиком и делал всегда домашнее задание, следственно у меня куча виз. На самом деле, что для Украины, что для РФ, там всего-то есть 5-10 стран куда реально сейчас добраться, и только некоторые из их пускают просто так - это там Беларусь скажем (хаха, да Вас там ждут как раз), Бразилия, Египет, Турция, Эмираты (и то не все) ну и вот для Украины **с визой** - Америка.

Недалеко от водопадов - есть точка - граница трёх стран - Уругвая, Аргентины и Бразилии, миловидное место жутко популярное у местных жителей.

На следующий день мы полетели в пыльный агрессивный Рио. Времени на всякие дополнительные приключения не было, когда нас высадили возле домика на горе, жена сказала, что "ты предупреждал, что будет плохо, но я не думала что настолько". Это пока она не поселилась, а когда поселилась, всё у неё стало хорошо, ведь эта гора как раз с памятником Христу)

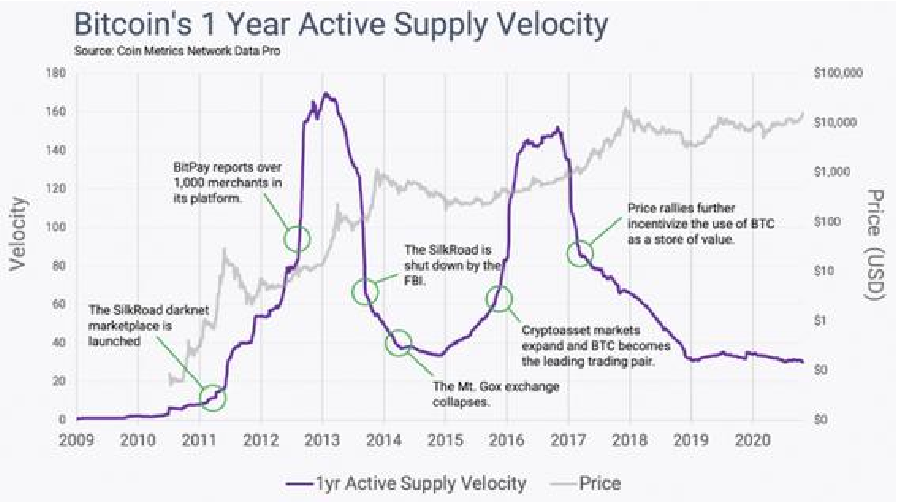
Bitcoin's 1 Year Active Supply Velocity

Source: Coin Metrics Network Data Pro



Bitcoin's 1 Year Active Supply Velocity

Source: Coin Metrics Network Data Pro

The SilkRoad darknet marketplace is launched

BitPay reports over 1,000 merchants in its platform.

The SilkRoad is shut down by the FBI.

The Mt. Gox exchange collapses.

Cryptoasset markets expand and BTC becomes the leading trading pair.

Price rallies further incentivize the use of BTC as a store of value.

Некогда успешный попкорн с очередью

Фаст фуды работают только на вынос, сидеть внутри нельзя. В крутых фешенебельных ресторанах, обращаешься к персоналу даже из за стола - без маски на тебе, тебя просто проигнорируют. Сколько бы ты не отдал за ужин, через 2 часа тебя выгонят нах из заведения. Половина магазинов стоит закрыта в городе, а в аэропорту 90%. Между терминалами курсирует поезд, просто чтобы рельсы не окоченели)) Пассажиров он не берёт. Хочешь в другой терминал - садись на автобус, где проконтролируют, чтобы ты был подальше от других. Американцы по прежнему готовы помочь соотечественникам в беде. Нам как обычно не хватило багажных сумок ни по весу ни по объёму, и я рассчитывал прикупить дополнительный чумадан в аэропорту, но в итоге получил фиаско) меня даже межтерминальный автобус на обратном пути забыл высадить и делал круг. Потому я предпринял 3.5 км пеший тур прогуляться в ближайший торговый центр по автостраде в основном в качестве наказания)) так останавливались, предлагали помощь. Очень приятно, а вдруг я чумной?))

[38]

9700

каких то 2600 км за рулем по Мексике за 4 дня и мы одолели путь с Мехико на Канкун, с отвлечениями на Митлу, Паленке, Пуэблу, Чичен-Ицу и прочие вещи.

Но тоже, Америка возможна, если лететь туда НЕ ступая ногой в Европу! А как это сделать? ведь основной транзит как раз и проходит через хабы Германии, Франции, Польши. Нельзя. Даже на получасовую пересадку нельзя, ни на минуточку нельзя. Просто потом не пускают в Америку. С Украины прямых рейсов давно нет, значит что остаётся - Дубай или Стамбул. (хаха в квадрате, значит в Европе ситуация хуже чем в Турции? или в Украине??))

Первый раз пробую такую турецкую ересь, зачетная штука горячая) очередь стояла человек на 20

Шаг

Демонстрируйте свои способности

Чтобы заполучить свою первую работу, вы ДОЛЖНЫ БЫТЬ способны продемонстрировать свои навыки и умения. Чтобы это сделать, я рекомендую создать публичный профиль. Попробуйте заниматься исследованиями в области безопасности, выступайте со своими докладами, пытайтесь получить премии за обнаруженные уязвимости в программном обеспечении, отвечайте на вопросы на форумах, создавайте инструменты для безопасности, пишите посты и статьи. Делайте вклады в опенсорсные проекты и устанавливайте рабочие связи с их разработчиками.

Заведите блог, Twitter, LinkedIn или аккаунт в других социальных сетях и полностью документируйте свою работу. Общайтесь со специалистами в социальных сетях. Комментируйте последние новости в сфере безопасности. Посещайте конференции по безопасности типа DEFCON, Black Hat, DerbyCon, ShmooCon, InfoSec и другие. Заводите знакомства с участниками этих конференций.

Размещайте все, чем занимаетесь, в свое приватное резюме, которое вы отправляете работодателям.

Публичное и приватное резюме демонстрируют ваши способности, энтузиазм и увлеченность. Именно это приведет к тому, что вас очень быстро наймут на работу!

Например чёрная икра теперь подаётся не с общей горки, а каждая порция в своей баночке... Почти так же глобально как и у турков) ну слов нет, жлобы жлобами, потому они моих денег не получат)
+ В самолете ходят надзиратели и надзирательницы, маска на носе, обязательно медицинская, кастомные запрещают. В экономе нет даже вина и за 5 $, ничего нет))) и купить нельзя - опасно же!!
Но Сухой летает только SuperJet, а Ahtaua летает под допингом)) Потому в турецком дютике был куплен прекрасный Bowmore 10 лет, который в лаунже был разлит под яблочный сок в 4 прекрасных бутылочки) Цвет в принципе подошёл) в лаунже от турков бухла также 0 если что, но масочный режим не такой строгий. Думал материть тот лаунж в сравнении с украинским, но потом столкнулся с американскими и мое восприятие малость поменялось.

[68]

ПОЛНОСТЬЮ УНИКАЛЬНЫЕ РЕШЕНИЯ

НАША КОМАНДА СПЕЦИАЛИЗИРУЕТСЯ НА АТАКАХ ВЫСОКОГО УРОВНЯ. МЫ ИСПОЛЬЗУЕМ ТОЛЬКО СВОИ ПРИВАТНЫЕ РАЗРАБОТКИ, ВЫ МОЖЕТЕ БЫТЬ УВЕРЕНЫ В КОНЕЧНОМ КАЧЕСТВЕ СЕРВИСА.

1 ПО-НАСТОЯЩЕМУ МОЩНЫЙ DDOS

НА СЕГОДНЯШНИЙ ДЕНЬ МЫ ПРЕДОСТАВЛЯЕМ САМЫЙ ЭФФЕКТИВНЫЙ DDOS НА РЫНКЕ. В ОТЛИЧИЕ ОТ ОСТАЛЬНЫХ, МЫ РЕАЛЬНО ОБХОДИМ ЛЮБЫЕ, ДАЖЕ НАИБОЛЕЕ СЛОЖНЫЕ ЗАЩИТЫ, НЕ НА СЛОВАХ, А НА ДЕЛЕ.
НАША АТАКА ПОЗВОЛЯЕТ ПОЛНОСТЬЮ ЭМУЛИРОВАТЬ РЕАЛЬНОГО ПОСЕТИТЕЛЯ САЙТА, ЧТО НЕ ДАЕТ ЕЁ ФИЛЬТРОВАТЬ В БОЛЬШИНСТВЕ СЛУЧАЯХ.

2 ГАРАНТИРОВАННАЯ НАДЕЖНОСТЬ

ВЫ РАБОТАЕТЕ НАПРЯМУЮ С ИСПОЛНИТЕЛЕМ, КОТОРЫЙ НЕСЕТ ПОЛНУЮ ОТВЕТСТВЕННОСТЬ ЗА ВАШ ЗАКАЗ. ЗАБУДЬТЕ О ПОСРЕДНИКАХ! НАШ ОПЫТ РАБОТЫ БОЛЕЕ 2-Х ЛЕТ.
У НАС ЕСТЬ ОТЗЫВЫ И РЕПУТАЦИЯ КОТОРОЙ МЫ ДОРОЖИМ.
МЫ РАБОТАЕМ С МАКСИМАЛЬНОЙ ОТДАЧЕЙ, БЕЗ ПРОСТОЕВ И ДРУГИХ ПРОБЛЕМ, ГАРАНТИРУЯ ВЫСОКУЮ НАДЕЖНОСТЬ И ПРОФЕССИОНАЛИЗМ НАШИХ УСЛУГ.

3 КЛИЕНТСКАЯ ПОДДЕРЖКА

МЫ ЗАБОТИМСЯ О ВРЕМЕНИ НАШИХ КЛИЕНТОВ. ЕСЛИ ВЫ ХОТИТЕ СДЕЛАТЬ ЗАКАЗ, ЗАДАТЬ ВОПРОСЫ ИЛИ ПРОСТО ОБСУДИТЬ ДЕТАЛИ - МЫ ВСЕГДА НА СВЯЗИ, ЧТОБЫ ПОМОЧЬ.

4 ГИБКИЕ ЦЕНЫ

ФОРМИРОВАНИЕ ЦЕНЫ НА DDOS ПРОИСХОДИТ ИНДИВИДУАЛЬНО, В ЗАВИСИМОСТИ ОТ ЗАЩИЩЕННОСТИ АТАКУЕМОГО РЕСУРСА.
ПОЛУЧИТЬ ТОЧНУЮ ЦЕНУ И УЗНАТЬ ПОДРОБНОСТИ ВЫ МОЖЕТЕ ПО КОНТАКТАМ НАШЕЙ КЛИЕНТСКОЙ ПОДДЕРЖКИ.

5 КОНФИДЕНЦИАЛЬНОСТЬ

ЗАКАЗЫВАЯ УСЛУГУ У НАС, ВЫ МОЖЕТЕ БЫТЬ УВЕРЕНЫ, ЧТО ИНФОРМАЦИЯ О ВАШЕМ ЗАКАЗЕ НЕ УЙДЕТ ДАЛЬШЕ НАШЕГО СЕРВИСА И НЕ ПОЙДЕТ ПО РУКАМ ДРУГИХ ИСПОЛНИТЕЛЕЙ.

СПОСОБЫ ОПЛАТЫ:
BITCOIN
*И ДРУГИЕ ПОПУЛЯРНЫЕ КРИПТОВАЛЮТЫ

ЕСЛИ ВЫ НЕ ЗНАЕТЕ КАК ОПЛАТИТЬ С ПОМОЩЬЮ BITCOIN, МЫ ПОДРОБНО РАССКАЖЕМ, КАК ЭТО СДЕЛАТЬ, ЭТО ЗАЙМЕТ НЕ БОЛЕЕ 5 МИНУТ.

USB RUBBER DUCKY

$44.99

The USB Rubber Ducky is a keystroke injection tool disguised as a generic flash drive. Computers recognize it as a regular keyboard and accept pre-programmed keystroke payloads at over 1000 words per minute.

Payloads are crafted using a simple scripting language and can be used to drop reverse shells, inject binaries, brute force pin codes, and many other automated functions for the penetration tester and systems administrator.

Since 2010 the USB Rubber Ducky has been a favorite among hackers, penetration testers and IT professionals. With origins as the first IT automation HID using an embedded dev-board, it has since grown into a full fledged commercial Keystroke Injection Attack Platform. The USB Rubber Ducky captured the imagination of hackers with its simple scripting language, formidable hardware, and covert design.

Божеее) раньше хоть лайки ставили за прошлые отзывы... а теперь - вот простое "огромное спасибо"

ну что же, видимо не дотягиваю до лайка, будем исправлять положение!

на январь 2021 у меня была запланирована прекрасная гостеприимная Бразилия, ну и конечно же, все атрибуты при ней.

А вот и знаменитейшие водопады Игуасу. В моём рейтинге - самый топ по водопадности

Для тех, кто думает, что всё скоро закончится - и не надейтесь. Если Вы закрылись и думаете переждать - открывайтесь немедленно. Ищите способы. Америка сидит в такой глубокой обороне, куча сервисов, магазинов, макдональдсов, всё закрыто уже 7 месяцев, поросло мхом и не думает открываться. За маски орут даже таксисты на инфинити, которым в принципе по таким тарифам не положено открывать рот. Мой друг Трамп выделил всем по 1200 долларов даже несовершеннолетним пару месяцев назад, и сейчас выделяет следующий такой же транш. Они готовы пережидать в таком режиме еще 1.5-2 года минимум. Знайте что так и будет.

Странно что искренне анти-президентскую книгу продают целыми штабелями в государственных аэропортах) Демократия в силе

весь тур занял у меня около 4х дней, и закончился позавчера. по возврату меня ждало ровно ничего) пустили в страну без масок, самоизоляций и прочей хни) полноте, что Штаты для Украины находятся в красной зоне и самоизоляция как бы нужна бы была по закону)) но меня не спрашивали, был ли я там, я и не отвечал.

да уж, возврат к реальности. Buon guten, что ещё сказать

Вообщем, надеюсь камбек мой удался. Знаю Маэстро-Сержик+Сержик + иже с ними не отдыхали так как я, а всё это время упорно трудились на благо Братства и теневого ордена. Каюсь, запустил я всё это непозволительно долго. Буду сейчас активно исправляться. Через 3 недели ждите мега-обзор онлайн в старом стиле, люкс на максимум, ведь я буду осваивать Мексику. Конечно же Сержик мне в помощь и благословение! Спасибо за очередной закрытый проект, Бро)

Итак, коллеги) приветствую всех старичков, ну Ахта-TV снова с Вами, и вернулся я не с пустыми руками, а с актуальным первопроходческим отчётом, который, я уверен, поможет многим из Вас разобраться, что же у нас сейчас в мире происходит))

Сразу обмолвлюсь, не летал я никуда за пределы страны уж 8 месяцев, с 05.02, когда мы с женой на 9ом месяце успешно завершили очередную двойную кругосветку!

выбрать что куда и как нынче довольно сложно, так как кроме визовых ограничений, добавилось около 200 ограничений каждой из мировых стран, которая от Вас обязательно что-то хочет перед прилётом!

Украинские бизнес залы как обычно на высоте, ну разве что коньяк из пластикового стакана не такой коньячный)) а так горячее блюдо, бутики, салаты, конфеты, не вырезали из меню ровно ничего

Норм все? 2:45

Если хочешь давай ждать пока придет и фотку сделает тебе мист 2:45

Слушай 2:46

Вопрос ещё маленький 2:46

Та нет 2:46

Я верю 2:46

Просто меня один момент смущает 2:47

Что если, пока будет вся эта красота идти/лететь 2:47

Придёт чардж? 2:47

И вот хэхэхэхэ как мист отреагирует 2:48

И ещё один вопрос 2:48

Много шопов знаешь? 2:48

Поэтому надо быстро 2:49

Паки делатт 2:49

И в ру 2:49

Дающих шмот пака мало знаю 2:50

Я в кардинге не давно, еле концв с концами свожу тут) 2:50

Ну а так пробиваю иногда еле еле шопчик какой нить 2:50

В укр пак идёт 2 недели минимум. Моя посылка шла с 53 дня :)))) (2:50

Что если в это время чардж придёт 2:51

Аа 2:51

Не ты че 2:51

Пак не развернут 2:51

[225]

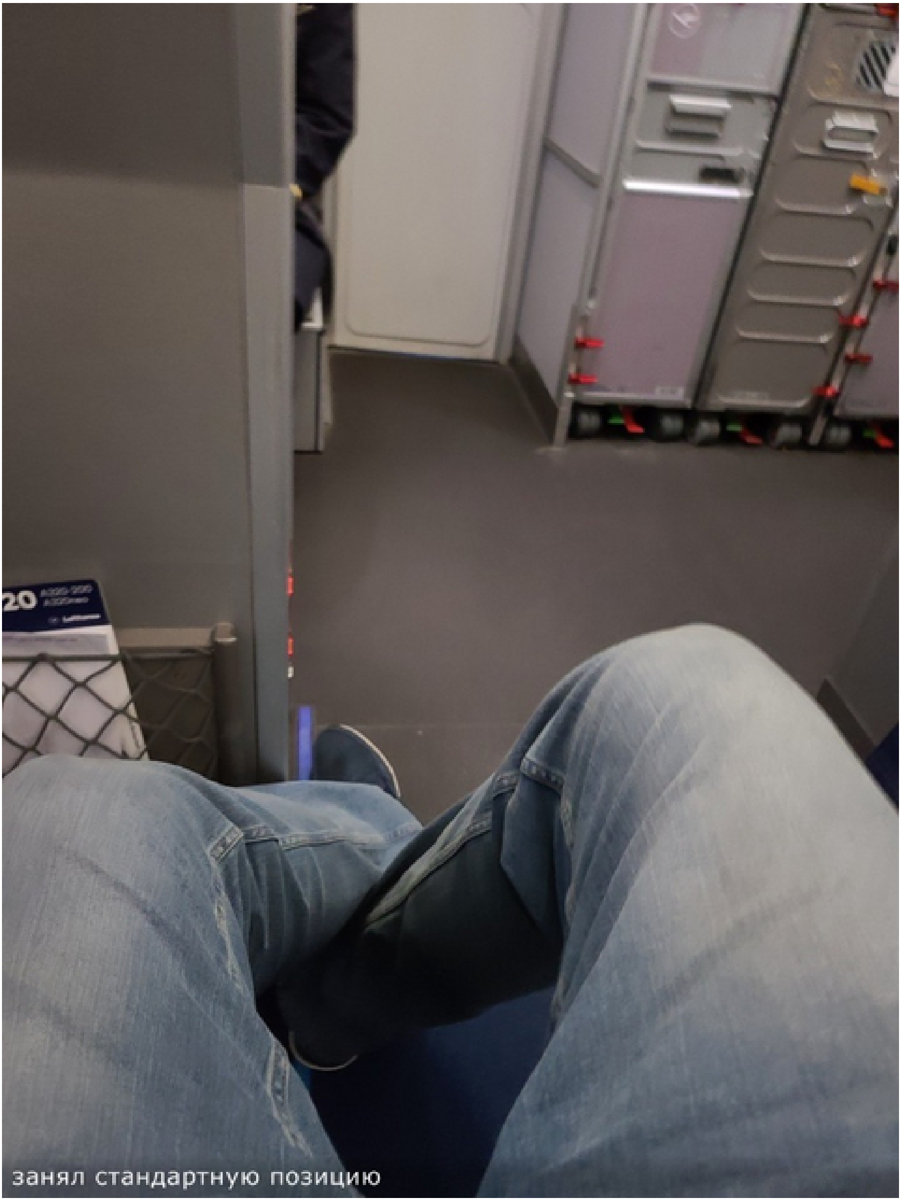
И тут мы планово подходим к вопросу, о том, что хотелось бы полететь хоть как нибуть респектабельно. Кто меня знает, тот в курсе, что не смотря на мещанскую любовь к роскоши и наличие огромных средств, я всё-таки ко многим вещам подхожу прагматично. И вот, ну не поднимается у меня ~~жр->~~ отдать 2500$ умножить даже на 40% или на 50% за холодный обдолбанный бутерброд, под минералку и вино за 5$. И это всё я Вам за бизнес-класс вообще то сообщаю от Turkish Airlines. Нет ни горячих полотенец, ни приветственных шампаней, ни горячих блюд... почему нельзя алкоголь? только индивидуальные емкости! Блин, так для виски придумали прекрасные индивидуальные емкости по 5 мл, их так удобно потом после самолёта еще мешком в номер забирать))) Но Туркиши о таких ёмкостях "не знают". Ну то есть происходит обычное бизнес-жлобство простыми словами. Например та же Lufthansa тоже внесла изменения посвящённые корона-вирусу в обслуживание...

К Трампушке с пустыми руками не гоже

[264]

9915



занял стандартную позицию

[265]

9916

Я, LOOT, ПРЕДСТАВЛЯЮ ВАШЕМУ ВНИМАНИЮ

ЕДИНЫЙ ИНФОРМАЦИОННЫЙ КАТАЛОГ

Полная информация по работающим в сети Обнал сервисам, сервисам которые прямо или косвенно соприкасаются с миром обнала. Уже сейчас всё становится быстро, доступно, а самое главное прозрачно. Никакой предвзятости и личной неприязни, конкуренцию в сторону, лишь строгий мониторинг, прямое общение с владельцами сервисов, личный контроль проверки достоверности информации.

В ОДНОМ МЕСТЕ, В УДОБНОМ ДЛЯ ОЗНАКОМЛЕНИЯ ФОРМАТЕ

ВЫ УВИДИТЕ:

1 Полное описание сервиса со всей актуальной информацией
2 Информацию по всем профилям сервиса на ресурсах дарка
3 Ссылки на профили
4 Дата регистраций
5 Имеющиеся депозиты
6 Ссылки на рабочие темы
7 Общее количество положительных и отрицательных отзывов с ссылками на них.
8 Полную информацию по арбитражам
9 Социальная активность сервиса
10 Интервью с владельцем, ответы на актуальные вопросы.

ПОПАСТЬ В ЕДИНЫЙ ИНФОРМАЦИОННЫЙ КАТАЛОГ СМОЖЕТ НЕ КАЖДЫЙ

КРИТЕРИИ СЛЕДУЮЩИЕ:

От 6 месяцев работы

От 5 положительных отзывов
(не от новорегов)

ОБА КРИТЕРИЯ ОБЯЗАТЕЛЬНЫ

Если вы обнаружили неактуальную, недостоверную информацию или обладаете какой-либо информацией по опубликованным в каталоге сервисам, напишите в теме анкете сервиса, мне ЛС или Telegram.
После тщательной проверки, информация будет отредактирована.

ALPHA
LOCKER

ABOUT

Aplha locker написан на C#. Имеет минимальный вес до 50 кв. Шифрует все диски подключенные к PC. Дошифровывает файлы, если PC был выключен, при повторном включении. Уникальный ключ для каждой машины. Большой список шифруемых расширений, который можно пополнить при желании. Декриптор файлов, позволяет делать выборочный декрипт одного файла или целой папки, что существенно увеличивает шанс востановления шифрованных данных. Админка с статистикой и общей информацией. Возможность добавления или удаления функций по желанию покупателя. Скрипт автоматического бэкапа БД, который имеет гибкие настройки, что позволяют своевременно делать резервные копии. Связь для получения декриптора через e-mail.

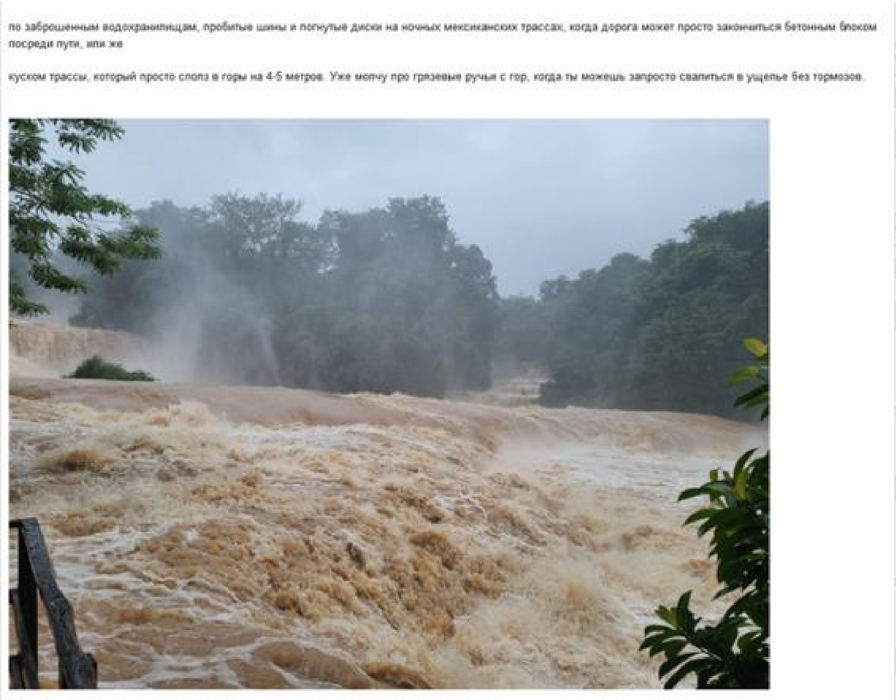
[330]

Видок с лаунжа) можно потренироваться паркуром



по заброшенным водохранилищам, пробитые шины и погнутые диски на ночных мексиканских трассах, когда дорога может просто закончиться бетонным блоком посреди пути, или же

куском трассы, который просто сполз в горы на 4-5 метров. Уже молчу про грязевые ручьи с гор, когда ты можешь запросто свалиться в ущелье без тормозов.

Как избежать заражения
коронавирусом:

Мойте руки с жидким мылом и водой или используйте антисептические средства на спиртовой основе

При чихании и кашле прикрывайте рот и нос бумажной салфеткой или согнутым локтем

Избегайте тесных контактов с людьми с симптомами острых респираторных инфекций или гриппа

Подвергайте тщательной термической обработке мясо и яйца

Избегайте контактов с животными и птицами в дикой природе и на фермах
